## **South Africa And The Logic Of Regional Cooperation:**

*South Africa and the Logic of Regional Cooperation* James J. Hentz, 2005 Examines South Africa's role in regional political economy since its transition to democracy

**The Geopolitics of Regional Power** Sören Scholvin, 2016-03-09 In the last two decades various states from the Global South have emerged as important players in international relations. Most popular among them is China. Brazil, India, and South Africa have also taken essential roles in global and regional politics. Compared to traditional great powers, they can be labelled regional great powers or regional powers because their influence is with the exception of China concentrated on their neighbourhood. The impact of regions meaning the impact of geography on the economics and politics of regional powers is surprisingly understudied. This book analyses how geographical conditions influence the regional economics and politics of South Africa, allowing the author to delineate its region of influence.

*The Politics of Economic Power in Southern Africa* Ronald T. Libby, 2014-07-14 This book questions the notion that South Africa can exert effective political leverage over its economically dependent neighbors while itself remaining free of regional influences. Originally published in 1987, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

**China Among Unequals: Asymmetric Foreign Relationships In Asia** Brantly Womack, 2010-05-20 China Among Unequals presents asymmetry theory, a new paradigm for the study of international relations derived from China's relationships with its neighbors and the world. The first collection of its kind, it brings together key writings on the theory and its applications to China's basic foreign policy, particularly towards the United States and the rest of Asia. Starting with an exploration of the general theory of asymmetry, with particular attention given to such topics as human rights, soft power, regionalism, and asymmetric wars, the book then moves on to the fundamentals of China's external relations, looking at the complexities created by its scale and broad range of neighbors. Traditional imperial relationships are analyzed as well as China's more recent emphasis on multipolarity. The third section deals with US-China ties, China's most important relationship and the only one in which it is in the more vulnerable position. The final section treats in detail the relationships between China and its Asian neighbors, including Southeast Asia and the complicated multilateral situations of Korea and Taiwan.

**The Southern African Development Community (SADC) and the European Union (EU)** Johannes Muntshick, 2017-10-09 This book explores regionalism in the Southern African Development Community (SADC) and highlights the influence of the European Union (EU) as an extra-regional actor on the organization and integration process. The analysis is guided by theory and explains the emergence, institutional design, and performance of SADC's major integration projects in the issue areas of the economy, security, and

infrastructure It provides in this way a profound assessment of the organization as a whole The study shows that South Africa plays a regional key role as driver for integration while external influence of the EU is ambivalent in character because it unfolds a supportive or obstructive impact The author argues that the EU gains influence over regional integration processes in the SADC on the basis of patterns of asymmetric interdependence and becomes a game changer insofar as it facilitates or impedes solutions to regional cooperation problems Routledge Handbook of African Security James Hentz, 2013-08-22

This new Handbook examines the issues challenges and debates surrounding the problem of security in Africa Africa is home to most of the world's current conflicts and security is a key issue However African security can only be understood by employing different levels of analysis the individual human security the state national state security and the region regional international security Each of these levels provides analytical tools for understanding what could be called the African security predicament and these debates are animated by the new security issues immigration small arms transfers gangs and domestic crime HIV AIDS transnational crime poverty and environmental degradation African security therefore not only presents concrete challenges for international security but provides a real world context for challenging conventional conceptions of security Drawing together contributions from a wide range of key thinkers in the field the Routledge Handbook of African Security engages with these debates and is organized into four parts Part I The African security predicament in the twenty first century Part II Understanding conflict in Africa Part III Regionalism and Africa Part IV External influences This Handbook will be of great interest to students of African politics human security global security war and conflict studies peacebuilding and IR in general *China's Regional Relations in Comparative Perspective* Steven F. Jackson, 2018-02-06 China's relations with its neighbors have evolved since 1949 and in the 21st century many scholars argue that China's rising power has led it to be increasingly domineering over those smaller countries in Northeast Southeast Central and South Asia The evolution of China's regional relations needs to be examined comprehensively since China counts twenty seven countries as its neighbors large and small While China's official policy toward all of these countries is to treat them as good neighbors and partners some of these relationships have been spectacularly deteriorating while others have been quietly improving over the last two decades Jackson takes a comparative foreign policy approach and compares China's status as a regional hegemon with the United States Russia India Brazil South Africa and Nigeria The result is a broader theory as to why regional powers are sometimes intimidating and at other times accommodating An important contribution to studies on China this book will prove useful to scholars and students in Chinese and Asian foreign policy comparative foreign policy and international relations **Regional Powers and Regional Orders** Nadine Godehardt, Dirk Nabers, 2011-05-12 *Regional Powers and Regional Orders* presents a re examination and re conceptualization of the concept of region and its function within power and order systems Utilising a comparative and case study approach the volume examines new regional powers such as Brazil China India Russia and South Africa These territories as regional powers are novel phenomenon in the

