Chinese cuisine has had a deep impact on culinary traditions in Southeast Asia where the lack of certain ingredients and access to new ingredients along with the culinary knowledge of local people led Chinese migrants to modify traditional dishes and to invent new foods. This process brought the cuisine of southern China, considered by some writers to be the finest in the world, into contact with a wide range of local and global cuisines and ingredients. When Chinese from Southeast Asia moved on to other parts of the world, they brought these variants of Chinese food with them, completing a cycle of culinary reproduction, localization and invention, and globalization. The process does not end there for the new context offers yet another set of ingredients and culinary traditions and the embedding and fusing of foods continues, creating additional hybrid forms. Written by scholars whose deep familiarity with Chinese cuisine is both personal and academic, *Chinese Food and Foodways in Southeast Asia and Beyond* is a book that anyone who has been fortunate enough to encounter Southeast Asian food will savour and it provides a window on this world for those who have yet to discover it. **The Oxford Companion to Food** Alan Davidson, 2014 the best food reference work ever to appear in the English language, read it and be dazzled. Bee Wilson, *New Statesman*. First published in 1999, the ground-breaking *Oxford Companion to Food* was an immediate success and won prizes and accolades around the world. Its blend of serious food history, culinary expertise and entertaining serendipity was and remains unique. Interest in food, cooking and the culture surrounding food has grown enormously in the intervening period as has the study of food and food history. University departments, international societies and academic journals have sprung up dedicated to exploring the meaning of food in the daily lives of people around the world, alongside an ever-increasing number of articles, books, programmes and websites in the general media devoted to the discussion of food, making the *Oxford Companion to Food* more relevant than ever. Already a food writing classic, this Companion combines an exhaustive catalogue of foods, be they biscuits named after battles, divas or revolutionaries, body parts from nose to tail, toe to cerebellum, or breads from the steppes of Asia or the well-built ovens of the Mediterranean, with a richly allusive commentary on the culture of food expressed in literature and cookery books or as dishes peculiar to a country or community. While building on the Companion's existing strengths, Tom Jaine has taken the opportunity to update the text and alert readers to new perspectives in food studies. There is new coverage of attitudes to food consumption, production and perception such as food and genetics, food and sociology and obesity. New entries include terms such as convenience foods, drugs and food, Ethiopia, leftovers, medicine and food, pasta and many more. There are also new entries on important personalities who are of special significance within the world of food, among them Clarence Birdseye, Henri Nestlé and Louis Pasteur. In its new edition, the Companion maintains its place as the foremost food reference resource for study and home use. *Southeast Asia* Jeremy Atiyah, 2002 The Rough Guides series contain full color photos, three maps in one and
