Southeast Asia The Information Age E 199:

Violent Extremism: What Was Learnt, Where We Are, And What's Next Keng Yong Ong, Damien Dominic Eng Hoe Cheong, 2025-05-05 This meticulously crafted book features contributions from experts who explore the key phases of violent extremism Divided into three comprehensive sections the first examines the shifting threat landscape over the past two decades The second section offers an in depth analysis of the current threat while the final part delves into the evolving nature of extremism and the emerging challenges it presents It also integrates a critical counterterrorism perspective Commemorating the 20th anniversary of the International Centre for Political Violence and Terrorism Research ICPVTR a specialist center within the S Rajaratnam School of International Studies RSIS at Nanyang Technological University Singapore this timely publication provides essential insights in the face of the growing global terrorism threat **Public Administration in Southeast Asia** Evan M. Berman, 2017-09-25 While public administration practice and education in general has become considerably professionalized in the last decade existing knowledge on public administration in Southeast Asia is fragmented at best and often devoid of a useful reference While journal articles and government reports provide decentralized information Public Administration in Southeast Asia Thailand Philippines Malaysia Hong Kong and Macao takes a comprehensive and comparative look at the major components of administration systems The selection of countries and regions included reflects the diversity of Southeast Asia Organized by Country The handbook fills a critical need by bringing together leading scholars who provide an insider perspective and viewpoint on essential and advanced issues Divided into five sections each dedicated to a particular country the text outlines topics relevant to modern public administration including History and Political Context of Public Administration Decentralization and Local Governance Public Ethics and Corruption Performance Management Reforms Civil Service System Focusing on recent developments in public administration in these countries which are among the fastest growing economies in the world the book explores their practices and innovative approaches in public administration For many years people have been fascinated by the cultures peoples and governments of Southeast Asia and now they have a book that discusses the apparatus of government in Southeast Asia their agencies contexts processes and values The Digital Origins of Dictatorship and Democracy Philip N. Howard, 2010-09-02 Around the developing world political leaders face a dilemma the very information and communication technologies that boost economic fortunes also undermine power structures Globally one in ten internet users is a Muslim living in a populous Muslim community In these countries young people are developing political identities online and digital technologies are helping civil society build systems of political communication independent of the state and beyond easy manipulation by cultural or religious elites With unique data on patterns of media ownership and technology use The Digital Origins of Dictatorship and Democracy demonstrates how since the mid 1990s information technologies have had a role in political transformation Democratic revolutions are not caused by new information technologies But in the Muslim world

democratization is no longer possible without them **Southeast Asian Responses to Globalization** Francis Loh Kok Wah, 2003-08-01 It is now apparent especially in the aftermath of the regional financial crisis of 1997 that globalization has been impacting upon the Southeast Asian economies and societies in new and harrowing ways a theme of many recent studies Inadvertently these studies of globalization have also highlighted that the 1980s and 1990s debate on democratization in the region which focused on the emergence of the middle classes the roles of new social movements NGOs and the changing relations between state and civil society might have been overly one dimensional This volume revisits the theme of democratization via the lenses of globalization understood economically politically and culturally Although globalization increasingly frames the processes of democracy and development nonetheless the governments and peoples of Southeast Asia have been able to determine the pace and character even the direction of these processes to a considerable extent This collection of essays by some distinguished senior scholars and other equally perceptive younger ones focuses on this globalization democratization nexus and shows empirically and analytically how governance is being restructured and democracy sometimes deepened in this new global era A historical review introduces the volume while an analytical assessment of the ten case studies concludes it *Popular Culture Co-Productions and Collaborations in East and Southeast Asia* Eyal Ben-Ari, Nissim Otmazgin, 2012-10-01 This wide ranging volume is the first to examine the characteristics dynamics and wider implications of recently emerging regional production dissemination marketing and consumption systems of popular culture in East and Southeast Asia Using tools based in a variety of disciplines organizational analysis and sociology cultural and media studies and political science and history it elucidates the underlying cultural economics and the processes of region wide appropriation of cultural formulas and styles Through discussions of Japanese Chinese Korean Philippine and Indonesian culture industries the authors in the book describe a major shift in Asia s popular culture markets toward arrangements that transcend autonomous national economies by organizing and locating production distribution and consumption of cultural goods on a regional scale Specifically the authors deal with patterns of co production and collaboration in the making and marketing of cultural commodities such as movies music comics and animation The book uses case studies to explore the production and exploitation of cultural imaginaries within the context of intensive regional circulation of cultural commodities and images Drawing on empirically based accounts of co production and collaboration in East and Southeast Asia s popular culture it adopts a regional framework to analyze the complex interrelationships among cultural industries This focus on a regional economy of transcultural production provides an important corrective to the limitations of previous studies that consider cultural products as text and use them to investigate the meaning of popular culture Globalisation and the New Terror David Martin Jones, 2004-01-28 Examines trends in new terror understood here to be the capacity of sub state actors to secure religious or politically motivated objectives by violent means Argues that while the use of violence to achieve political ends is scarcely original what distinguishes new terror is its potential for

