Sooryamoorthy, Nene Ernest Khalema, 2023. The Oxford Handbook of the Sociology of Africa presents a comparative analysis of sociological thinking in Africa. Focusing on examples from Africa, this diverse collection presents to a broad readership an accessible, comprehensive, up-to-date, and topical analysis of sociological thinking in Africa. Sociological discourse about African societies has been challenging and difficult due to a lack of both comprehensive analyses and holistic sociological evidence that covers Africa from past to present. This Handbook locates African sociological thinking in historical context and takes a critical look at its current manifestations across the continent. *Rediscovering the History of Psychology* Adrian Brock, Johann Louw, Willem van Hoorn, 2006-02-07. Keith A. Roberts, David Yamane, 2015-07-18 This fully updated Sixth Edition of *Religion in Sociological Perspective* introduces students to the basic theories and methods in the field and shows them how to apply these analytic tools to new groups they encounter. Authors Keith A. Roberts and David Yamane explore three interdependent subsystems of religion: meaning, structure, and belonging, and their connections to the larger social structure. While they cover the major theoretical paradigms of the field and employ various middle range theories to explore specific processes, they use the open systems model as a single unifying framework to integrate the theories and enhance student understanding. **The Sociology of Everyday Life: Peacebuilding** John D. Brewer, Bernadette C. Hayes, Francis Teeney, Katrin Dudgeon, Natascha Mueller-Hirth, Shirley Lal Wijesinghe, 2018-07-04 This book uses in depth interview data with victims of conflict in Northern Ireland, South Africa, and Sri Lanka to offer a new sociological conceptualization of everyday life peacebuilding. It argues that sociological ideas about the nature of everyday life complement and supplement the concept of everyday life peacebuilding recently theorized within International Relations Studies (IRS). It claims that IRS misunderstands the nature of everyday life by seeing it only as a particular space where mundane routine and ordinary peacebuilding activities are accomplished. Sociology sees everyday life also as a mode of reasoning. By exploring victims' ways of thinking and understanding, this book argues that we can better locate their accomplishment of peacebuilding as an ordinary activity. The book is based on six years of empirical research in three different conflict zones and reports on a wealth of interview data to support its theoretical arguments. This data serves to give voice to victims who are otherwise neglected and marginalized in peace processes. *Imagined Liberation* Heribert Adam, Kogila Moodley, 2013-12-01 On a spectrum of hostility towards irregular migrants, South Africa ranks on top, Germany in the middle, and Canada at the bottom. South African xenophobic violence by impoverished slum dwellers is directed against fellow Africans. Why would a society that liberated itself in the name of human rights turn against people who escaped human rights violations or unlivable conditions at home? What happened to the expected African solidarity? Why do former victims become victimizers? *Imagined Liberation* asks what xenophobic societies can learn from other immigrant societies which avoided the backlash against multiculturalism in Europe. *Social Stratification, Class, Race, and Gender in Sociological Perspective, Second Edition* David Grusky, 2019-09-05 The volume offers essential reading for undergraduates who need an introduction to the field, for graduate students who wish to broaden their understanding of stratification research, and for advanced scholars who seek a basic reference guide. Although most of the selections are middle range theoretical pieces suitable for introductory courses, the anthology also includes advanced contributions on the cutting edge of research. The editor outlines a modified study plan for undergraduate students requiring a basic introduction to the field. **State Formation After Civil War** Derek M. Powell, 2016-08-05 *State formation after civil war* offers a new model for studying the formation of the state in a national peace transition as an integrated national phenomenon. Current models of peacebuilding and state building limit that possibility by reproducing a fragmented selective view of this complex reality. Placing too much

emphasis on state building as design they place too little on understanding state formation as unplanned historical process The dominant focus on national institutions also ignores the role that cities and civic polities have played in constituting the modern state Mining ideas from many disciplines and evidence from 19 peace processes including South Africa the book argues that the starting point for building a systematic theory is to explain a distinct pattern to state formation that can be observed in practice Despite their conflicts people in fragile societies bargain terms for peaceful coexistence they make attempts to constitute the right to rule as valid state authority in circumstances prone to conflict over which they have imperfect influence not control Though the kind of institutions created will differ with context how rules for state authority are institutionalized follows a consistent basic pattern That pattern defines state formation in peace transitions as both a unified if contingent field of normative practice and an object of comparative study Where the national centric models see local government as a matter belonging to policy on decentralization for later in the reconstruction phase the book uncovers a distinct local government dimension to peace transitions A civic dimension to national conflicts that must be explained incipient or proto local authorities that emerge even during civil war in peace making after state collapse the fact that it is common for peace agreements and constitutions to include rules for local authority for local elections to be held as part of broader democratization and for laws to be enacted to establish local government as part of peace compacts The book develops the concept of local peace transition to explain the distinctive constitutive role of this local dimension in peace making and state formation This path breaking book will be of compelling interest to practitioners scholars and students of comparative constitutional studies international law peace building and state building *Africa Air University (U.S.). Library,1972* [Inclusive Education in South Africa and the Developing World](#) Sigamoney Manicka Naicker,2018-09-24 This book offers a framework for the implementation of inclusive education in developing countries It proposes bringing the vulnerable to the centre of planning decisions recognising the history of special education in psychologizing failure and that mainstream must own the transformation to inclusive education
