Office of Naval Intelligence, 1963 **Soviet Bloc Merchant Ships** Bruno Bock, Klaus Bock, 1981 Updated translation of Die roten Handelsflotten Die Handelsschiffe der COMECON Lander The original German language edition was published by Koehler Verlag Herford 1977 Ships Ahoy: A Guide to Identifying Merchant Vessels of the Eastern Bloc Pasquale De Marco, 2025-07-20 From the humble beginnings of the Soviet merchant marine in the aftermath of the Russian Revolution to the global reach of the Eastern Bloc fleets at the height of the Cold War this book tells the story of the merchant ships and seafarers of the communist world Through a combination of archival research interviews with former merchant mariners and a wealth of illustrations the book provides a comprehensive overview of Eastern Bloc merchant shipping from the ships themselves to the men and women who served on them Readers will learn about the different types of ships that sailed under the Eastern Bloc flag from small coastal freighters to massive oil tankers and container ships They will also learn about the major shipping companies that operated these fleets and the challenges they faced in competing with their Western rivals The book also explores the role of Eastern Bloc merchant shipping in the Cold War These ships were not just commercial vessels they were also tools of espionage propaganda and economic warfare They were used to transport military supplies conduct surveillance missions and spread communist ideology around the world With the collapse of the Eastern Bloc in the early 1990s the merchant fleets of these countries were privatized or sold off Some ships were scrapped while others continue to sail under new flags Today Eastern Bloc merchant ships are a rare sight but they remain a reminder of a bygone era This book is a must read for anyone interested in maritime history the Cold War or the history of Eastern Europe It is a fascinating and informative account of a little known but important chapter in world history If you like this book write a review **Stalin's Slave Ships** Martin J.

Bollinger, 2003-09-30 Between 1932 and 1953 a fleet of ordinary cargo ships was pressed into extraordinary service The fleet's task was to relocate approximately one million forced laborers to the Soviet Gulag in Kolyma located along the Arctic Circle in far northeastern Siberia The Kolyma Gulag the most infamous in the Soviet Union was accessible only by sea and the fleet became the lifeblood of the entire operation As one of the largest seaborne movements of people in history this transport took a devastating toll on human lives Bollinger presents the often horrific stories of the Gulag fleet and its passengers and reveals the unwitting role of the United States government in the operation U S shipyards built most of the Gulag fleet and the U S government sold many of the ships used in the transport directly to an agent of the Soviet Union The United States also overhauled and repaired many ships in the Gulag fleet free of charge at the midpoint of their Gulag careers In some cases free ships provided to the Soviet Union under the Lend Lease military assistance program were diverted into Gulag

transport duties How much did Washington know about the deadly duty of these ships How many prisoners made the voyage How many never made it out alive Bollinger details this tragic tale using firsthand testimony from those involved in the operation and materials from both American and Russian archives *Department of State Bulletin* ,1962 The official monthly record of United States foreign policy Hearings United States. Congress. House,1962 Investigation and Study of the Administration, Operation, and Enforcement of the Export Control Act of 1949, and Related Acts United States. Congress. House. Select Committee on Export Control,1962 Defense ,1985 *East-West Trade Trends* United States. Foreign Operations Administration,1953 East-West Trade Trends Harold E. Stassen,2015-01-13 Example in this ebook Note on Strategic and Nonstrategic To help protect the security of the free world the United States and certain other countries have been working together for more than four years to withhold strategic goods from the Soviet bloc But how can you tell strategic goods from nonstrategic goods A good many people have asked that question It is a reasonable question and it deserves a nontechnical answer The answer is that strategic goods as understood in the day to day operations of the program are those goods which would make a significant contribution to the warmaking power of the Soviet bloc This is a practical guide to action There is no rigid definition that holds good for all times places and circumstances All strategic goods don t have the same degree of strategicness The free countries have embargoed some merely limited others in quantity and kept still other items under surveillance so that controls could be imposed if necessary Even the same item may vary in strategic importance depending on the destination the changing supply situation behind the Iron Curtain and other circumstances which may change from time to time Whether an item includes advanced technology is an important consideration In specific cases two experts of equal competence may disagree on these things Two agencies of government differing in function may bring different points of view to a given problem The same is true of governments Since there is no distinctly visible boundary between strategic and nonstrategic some people insist there is no such thing as a nonstrategic item at all It is true that even bicycles typewriters or ordinary hardware may help the other fellow by strengthening his general economy And these people argue that anything that contributes to the general economy helps in a military way too That is a correct concept in actual warfare but it is not an acceptable concept of strategic in the present situation for trade on certain terms can help the free nations too They carry on two way trade with the Soviet bloc for concrete commercial benefits The problem is to gain those benefits without permitting the Kremlin to accelerate the growth of military power or to divide the free world In rating items as strategic or nonstrategic it is clear that there are innumerable commodities used entirely or mainly for civilian purposes which would not make a clearly significant contribution to war potential No one would have trouble drawing a line between a jet plane and a suit of clothing to take an extreme example Few would have difficulty putting cobalt on one side of the line and butter on the other As for the border area where it is less clear what contribution an item would make the allied governments put their heads together pool their facts and try to arrive at mutually acceptable