lethality Australian author Exploring the Digital Frontier Anne Woodsworth,2010-12-02 This volume presents international research and exhaustive reviews of literature on a range of issues related to the evolving digital environment With the growing trend for digital only access to information this volume makes an important contribution in both highlighting problems and challenges and pointing to pathways for future solutions Global Library and Information Science Ismail Abdullahi,2017-11-07 This 2nd edition of the highly successful Global Library and Information Science presents an up to date review of international librarianship and library science through insightful and well written chapters contributed by experts and scholars from all regions of the world The role of public academic special school libraries as well as library and information science education are presented from the early development to the present time Its lively readable approach will help the reader to understand librarianship in Africa Asia Australia and New Zealand Europe Latin America and the Caribbean and North America Edited by Ismail Abdullahi Professor of Global Library and Information Science this book is a must read by library science students and teachers librarians and anyone interested in Global Librarianship

Participation and the Quality of Environmental Decision Making F. Coenen,D. Huitema,Laurence J. O'Toole Jr.,2012-12-06 It is clear that our society must become a more sustainable one To that end we must change both our production and our consumption patterns Some argue that this implies the abolition of democratic processes and thus of citizens participation in environmental policy Others argue the opposite the only way to avoid impending environmental disaster is by engaging in common deliberation and contemplation Is participation then a negative force or not This volume is one of the first coordinated attempts to study the relationship between democratic participatory forms of decision making and the quality of environmental decisions The central question is how can the normatively desirable practice of participatory decision making be combined with an effective approach to environmental issues Guided by a theoretical introduction by the editors the 15 chapters deal with topics ranging from the scale of environmental problems local agenda 21 infrastructural decisions strategic planning to environmental policy in developing countries Three chapters are devoted to each of these broad themes Each presents either a theoretical or an empirical argument about the central research question shedding light on such issues as the measurement of decision quality participation techniques and the link between participation and decision quality drawing on experience gained in Europe North and South America Asia and Africa The introductions to the individual parts of the book have been collectively written by the contributors who represent a range of professional disciplines including political science public policy and planning *Philippine Security in the Age of Terror* Rommel Banlaoi,2009-10-13 As the twelfth most populous nation the Philippines diverse religious and ethnic population makes it an ideal example of the changing tenet of what is deemed national security post 9 11 Issues previously considered social or public are now viewed as security issues Food production is now analyzed in the context of food security and environmental

Digital Democracy Barry N. Hague,Brian D Loader,2005-06-27 Digital Democracy considers how technological

developments might combine with underlying social economic and political conditions to produce new vehicles for democratic practice The growth of new Information and Communication Technologies ICTs such as the Internet alongside growing concerns about the failure of advanced societies to live up to the democratic idea has produced much interest in the prospects for a digital democracy This book will provide invaluable reading for those studying social policy politics and sociology as well as for policy analysts social scientists and computer scientists

Childhood and Adolescence Uwe P. Gielen, Jaipaul L. Roopnarine, 2016-01-11 This comprehensive reference analyzes psychological and anthropological studies concerning child and adolescent development across cultures digging into often forgotten topics like street children child soldiers and parenting in war torn countries Traditionally research on child and adolescent development has focused on American youth inadvertently neglecting 96 percent of the world's children This all encompassing volume introduces global perspectives on young people across the globe focusing on such topics as parenting and childcare gender roles violence against girls adolescence in poor and rich countries and developmental psychopathology across cultures Recently updated the second edition includes the latest findings in the field additional content and new photos and charts With contributions from leading psychological and anthropological scholars chapters address worldwide changes in children's lives parent child relationships sibling relationships immigrant children and their families and adolescents in both industrialized and developing nations A special section discusses children living in difficult circumstances including street children child soldiers global nomads and children suffering from various internalizing and externalizing disorders This book is the perfect introduction to the latest trends in developmental psychology

Travellers, Merchants and Settlers in the Eastern Mediterranean, 11th-14th Centuries David Jacoby, 2023-05-31 This collection of studies the eighth by David Jacoby covers a period witnessing intensive geographic mobility across the Mediterranean illustrated by a growing number of Westerners engaging in pilgrimage crusade trading and shipping or else driven by sheer curiosity This movement also generated western settlement in the eastern Mediterranean region A complex encounter of Westerners with eastern Christians and the Muslim world occurred in crusader Acre the focus of two papers a major emporium it was also the scene of fierce rivalry between the Italian maritime powers The fall of the crusader states in 1291 put an end to western mobility in the Levant and required a restructuring of trade in the region The next five studies show how economic incentives promoted western settlement in the Byzantine provinces conquered by western forces during the Fourth Crusade and soon after Venice fulfilled a major function in Latin Constantinople from 1204 to 1261 The city's progressive economic recovery in that period paved the way for its role as transit station furthering western trade and colonization in the Black Sea region Venice had also a major impact on demographic and economic developments in Euboea located along the maritime route connecting Italy to Constantinople On the other hand military factors drove an army of western mercenaries to establish in central Greece a Catalan state which survived from 1311 to the 1380s

