Thailand is exceptional among modern states in Asia in that it has built and retained a national culture around a traditional monarchical institution Moreover this culture has also been based on a dominant religious tradition that of Theravada Buddhism The process of creating the modern nation state of Thailand out of the traditional Buddhist kingdom of Siam began in the nineteenth century when the rulers of Siam confronted with increasing pressure from the colonial powers of Britain and France were able to preserve their country's independence by instituting revolutionary changes that established the authority of a centralized bureaucracy throughout the country The new state asserted its authority not only over Siamese who lived in the core area of the old kingdom but also over large numbers of Lao Yuan or Northern Thai Khmer Malays tribal peoples and other groups all of which had previously enjoyed relative autonomy and over the sizable immigrant Chinese population which was assuming an increasingly significant role in the economy Because the rulers of the Siamese state strove to incorporate these diverse peoples into a Thai national community how this community should be defined and what type of state structure should be linked with it have been dominant questions in modern Thai history Significant tensions have arisen from the efforts by members of the Thai elite to make the monarchical traditions of the Bangkok dynasty Buddhism and the central Thai language basic to Thai national culture Other tensions have arisen as monarchy military bureaucracy the Buddhist sangha business interests and elected political representatives assert or maintain an authoritative position in the state structure This book examines these tensions with reference to the major changes that have taken place in Thai society economy polity and culture in the twentieth century especially since World War II The Cambridge History of Southeast Asia: Volume 2, The Nineteenth and Twentieth Centuries Nicholas Tarling, 1992 Southeast Asia has long been seen as a unity although other terms have been used to describe it Further India Little China the Nanyang The region has had a protracted maritime history Confucianism Buddhism Islam Hinduism Christianity are all represented It has seen a quintet of colonial powers Britain France The Netherlands Spain the United States Most recently it has become one of the fastest growing parts of the world economy The very term Southeast Asia is clearly more than a geographical expression The Cambridge History of Southeast Asia is a multi-authored treatment of the whole of mainland and island Southeast Asia from Burma to Indonesia Unlike other histories of the region it is not divided on a country by country basis and is not structured purely chronologically but rather takes a thematic and regional approach to Southeast Asia's history This volume the second and final in the series takes us into the nineteenth and twentieth centuries from the late eighteenth century of the Christian

era when most of the region was incorporated into European empires to the complexity and dramatic change of the post World War II period It covers the economic and social life as well as the religious and popular culture of the region as they develop over two centuries The political structures of the region are also closely examined from the insurgencies and rebellions of early this century to the modern Nationalist movements which challenged the control of the colonial powers and led to the formation of independent states Under the editorship of Nicholas Tarling Professor of History at the University of Auckland New Zealand each chapter is well integrated into the whole Professor Tarling has assembled a highly respected team of international scholars who have presented the latest historical research on the region and succeeded in producing a provocative and exciting account of the region s history

The Cambridge History of Southeast Asia: From early times to c. 1800 Nicholas Tarling,1992 The Cambridge History of Southeast Asia is a multi authored treatment of the whole of mainland and island Southeast Asia from Burma to Indonesia Unlike other histories of the region it is not divided on a country by country basis and is not structured purely chronologically but rather takes a thematic and regional approach to Southeast Asia s history aiming to present the current state of historical research on Southeast Asia as well as stimulating further thought and investigation Publisher description

Forest Monks and the Nation-state J. L. Taylor,1993 This book is a detailed study on the ascetic forest monk tradition in the Lao speaking provinces of northeastern Thailand in the wake of the early twentieth century politico religious reforms The narrative alternates between the periphery and the capital dealing with historic transformations and persistencies in the social field of wandering forest monks as well as the contemporary impact of this monastic tradition in the wider social and political milieu The writer uses original ethnographic materials and provides a rare insight into the formation of monastic lineages and the local politico religious histories of present day northeastern Thailand

Leadership in a Slum Alan R. Johnson,2010-04-01 In Leadership in a Slum Johnson looks at leadership in the Thai social context from a different angle than traditional studies that measure well educated Thais on leadership scales derived in the West Seeking a cultural account of social influence processes he turns to those who have been left behind in the race to participate in a globalizing world the urban poor Using both systematic data collection and participant observation he develops a culturally preferred model as well as a set of models based in Thai concepts that reflect on the ground realities Johnson also examines the community state relationship and finds that in the face of state power that brings both development and the forces of eviction the community and its leaders are not passive in this relationship but modify reject or resist state views in their various forms He concludes by looking at the implications of his anthropological approach for those who are involved in leadership training in Thai settings and beyond This work challenges the dominance of the patron client rubric for understanding all forms of Thai leadership and offers an alternative view for understanding leadership rooted in local social systems to approaches that

assume the universal applicability of leadership research findings across all cultural settings *Thailand* David K.
