Sovereign Nations Carnal States:

Sovereign Nations, Carnal States Kam Shapiro, 2018-08-06 *Sovereign Nations Carnal States* is an extraordinarily synthetic intellectual tour de force Kam Shapiro uses the body as a lens to focus on often overlooked dimensions of modern sovereignty He provides a novel perspective on one of the most important problems in contemporary political theory the conflict between the demands of political sovereignty exemplified in the nation state and the economic and cultural dislocations of modern society It is often assumed that classical political theory conceives of the body as an instrument subordinated to a rational subject In contrast Shapiro argues that thinkers from Augustine to Hegel and Carl Schmitt have conceptualized the body as a resource to supplement standard modes of political affiliation and moral agency Drawing on critical readings of Augustine Derrida Hegel Schmitt and Benjamin Shapiro develops what he refers to as a political somatics The author is preoccupied by the way desire and habit are the conditions of possibility for meaningful political affiliation but he also shows how they constantly risk being held hostage to contingency Both he concludes are important resources for democratic politics Shapiro marshals both historical and contemporary philosophical accounts of embodiment in order to explain an important contemporary political question How is the nation state able to cohere as a functioning political unit despite internal differences and the vagaries of the market

Sovereignty and Its Other Dimitris Vardoulakis, 2013-08-01 In this new book Dimitris Vardoulakis asks how it is possible to think of a politics that is not commensurate with sovereignty For such a politics he argues sovereignty is defined not in terms of the exception but as the different ways in which violence is justified Vardoulakis shows how it is possible to deconstruct the various justifications of violence Such dejustifications can take place only by presupposing an other to sovereignty which Vardoulakis identifies with radical democracy In doing so *Sovereignty and Its Other* puts forward both a novel critique of sovereignty and an original philosophical theory of democratic practice

At the Limits of the Political Inna Viriasova, 2018-03-16 The question of the limits of the political permeates the history of western political thought and has been at the forefront of debates in contemporary political philosophy especially in French and Italian contexts This book argues that the question of radical political exteriority fell into neglect despite post War critiques of totalitarian political ontology The notion of the political developed into a new form of totality one which admits the impossibility of closure and yet refuses to let go of its totalizing ambition Viriasova addresses this problem by offering a critical introduction to the debate on the concept of the political in contemporary continental philosophy and develops an innovative perspective that allows us to rethink the limits of the political in affirmative and realist terms The book explores such recent developments as Roberto Esposito's notion of the impolitical Giorgio Agamben's concept of bare life Michel Henry's radical phenomenology of life the speculative realist philosophy of Quentin Meillassoux as well as Buddhist political thought The book makes a vital contribution to an emerging body of literature in contemporary philosophy that renews the fundamental questions of political ontology in response to the multiplying crises of inclusion that

Toward a Premodern Posthumanism Chad Augustine Córdova, 2025-04-15 Drawing on early modern French thought to free nature and aesthetics from metaphysical humanism What good is aesthetics in a time of ecological crisis *Toward a Premodern Posthumanism* Anarchic Ontologies of Earthly Life in Early Modern France shows that philosophical aesthetics contains unheeded potentialities for challenging the ontological subjection of nature to the human subject Drawing on deconstructive ecological and biopolitical thought Chad Córdova uncovers in aesthetics something irreducible to humanist metaphysics an account of how beings emerge and are interrelated responsive and even response able without reason or why This anarchic and atelic ontology recovered from Kant becomes the guiding thread for a new premodern trajectory of posthumanism Charting a path from Aristotle to Heidegger to today's plant thinking with new readings of Montaigne Pascal Diderot Rousseau and others along the way this capacious study reveals the untimely relevance of pre 1800 practices of writing science and art Enacting a multitemporal mode of reading Córdova offers a defense and illustration of the importance of returning to early modern texts as a way to rethink nature art ethics and politics in a time when these concepts are in flux and more contentious than ever

