of electric taxi carts The swarm here however is considerably smaller and less menacing Drivers park in the nine story cliff side garage on the village edge and from the garage loading bays telephone hotels for pickup Visitors arriving by train must bus in from Brig or Visp Guests here split into two distinct camps OCo those who ve come for the small resort exclusivity and those who ve come for the big mountain recreation Both camps enjoy the views from the Allalin where the world s highest revolving restaurant the Drehrestaurant Metro Alpin does a full rotation each hour Steps away adventurers stroll through the largest ice pavilion in the world the Mittelallalin Eispavillon a cave carved out of the glacier and embellished with sculptures and a chapel At the heart of the Alps lies Switzerland at the heart of Switzerland lies the Jungfrau region and at the heart of the Jungfrau lies Interlaken Tucked away in what is arguably the most spectacular Alpine scenery in the world Interlaken enjoys renown for its diversity of outdoor adventures and its role as the Jungfrau region s mountain transportation hub It s an inviting town OCo a busy bustling place with back alleys few tourists take time to explore These are just a few of the Swiss gems explored in this guide equivalent to 160 print pages and loaded with detail on all the restaurants hotels shops and activities you ll want to know about Plus there are maps and photos throughout This is an excerpt from the much larger Adventure Guide to the Alps which runs 500 pages in print and covers the German French Austrian and Italian Alps as well

The Laboratory of Progress Joseph Jung,2022-07-29 The Laboratory of Progress Switzerland in the 19th Century tells the improbable story of how a small backward mountainous agricultural country with almost no raw materials became an industrial powerhouse a hub of innovation a touristic mecca and a pioneer in transportation all in the course of a single century That a tiny landlocked country should become a dominant steamship builder for the rest of the world that a country that had never seen a cotton plant should become the world s second largest textile producer that a country with hardly any level terrain should come to boast the world s most highly developed railway network and that a country whose main export

was impoverished emigrants should be transformed into one of the world's major financial centres these astonishing developments among many others are explored and explained both through the specific stories of individual innovators and through a prescient analysis of the political economic societal and cultural structures that formed the context in which Switzerland's astonishing transformation took place The book is a compelling read both for professional historians and for general readers with an interest in Switzerland it highlights the roles of transport networks and individual pioneers in industrial and political development