field of international politics and even more so in the field of international relations The book focuses on the emerging role of these new regional powers within their respective region and asks how other members of these regions cope with and react to that role Regional Powers and Regional Orders will be of interest to students and scholars of international and regional politics and power and international relations      Regionalism and Uneven Development in Southern Africa Fredrik Söderbaum,Ian Taylor,2018-05-08 This title was first published in 2003 This volume advances our understanding of how Southern Africa is currently being reconfigured critically examining what has been marketed as the flagship of the Spatial Development Initiative programme in Southern Africa the Maputo Development Corridor MDC By examining a variety of cross cutting levels of governance and development and by focusing on the nexus between the formal and informal processes that stake out the MDC this volume contributes to a detailed understanding of what is perhaps the most important current experiment in regionalism in Africa By engaging regional processes on the micro level and on the ground there is a special emphasis on how local communities regard and respond to the Corridor initiative All chapters in the volume are the result of extensive fieldwork in both Mozambique and South Africa and the contributions are drawn from the region and beyond including Botswana Mozambique Zimbabwe South Africa Sweden and the United States      Geopolitics Bert Chapman,2011-04-07 This concise introduction to the growth and evolution of geopolitics as a discipline includes biographical information on its leading historical and contemporary practitioners and detailed analysis of its literature An important book on a topic that has been neglected for too long Geopolitics A Guide to the Issues will provide readers with an enhanced understanding of how geography influences personal national and international economics politics and security The work begins with the history of geopolitics from the late 19th century to the present then discusses the intellectual renaissance the discipline is experiencing today due to the prevalence of international security threats involving territorial airborne space based and waterborne possession and acquisition The book emphasizes current and emerging international geopolitical trends examining how the U S and other countries including Australia Brazil China India and Russia are integrating geopolitics into national security planning It profiles international geopolitical scholars and their work and it analyzes emerging academic military and governmental literature including gray literature and social networking technologies such as blogs and Twitter      **Transforming Violent Political Movements** Kevin E. Grisham,2014-03-21 This book explores the factors that influence violent rebellious political organisations to transform into other entities such as political parties criminal organisations and terrorist organisations From the end of the Second World War until 1990 many events in the world centred on the bipolar struggle between the United States and the USSR Although there were numerous civil wars occurring during the Cold War era many of these conflicts went virtually unnoticed unless they were linked to the Cold War struggle for ideological dominance In the aftermath of the fall of the Soviet Union the number of intra state conflicts was prevalent around the globe Along with the occurrence of civil wars a variety of violent political movements also

developed Examining cases from Latin America Africa Europe and Asia this book addresses how violent political movements transform during and after conflict into new types of organisations using the collective political violence transformative CPVT model The study uses a combination of pre existing literature from the fields of sociology and political science archival research and interviews with movement members former and active conducted by the author In studying the Provisional IRA and Sinn F in the Spear of the Nation MK and the African National Congress ANC the Abu Sayyaf Group and the Revolutionary Armed Forces of Colombia FARC EP Transforming Violent Political Movements paints a picture of organisations that have to respond to their environments to survive This book will be of much interest to students of political violence terrorism war and conflict studies security studies and IR

Interregionalism across the Atlantic Space Frank Mattheis,Andréas Litsegård,2017-09-26 This book focuses on interregional relations across the Atlantic and the possible evolution of a new distinctive Atlantic space for international relations It provides a comprehensive insight into the overlapping linkages of interregionalism in the wider Atlantic space Additionally it raises the question of relevance currently the main question in this field of research Is interregionalism important because it brings about something new that really matters or is it simply a perhaps unavoidable by product of regionalism The book conducts an analysis of six interregional relations criss crossing the Atlantic space accounting for the multitude of interregional connections within a potential Atlantic macro region and analysing the differences conflicts and convergences between regional organizations It engages with the issue of agency in interregional relations and argues that interregional processes and agendas are always driven and constructed by certain actors for certain purposes

*Plural International Relations in a Divided World* Stephen Chan,2017-02-27 The world is troubled and full of misunderstandings It seems a new world order of fundamentalist violence and meaningless atrocity is upon us whilst civilised instruments for cooperation and compromise are becoming increasingly ineffective In this timely book Stephen Chan explores the historical and philosophical roots of difference and discord in the international system He begins with the introduction of the Westphalian system showing how throughout the 20th century new states from the Middle East Asia and Africa entered that system with reservations preconditions and great efforts to introduce new forms of concerts and congresses but without seriously challenging the international status quo By contrast the 21st century has brought turmoil and change in the form of militant Islam be it the Taleban Al Qaeda or ISIS whose varied roots and fluid emergence have so far prevented the West from being able to understand and combat it Developing Kissinger s suspicion of Saudi Arabia as an Islamic state in Westphalian dress Chan argues that what is at stake today is not the development of a new Caliphate or an old radicalism but the effort to supplant and replace the Westphalian system itself This is the complex and challenging reality to which a truly modern and persuasively relevant plural international relations must now adapt Whether it can do so remains to be seen