Expanding Ecological Approaches to Language, Culture, and Identity Jaran

Shin,2023-12-22 This book explores the process of identity re construction among mixed heritage children within the context of globalization through the lens of its intersection with Korean society The volume illustrates how these multicultural children mediate hybrid social spaces and examines their personal approaches toward translating resisting and transforming the entanglements engendered in those spaces By tracing the trajectories of their identity re formations over several years the book details the paths these youths have taken to navigate diverse contact zones and cope with institutional regulatory mechanisms It highlights that in the face of prevailing social stigma they actively involve themselves in political action in their day to day lives they redefine what it means to be Korean and but multicultural challenge simplistic membership boundaries and develop unique strategies to resist and subsist These efforts to question the essentialist logic of authenticity demonstrate that these youths situated at the convergence of globalization migration inequality and political power represent a challenge to both national and global orders Arguing that ecological perspectives need to direct greater attention toward the political as well as the posthumanist dimensions of language culture and identity this book is key reading for scholars in applied linguistics intercultural communication and Asian studies **Immigrant Life in the US** Donna R. Gabaccia,Colin Wayne Leach,2004-03 Contributors from the fields of sociology anthropology history and women s studies focus on the everyday social interactions that makeschools workplaces and neighbourhoods sites of cultural creativity transformation and resistance **Cultures of Disaster** Greg Bankoff,2003 Explores the relationship between environment and culture in the contemporary Philippines The book will be of interest to those engaged in relief policy and administration in developing countries Governing Universities in Post-Soviet Countries Peter D. Eckel,2023-10-19 University governance is an essential but complex phenomenon even in countries where institutional level governance has a long and strong tradition After the dissolution of the USSR each of the 15 former Soviet countries developed their own university governance system and this groundbreaking book explores how these countries evolved from the common start of a unified and tightly controlled higher education system to shaping their own paths in higher education Each chapter explores a different country allowing university governance models to be compared and contrasted The countries provide examples of a variety of different governance models state extended academic focused internal external and civic and the book highlights the advantages and disadvantages of each relative to their context It also presents innovative frameworks to understand governance effectiveness in terms of autonomy competition and capacity It is essential reading for researchers students and policy makers This title is also available as open access on Cambridge Core **Thinking Globally** Mark Juergensmeyer,2014 In this accessible text Mark Juergensmeyer a pioneer in global studies provides a comprehensive overview of the emerging field of global studies from regional topical and theoretical perspectives Each of the twenty compact chapters in Thinking Globally features Juergensmeyer s own lucid introduction to the key topics and offers brief excerpts from major writers in those areas The chapters explore the history of globalization in each region of the world from Africa and the Middle East to Asia Europe

and the Americas and cover key issues in today's global era such as Challenges of the global economy Fading of the nation state Emerging nationalisms and transnational ideologies Hidden economies of sex trafficking and the illegal drug trade New communications media Environmental crises Human rights abuses Thinking Globally is the perfect introduction to global studies for students and an exceptional resource for anyone interested in learning more about this new area of study

Social Movements in the World-System Jackie Smith, Dawn Wiest, 2012-01-01

Global crises such as rising economic inequality volatile financial markets and devastating climate change illustrate the defects of a global economic order controlled largely by transnational corporations wealthy states and other elites As the impacts of such crises have intensified they have generated a new wave of protests extending from the countries of the Middle East and North Africa throughout Europe North America and elsewhere This new surge of resistance builds upon a long history of transnational activism as it extends and develops new tactics for pro democracy movements acting simultaneously around the world In Social Movements in the World System Jackie Smith and Dawn Wiest build upon theories of social movements global institutions and the political economy of the world system to uncover how institutions define the opportunities and constraints on social movements which in turn introduce ideas and models of action that help transform social activism as well as the system itself Smith and Wiest trace modern social movements to the founding of the United Nations as well as struggles for decolonization and the rise of national independence movements showing how these movements have shifted the context in which states and other global actors compete and interact The book shows how transnational activism since the end of the Cold War including United Nations global conferences and more recently at World Trade Organization meetings has shaped the ways groups organize Global summits and UN conferences have traditionally provided focal points for activists working across borders on a diverse array of issues By engaging in these international arenas movements have altered discourses to emphasize norms of human rights and ecological sustainability over territorial sovereignty Over time however activists have developed deeper and more expansive networks and new spaces for activism This growing pool of transnational activists and

organizations democratizes the process of organizing enables activists to build on previous experiences and share knowledge and facilitates local actions in support of global change agendas As the world faces profound financial and ecological crises and as the United States dominance in the world political economy is increasingly challenged it is especially urgent that scholars policy analysts and citizens understand how institutions shape social behavior and the distribution of power *Social Movements in the World System* helps illuminate the contentious and complex interactions between social movements and global institutions and contributes to the search for paths toward a more equitable sustainable and democratic world A Volume in the American Sociological Association's Rose Series in Sociology