The Concept of the Public Realm Noel O'Sullivan, 2013-09-13 In its political form the existence of a public realm is the basis of a shared relationship between rulers and ruled which makes politics more than mere power or domination How to construct and maintain a public realm in the political sphere is however a matter of especial dispute at the present day due partly to the increasing difficulty of making the distinction between public and private spheres which has been the basis of Western liberal democracy partly to the tendency of public concerns to be identified with economic interests which transforms citizens into consumers partly to pressure for the acknowledgement of diversity of every kind which creates the danger of fragmenting the public realm and partly to globalization processes which have undermined the traditional identification of the public realm with national political institutions Globalization has in addition raised the question of whether there can be a supra national public realm and more generally of what form it is likely to assume in non Western cultures These are amongst the fundamental

contemporary issues addressed by contributors to the present volume This book was published as a special issue of the Critical Review of International Social and Political Philosophy

The Book of Others Benjamin Ardit, 2025-10-24 In The Book of Others Benjamin Ardit examines the enduring theoretical influence of four major political thinkers Carl Schmitt Louis Althusser Ernesto Laclau and Jacques Rancière whom he frames as others central to shaping contemporary understandings of politics Ardit situates these figures within the terrain of post foundational thought emphasizing their skepticism about transcendental grounds in political theory Through chapters focused on themes like modernity constituent power decisionism ideology hegemony post hegemony populism and dissensus the book explores how each thinker redefines the political as a space of contestation rather than a settled domain This is no exegetical exercise Ardit challenges canonical interpretations by exposing the internal tensions and ambivalences in each thinker's work He treats their published texts as provisional interventions rather than their last word on a particular subject approaching them as intellectual sparring partners in a form of conceptual shadow boxing Through this dynamic and polemical approach Ardit pushes their ideas into directions they either did not anticipate or deliberately avoided The result is a nuanced understanding of post foundational political thought and makes a compelling case for thinking both with and against influential theorists The Book of Others significantly enriches critical political analysis offering a substantive contribution to post Marxist democratic and critical theory

Feminist Geopolitics Deborah P. Dixon, 2016-04-15 What can unfold from an engagement of feminist issues concerns and practices with the geopolitical How does feminism allow for a reconfiguration of how these two elements the geo and the political are understood and related What kinds of objects can be located and put into motion What kinds of relations can be drawn between these What kinds of practice become valued And what is glossed or rendered absent in the process In this thought provoking and original contribution Deborah P Dixon cautions against the exhaustion of feminist geopolitics as a critique of both a classical and a critical geopolitics and points instead to how feminist imaginaries of Self Other and Earth allow for all manner of work to be undertaken Importantly one of the things they provide for is a reservoir of concerns thoughts and practices that can be reappropriated to flesh out what a feminist geopolitics can be While providing a much needed sustained interjection that draws out achievements to date the book thus gestures forward to productive lines of inquiry and method Grounded via a series of globally diverse case studies that traverse time as well as space Feminist Geopolitics feels for the borders of geopolitical thought and practice by navigating four complex and corporeally aware objects of analysis namely flesh bone touch and abhorrence

Asylum Seekers, Sovereignty, and the Senses of the International Eeva Puumala, 2016-11-25 The confrontation between asylum seeking and sovereignty has mainly focused on ways in which the movement and possibilities of refugees and migrants are limited In this volume instead of departing from the practices of governance and surveillance Puumala begins with the moving body its engagements and relations and examines different ways of seeing and sensing the struggle between asylum seekers and sovereign practices Puumala asserts that our political imagination is being challenged in its ways of ordering practicing and thinking about the international and those relations we call international The issues relating to asylum seekers are one example of the deficiencies in the spatiotemporal logic upon which these relations were originally built words such as nation people sovereignty and community are challenged Conventional methods of governing regulating and administering increased forms of mobility are in trouble which gives rise to the invention of new technologies at borders and introduces regulations and spaces of exception Based on extensive fieldwork that sheds light on a range of Europe wide practices in the field of asylum and migration policies this book will be of interest to scholars of IR theory biopolitics and migration as well as critical security more broadly