judgments As President Eisenhower has said Unity among free nations is our only hope for survival in the face of the worldwide Soviet conspiracy backed by the weight of Soviet military power To be continue in this ebook [Congressional Record](#) United States. Surprise Attack Larry Hancock,2016-09-13 Surprise Attack explores sixty plus years of military and terror threats against the United States It examines the intelligence tools and practices that provided warnings of those attacks and evaluates the United States responses both in preparedness and most importantly the effectiveness of our military and national command authority Contrary to common claims the historical record now shows that warnings often very solid warnings have preceded almost all such attacks both domestic and international Intelligence practices developed early in the Cold War along with intelligence collection techniques have consistently produced accurate warnings for our national security decision makers Surprise Attack traces the evolution and application of those practices and explores why such warnings have often failed to either interdict or intercept actual attacks Going beyond warnings Surprise Attack explores the real world performance of the nation s military and civilian command and control history exposing disconnects in the chain of command failures of command and control and fundamental performance issues with national command authority America has faced an ongoing series of threats from the attacks on Hawaii and the Philippines in 1941 through the crises and confrontations of the Cold War global attacks on American personnel and facilities to the contemporary violence of jihadi terrorism With a detailed study of those threats the attacks related to them and America s response a picture of what works and what doesn t emerges The attacks have been tragic and we see the defensive preparations and response often ineffective Yet lessons can be learned from the experience Surprise Attack represents a comprehensive effort to identify and document those lessons

Naval Air War: The Rolling Thunder Campaign Norman Polmar,Edward J. Marolda,2016-01-05 This is the sixth monograph in the series The U S Navy and the Vietnam War It covers aircraft carrier activity during Operation Rolling Thunder in the war Operation Rolling Thunder was one of the longest sustained aerial bombing campaigns in history And it would be a failure The U S Navy proved essential to the conduct of Rolling Thunder Exploiting the inherent flexibility and mobility of naval forces the Seventh Fleet operated with impunity for three years off the coast of North Vietnam The

success with which the Navy executed the later Operation Linebacker campaign against North Vietnam in 1972 revealed how much the service had learned from and exploited the Rolling Thunder experience of 1965-1968. The book includes several photographs with backgrounds of key aircraft used as part of Operation Rolling Thunder during the Vietnam War. Polmar, 2006-01-01. The closest we've ever come to the end of the world. DEFCON 2 is the best single volume on the Cuban Missile Crisis published and is an important contribution to the history of the Cold War. Beyond the military and political facts of the crisis, Polmar and Gresham sketch the personalities that created and coped with the crisis. They also show us how close we came to the edge without becoming sensationalistic. Larry Bond, bestselling author of *Dangerous Ground*, spy, satellite, and aerial reconnaissance photos reveal that one of the United States's bitterest enemies may be acquiring weapons of mass destruction and the means to use them against the American homeland. Administration officials refuse to accept intelligence professionals' interpretation of these images and order an end to spy missions over the offending nation. More than a month later, after vicious infighting, the president orders the spy missions to resume. The new photos reveal an array of ballistic missiles capable of carrying nuclear warheads and striking deep within U.S. territory. It appears that the missiles will be fully operational within one week. This is not a plot setup for a suspense novel; it is the true story of the most terrifying moment in the 45-year Cold War between the United States and the Soviet Union. The Cuban Missile Crisis. DEFCON 2 tells this tale as it has never been told before, from both sides, with the help of hundreds of recently declassified U.S. and Soviet documents as well as interviews with numerous former spies, military figures, and government officials who speak out here for the first time.

The UNCTAD Liner Code Lawrence Juda, 2019-07-11. The UNCTAD Liner Code, United States Maritime Policy at the Crossroads. Lawrence Juda. World shipping, vital to international trade, is now going through a period of radical change. The UNCTAD Code of Conduct for Liner Conferences is an important manifestation of that change, reflecting the pressures exerted by developing countries for a New International Economic Order and for modifications in the system of international trade. The code, best known for its provisions on liner cargo allocations, includes a number of other very significant stipulations important for U.S. policy. For several years, the United States has opposed the convention and acted on the assumption that the EEC countries, Japan, and other developed states would not ratify it. Now that ratification appears imminent, the United States may find itself isolated and exposed to a number of problems whose impacts may be felt not only in maritime affairs but also in trade, diplomacy, and security. This study examines the nature, provisions, and possible effects of the UNCTAD Liner Code. Dr. Juda evaluates how the regime of the code compares with the present U.S. framework for liner

regulations and promotion then outlines and assesses the major policy options available to the United States given the positions taken by the developing states and the EEC The book is based on interviews with key officials and on U N and U S government documents **Military Construction Appropriations** United States. Congress. House. Committee on Appropriations. Subcommittee on Military Construction Appropriations, 1987
