Smithsonian: Spaceflight, 2nd Edition Giles Sparrow, 2019-04-02 This compelling story of exploration charts and celebrates humankind in space from Sputnik's launch in 1957 through the Apollo Moon landings and the International Space Station to future missions to Mars and beyond Spaceflight chronicles how in the half century that followed Sputnik the world was revolutionized by space travel and exploration The opening up of Earth's orbit to satellites led to a revolution in communications monitoring of the environment and materials science For the human imagination the impact has been even greater the voyages of robotic space probes have transformed our view of the Solar System while Earth orbiting satellites and missions to the Moon have forever changed our view of ourselves This book is a celebration of human ingenuity and imagination From the work of pioneers like Wernher von Braun Yuri Gagarin and Neil Armstrong to the triumphs and

tragedies that followed it reveals the people science and technology that have propelled us into the Space Age *Red Air* Sanu Kainikara, 2007-10 The Russian Air Force carries the mantle of the erstwhile Red Air Force of the Soviet Union and has a long and illustrious history backed by grand traditions and customs The Russian Air Force is still coming to grips with its changed circumstances after the collapse of the Soviet Union and is perhaps in the best shape of the three armed forces to be able to lend credence to the Russian Federation's claim to international influence and power projection capabilities Doctrine is the reflection of a nation's character and air power doctrine is influenced by the strategic culture of a nation Nowhere else is this more apparent than in the case of the Russian Air Force The Red Air Force has been directly influenced by the political upheavals in the Soviet Union and now Russia but has displayed exemplary resilience in continuing to provide adequate support for government policies The impact of political ideology on the development of doctrine and air power has not been greater in any other air force around the world This book is an extension of a doctoral thesis produced in 2005 and is essential reading for anyone trying to come to grips with the intricate relationship that exists between national security imperatives political ideology and the development of military doctrine Back cover
