Southeast Asia Sociology Of Developing Societies Paperback By Taylor:

The Sociology of Southeast Asia Victor T. King, 2008 One of the main problems faced by teachers and students who have a scholarly interest in Southeast Asia is the lack of general user friendly texts in the social sciences The absence of an introduction to the sociology of Southeast Asia is especially unfortunate This volume attempts to meet these needs This is then the first sole authored introductory sociology text on Southeast Asia that focuses on change and development in the region provides an overview of the important sociological and political economy writings and considers the key concepts and themes in the field since 1945 Some multiauthored works do exist but these either are outdated or focus on specialized topics Aimed primarily at undergraduates up to the final year it will also be a useful reference work for post graduates and researchers who lack such a general work

Tracks and Traces Philip Hirsch, Nicholas Tapp, 2010 This volume traces the threads that tie together an understanding of Thailand as a dynamic and rapidly changing society through an examination of the work of one major scholar of the country Andrew Turton Turton's anthropological studies of Thailand cover a wide spectrum from politics and economy to ritual and culture and have been crucial in shaping evolving understandings of Thai society In this collection ten leading specialists on Thailand from a variety of disciplines critically consider aspects of Turton's work in relation to the changing nature of different aspects of Thai society The book tracks the links between past and present scholarship examines the contextuality of scholarship in its times and sheds light on the current situation in Thailand

Liberation from Liberalization Rokhsana Bahramitash, 2013-07-18 Liberation from Liberalization challenges the neo liberal claim that free market policies bring prosperity and economic development Bahramitash focuses particularly on Southeast Asia where expansion of free markets has led to high GNP per capita growth over the past few decades Focusing on this region the book examines the economic policies adopted in Taiwan Indonesia and the Philippines Drawing upon state centred theories the author argues that limiting the role of the state has been responsible for growing poverty especially among women Seventy percent of those earning less than a dollar a day are women and poverty among rural women is growing much faster than it is among men In order to reverse economic liberalization the state has to be brought back into the economy as a major player and become responsible for providing welfare for its citizens This volume argues in favour of a system that incorporates women's groups into the decision making process of the state while ensuring that the state remain both transparent and subject to the political advocacy of its citizens Bahramitash argues that ultimately the only way to stop liberalization which is trapping millions in poverty is to limit the role of markets through an elected and responsible state with embedded members of civil society such as women's groups
