histories of the region it is not divided on a country by country basis and is not structured purely chronologically but rather takes a thematic and regional approach to Southeast Asia's history. This volume, the second and final in the series, takes us into the nineteenth and twentieth centuries from the late eighteenth century of the Christian era when most of the region was incorporated into European empires to the complexity and dramatic change of the post World War II period. It covers the economic and social life as well as the religious and popular culture of the region as they develop over two centuries. The political structures of the region are also closely examined from the insurgencies and rebellions of early this century to the modern Nationalist movements which challenged the control of the colonial powers and led to the formation of independent states. Under the editorship of Nicholas Tarling, Professor of History at the University of Auckland, New Zealand, each chapter is well integrated into the whole. Professor Tarling has assembled a highly respected team of international scholars who have presented the latest historical research on the region and succeeded in producing a provocative and exciting account of the region's history.

**The Cambridge History of Southeast Asia: Volume 2, Part 2, From World War II to the Present**  
 Nicholas Tarling, 2000-01-28. In these four volumes published in paperback in 2000, twenty-two scholars of international reputation consider the whole of mainland and island Southeast Asia from Burma to Indonesia. Each volume has a new preface which points to the relationships with the other volumes. The prefaces also comment on some of the research into and thinking about the subject undertaken since the original contributions were completed for the first edition. Volume 2, Part 2 covers the period from World War II to the present and examines the end of European colonial empires, the emergence of political structures of the independent states, economic and social change, religious change in contemporary Southeast Asia, Southeast Asia's role and identity in decolonisation, and the ongoing weakening of links with the West. *Books in Series*

, 1985. Vols for 1980 issued in three parts. Series Authors and Titles. **The History of the Book in South Asia**. Francesca Orsini, 2016-12-05. The History of the Book in South Asia covers not only the various modern states that make up South Asia today but also a multitude of languages and scripts. For centuries it was manuscripts that dominated book production and circulation, and printing technology only began to make an impact in the late eighteenth century. Print flourished in the colonial period and, in particular, lithographic printing proved particularly popular in South Asia, both because it was economical and because it enabled multi-script printing. There are now vibrant publishing cultures in the nation-states of South Asia, and the essays in this volume cover the whole range from palm leaf manuscripts to contemporary print culture.
