Southern Agriculture During The Civil War Era 1860 188:

Southern Agriculture During the Civil War Era, 1860-1880 John Otto,1994-04-30 This is the first book to assess the contribution of Southern agriculture to the Confederate war effort to describe the damage that agriculture sustained during the war to analyze the transition from slavery to free labor after the war and to recount the slow and painful process of rebuilding Southern agriculture by 1880 Synthesizing primary and secondary historical sources Southern Agriculture During the Civil War Era 1860 1880 fills a crucial gap in our knowledge about the history of the Civil War and Reconstruction period

Starving the South Andrew F. Smith,2025-08-22 A historian s new look at how Union blockades brought about the defeat of a hungry Confederacy In April 1861 Lincoln ordered a blockade of Southern ports used by the Confederacy for cotton and tobacco exporting as well as for the importation of food The Army of the Confederacy grew thin while Union dinner tables groaned and Northern canning operations kept Grant s army strong In *Starving the South* Andrew Smith takes a gastronomical look at the war s outcome and legacy While the war split the country in a way that still affects race and politics today it also affected the way we eat It transformed local markets into nationalized food suppliers forced the development of a Northern canning industry established Thanksgiving as a national holiday and forged the first true national cuisine from the recipes of emancipated slaves who migrated north On the 150th anniversary of the Battle of Fort Sumter Andrew Smith is the first to ask Did hunger defeat the Confederacy Food and Agriculture during the Civil War R. Douglas Hurt,2016-01-11 This book provides a perspective into the past that few students and historians of the Civil War have considered agriculture during the Civil War as a key element of power The Civil War revolutionized the agricultural labor system in the South and it had dramatic effects on farm labor in the North relating to technology Agriculture also was an element of power for both sides during the Civil War one that is often overlooked in traditional studies of the conflict R Douglas Hurt argues that Southerners viewed the agricultural productivity of their region as an element of power that would enable them to win the war while Northern farmers considered their productivity not only an economic benefit to the Union and enhancement of their personal fortunes but also an advantage that would help bring the South back into the Union This study examines the effects of the Civil War on agriculture for both the Union and the Confederacy from 1860 to 1865 emphasizing how agriculture directly related to the war effort in each region for example the efforts made to produce more food for military and civilian populations attempts to limit cotton production cotton as a diplomatic tool the work of women in the fields slavery as a key agricultural resource livestock production experiments to produce cotton tobacco and sugar in the North and the adoption of new implements Agricultural History University of California, Davis. Robson,Roy Vernon Scott,1979 **The Political Reconstruction of American Tobacco, 1862-1933** Patrick Mulford O'Connor,2025-06-03 A deeply researched and clearly argued account of the mutual

growth of the federal government and the modern tobacco. Nearly everything about the United States tobacco economy changed in the generation following the American Civil War. From labor to consumption, manufacturing to regulation, tobacco was utterly reconstructed, comparatively a new industry, as one contemporary wrote, *The Political Reconstruction of American Tobacco, 1862-1933* exposes the causes of these changes and in the process it reconsiders cornerstones of the American national narrative. Through a detailed rendering of tobacco's late nineteenth-century political economy, this book argues that the federal state's and American capitalism's development were mutually constitutive and fundamentally political processes. From the Civil War to the Progressive Era, diverse political movements across tobacco's commodity chain drove state and market development, creating the immense power and stifling poverty that defined tobacco's reconstruction. *The Political Reconstruction of American Tobacco, 1862-1933* emphasizes the significance of the thousands of manufacturers whose interest groups shaped federal tax policy and in turn forged a powerful and effective internal revenue system; the increasingly influential fertilizer producers and warehouse operators who determined tobacco's value; and the crop scientists who sought to promote and rationalize US tobacco production. As these actors reshaped tobacco's commodity chain, they missed and even dismissed the interests of tobacco growers, especially newly emancipated African Americans and smallholding whites throughout the South. The ruling logic of tobacco's reconstructed political economy rationalized agrarian indebtedness, justified low prices, and intensified labor discipline on thousands of small farms. In emphasizing these exclusions, *The Political Reconstruction of American Tobacco, 1862-1933* reveals how nineteenth-century state and economic development coincided with and even created rural poverty.

The United States in Central America, 1860-1911 Thomas David Schoonover, 1991 In a work of unprecedented scope, Thomas D. Schoonover combines exhaustive multicountry archival research with a sophisticated theoretical framework grounded in world systems theory to elucidate the relations between the United States and Central America in the late nineteenth and early twentieth centuries. Schoonover's archival research in Central America, Europe, and the United States encompasses public, business, organizational, and individual records. In analyzing this material, Schoonover applies a world systems theory approach with that of social imperialism and dependency theory to underscore the broad multistate dimension of international affairs. In exploring the international history of Central America, Schoonover describes the role of personalities such as John C. Frémont, Otto von Bismarck, Theodore Roosevelt, Manuel Estrada Cabrera, and Jos Santos Zelaya; the impact of railroad building and canal projects; and the role of pan-Americanism, nationalism, racism, and anti-Americanism.