**Globalising the Regional, Regionalising the Global:**

**Volume 35, Review of International Studies** Rick Fawn,2009-04-30 A collection of leading international scholars examine

the concept of regions from a range of perspectives and assess leading contemporary examples *The Politics of Memory in Post-Authoritarian Transitions, Volume One* Joanna Marszałek-Kawa, Joanna Piechowiak-Lamparska, Anna Ratke-Majewska, 2017-01-06 History is a powerful tool in the hands of politicians and can be a destructive weapon since power over the past is the power to decide who is a hero and who is a traitor Tradition the memory of ancestors and the experience of previous generations are the keys that unlock the door to citizens minds and allow certain ideas visions and political programs to flourish However can history be a proper political weapon during democratisation processes when the past is clearly separated from the present Are the new order and society founded on the basis of some interpretation of the past or rather are they founded only with reference to the imagined future of the nation This book explores such questions through a detailed description of the use of remembrance policies during political transformations It discusses how interpretations of the past served the accomplishment of transitional objectives in countries as varied as Chile Estonia Georgia Poland South Africa and Spain The book is a unique journey through different parts of the world different cultures and different political systems investigating how history was remembered and forgotten by certain democratic leaders Individual chapters discuss how governments remembrance policies were used to create a new citizen to change a political culture and to justify the vision of the society promoted by the new elites They explain why some difficult topics were avoided by politicians and why sometimes there was no transitional justice or punishment of the leaders of the authoritarian state The book will be of interest to anyone wishing to explore policies of remembrance democratisation and the role of memory in contemporary societies *Politics and Pan-Africanism* Dawn Nagar, 2019-12-12 Offering an examination of the diplomatic and economic regional power structures in Africa and their relationships with each other Dawn Nagar discusses the potential and future of pan Africanism The three primary regional economic communities RECs that are recognised by the African Union as the key building blocks of a united Africa are examined these are the Common Market for Eastern and Southern Africa COMESA the East African Community EAC and the Southern African Development Community SADC These RECS include Africa s major economies Egypt South Africa and Kenya but are also home to Africa s most conflict prone and volatile states the Democratic Republic of the Congo DRC Burundi South Sudan Somalia and Lesotho Providing a detailed overview of the current relationship between these power blocs this book provides insight into the current state of diplomatic and economic relations within Africa and shows how far there is to go for a future of Pan Africanism Regional Integration in the Global South Sebastian Krapohl, 2016-11-23 This book presents a theory of economic integration in developing regions where the level of intraregional economic interdependence is low and the dependence on extra regional economic relations is high It argues that the success or failure of regional integration in the Global South is to a large degree dependent on the reaction of extra regional actors in Europe North America and Northeast Asia In doing so it demonstrates that longstanding European integration theories cannot be successfully applied to other world regions where economic conditions are

fundamentally different By providing detailed empirical analyses that are systematic in their use of a common theoretical and methodological framework the authors fill a significant lacuna in our understanding of these issues This edited volume will appeal to students and scholars of comparative regionalism area studies and global governance *Africa's Development Impasse* Doctor Stefan Andreasson, 2013-07-04 Orthodox strategies for socio economic development have failed spectacularly in Southern Africa Neither the developmental state nor neoliberal reform seems able to provide a solution to Africa s problems In *Africa s Development Impasse* Stefan Andreasson analyses this failure and explores the potential for post development alternatives Examining the post independence trajectories of Botswana Zimbabwe and South Africa the book shows three different examples of this failure to overcome a debilitating colonial legacy Andreasson then argues that it is now time to resuscitate post development theory s challenge to conventional development In doing this he claims we face the enormous challenge of translating post development into actual politics for a socially and politically sustainable future and using it as a dialogue about what the aims and aspirations of post colonial societies might become This important fusion of theory with empirical case studies will be essential reading for students of development politics and Africa **Power, Space, and Time** J. Patrick Rhamey Jr., Tadeusz Kugler, 2020-01-24 Undergraduate students in most preliminary courses in international politics are introduced to realist liberal and constructivist approaches supplementing this theoretical introduction with conceptual discussions of the state international system and or decision making and policy formation By the end of their college experience undergraduate IR majors will engage coursework more narrowly focused on an empirical outcome such as war economic integration development or migration These advanced courses are directly linked to modern research agendas and graduate level course material usually with few references to the theoretical paradigms taught in introductory classes This volume seeks to bridge the gap between what is taught in early undergraduate education and what is created by scholars uniting abstract theoretical principles with practical contemporary policy and testable empirical questions *Failed and Failing States* Raj Bardouille, Margaret Grieco, 2010-01-08 State collapse is one of the major threats to peace stability and economic development in sub Saharan Africa today In a collapsed state the regime finally wears out its ability to satisfy the demands of the various groups in society it fails to govern or to keep the state together The collapse is marked by the loss of control over political and economic space A collapsed state can no longer perform its basic security and development functions and has no effective control over its territory and borders Efforts to avoid drawing other nations into a wider conflict created by the collapse of a state and creating favorable conditions for reconciliation and reconstruction of a failed state after it has collapsed present major challenges In April 2008 the Cornell Institute for African Development called a symposium on *Failed and Failing States in Africa Lessons from Darfur and Beyond* to address these critical issues Key contributions to the symposium are brought together in this volume Taken together these essays represent a significant discussion on the challenges presented by the presence of failing states within Africa
