Jan Smuts N. Levi, 1917 *Settler Colonialism in the Twentieth Century* Caroline Elkins, Susan Pedersen, 2012-11-12 Postcolonial states and metropolitan societies still grapple today with the divisive and difficult legacies unleashed by settler colonialism Whether they were settled for trade or geopolitical reasons these settler communities had in common their shaping of landholding laws and race relations in colonies throughout the world By looking at the detail of settlements in the twentieth century from European colonial projects in Africa and expansionist efforts by the Japanese in Korea and Manchuria to the Germans in Poland and the historical trajectories of Israel Palestine and South Africa and analyzing the dynamics set in motion by these settlers the contributors to this volume establish points of comparison to offer a new framework for understanding the character and fate of twentieth century empires

Imperial Ecology Peder ANKER, Peder Anker, 2009-06-30 From 1895 to the founding of the United Nations in 1945 the promising new science of ecology flourished in the British Empire Peder Anker asks why ecology expanded so rapidly and

how a handful of influential scientists and politicians established a tripartite ecology of nature knowledge and society Patrons in the northern and southern extremes of the Empire he argues urgently needed tools for understanding environmental history as well as human relations to nature and society in order to set policies for the management of natural resources and to effect social control of natives and white settlement Holists such as Jan Christian Smuts and mechanists such as Arthur George Tansley vied for the right to control and carry out ecological research throughout the British Empire and to lay a foundation of economic and social policy that extended from Spitsbergen to Cape Town The enlargement of the field from botany to human ecology required a broader methodological base and ecologists drew especially on psychology and economy They incorporated those methodologies and created a new ecological order for environmental economic and social management of the Empire Table of Contents Acknowledgments Introduction From Social Psychology to Imperial Ecology General Smuts s Politics of Holism and Patronage of Ecology The Oxford School of Imperial Ecology Holism and the Ecosystem Controversy The Politics of Holism Ecology and Human Rights Planning a New Human Ecology Conclusion A World without History An Ecology of Ecologists Notes Sources Index Reviews of this book Peder Anker s Imperial Ecology is the unexpected story of how late imperial British ecologists took their arcane studies of marine life off Spitzbergen or the game of southern Africa and brought them to bear on very different areas of interest These ecologists fashioned from their studies a view of human ecology broad enough in this telling to embrace cycles of sexual activity in Japanese brothels famine in central Asia the building blocks for national economic planning and the cultural underpinnings of Nazism An eye opener Fred Pearce New Scientist Reviews of this book Few books are truly original however Anker puts an original perspective on the history of ecology linking two major schools of thought to the imperial aspirations of Great Britain The UK provided patronage grants to support ecologists who in turn provided important concepts strengthening Britain s imperial grip by enhancing resource management and incorporating human ecology into colonial ecosystems This thought provoking book provides many new insights into the history of a discipline It will be news to most ecologists whose knowledge of their own history is often sketchy at best J Burger Choice Anker has written a ruthlessly honest political and cultural history of ecology setting it firmly in the world of nineteenth century colonialism Illusions vanish here turn of the century ecology did not stand for a pure pacifism or an eden of natural harmony Instead we find that both the liberal mechanism of British ecologist Arthur George Tansley and the holistic ecology of South African statesman Jan Christian Smuts were both firmly built upon nationalism and a nationalism that mattered a great deal militarily racially and socially This is important work and a riveting read Peter Galison Harvard University [Ethics in Social Networking and Business 1](#) Pierre Massotte, 2017-08-14 This book the first of two volumes dedicated to ethics in social networking and business presents the notions theories and practical aspects related to ethics morale and deontology in our society Through a series of discussions and examples on topics ranging from complexity to evolution theories the author provides an insight into why business ethics is essential for

Grattan,2009-04-30 Air power has come to be seen as a country s first line of defence in the First World War views were vastly different Aircraft were a novelty not always welcomed by the traditionalist military and there were no tactics doctrine or strategies available for the deployment of air power Yet within four years proponents of the new force were making claims often extravagant of what aircraft could achieve Here Robert Grattan traces the remarkable history of the emergence of air power as a force to reckon with and its dramatic impact on military strategy He discusses the details of aircrafts their engines and manufacture including the Fokker Bristol Fighter the Zeppelin and the DH2 the weaponry and prominent figures such as Albert Ball and Werner Voss The First Air War is indispensable for military historians aviation and military enthusiasts as well as those interested in strategy *Louise Thompson Patterson* Keith Gilyard,2017-09-29 Born in 1901 Louise Thompson Patterson was a leading and transformative figure in radical African American politics Throughout most of the twentieth century she embodied a dedicated resistance to racial economic and gender exploitation In this the first biography of Patterson Keith Gilyard tells her compelling story from her childhood on the West Coast where she suffered isolation and persecution to her participation in the Harlem Renaissance and beyond In the 1930s and 1940s she became central along with Paul Robeson to the labor movement and later in the 1950s she steered proto black feminist activities Patterson was also crucial to the efforts in the 1970s to free political prisoners most notably Angela Davis In the 1980s and 1990s she continued to work as a progressive activist and public intellectual To read her story is to witness the courage sacrifice vision and discipline of someone who spent decades working to achieve justice and liberation for all **Lifelines from Our Past** L. Reenchanted Science Anne Harrington, 2020-09-01 By the 1920s in Central Europe it had become a truism among intellectuals that natural science had disenchanted the world and in particular had reduced humans to mere mechanisms devoid of higher purpose But could a new science of wholeness heal what the old science of the machine had wrought Some contemporary scientists thought it could These years saw the spread of a new holistic science designed to nourish the heart as well as the head to reenchanted even as it explained Critics since have linked this holism to a German irrationalism that is supposed to have paved the way to Nazism In a penetrating analysis of this science Anne Harrington shows that in fact the story of holism in Germany is a politically heterogeneous story with multiple endings Its alliances with Nazism were not inevitable but resulted from reorganizational processes that ultimately brought commitments to wholeness and race healing and death into a common framework Before 1933 holistic science was a uniquely authoritative voice in cultural debates on the costs of modernization It attracted not only scientists with Nazi sympathies but also moderates and leftists some of whom left enduring humanistic legacies Neither a reduction of science to its politics nor a vision in which the sociocultural environment is a backdrop to the internal work of science this story instead emphasizes how metaphor and imagery allow science to engage real phenomena of the laboratory in ways that are richly generative of human meanings and porous to the social and political imperatives of the hour

The Vital Science (Routledge Revivals) Peter Morton, 2014-08-01 In this title first published in 1984 Peter Morton argues that in late Victorian Britain a group of novelists and essayists quite consciously sought and found ideas in post Darwinian biology that were susceptible to imaginative transformation The period between 1860 and 1900 was a time of great confusion in biology the natural selection hypothesis was in retreat before its acute critics and no extension of evolutionary theory to human affairs was too bizarre to attract its quota of enthusiasts Writers capitalised on this prevailing uncertainty and used it to their own artistic or polemic ends A fascinating and interdisciplinary title this reissue will interest students of late Victorian literature as well as historians of biological theory between The Origin of Species and Mendel
