**Modern Afghanistan** Amin Saikal, 2004-08-27 Afghanistan's recent history is a sad one Soviet invasion in 1979 Pakistan backed internal conflict in the 1980s the Taliban regime and then the US invasion and the multi national occupation after the events of 11 September 2001 Why does Afghanistan remain so vulnerable to domestic instability foreign intervention and ideological extremism In reconstructing the tempestuous narrative of modern Afghanistan Amin Saikal provides a sweeping new understanding of its troubled past and present He identifies the country's inability to develop stable political structures as stemming from the inter dynastic rivalry complicated by polygamy that scarred successive royal families from the end of the eighteenth century until the pro Soviet Communist coup of April 1978 all exacerbated by foreign interventions feeding on fragile domestic structures and the rise and fall of different ideological streams Here for the first time is an up to date analysis of the era of the Taliban's rule the effects of US domination in the country and attempts to negotiate a US withdrawal including talks about talks with the Taliban themselves This book which sets the crisis of Afghanistan in the context of the country's modern history and social structures makes a major and highly original contribution towards a better and more nuanced understanding of this ill fated land It is the definitive study of Afghanistan and its troubles in national regional and international contexts from 1747 to the present day

**Leaving Earth** Robert Zimmerman, 2019-02-14 In this definitive account of the quest to establish a human presence in lifeless outer space award winning space historian Robert Zimmerman reveals the great global gamesmanship between Soviet and American political leaders that drove the space efforts of both

following the Apollo lunar landings in the 1960s and 1970s Beaten to the Moon by their Cold War enemies the Russians were intent on being first to the planets They knew that to reach other worlds they needed to learn how to build interplanetary spaceships and believed that manned space stations held the greatest promise for making that possible Thus from the very moment they realized they had lost the race to the Moon the Soviet government worked feverishly to build a viable space station program one that would dwarf the American efforts and allow the Russians to claim the vast territories of space as their own Like the race between the tortoise and the hare the ponderously bureaucratic Soviet Union actually managed to overtake the United States in this space station race Their efforts sometimes resulting in terrifying near death exploits not only put them far ahead of NASA it also served to reshape their own society helping to change it from a communist dictatorship to a freer and more capitalist society At the same time the American space program at NASA was also evolving but not for the better In fact in many ways the two programs and nations were slowly but inexorably trading places Drawing on his vast store of knowledge about space travel and modern history as well as hundreds of interviews with cosmonauts astronauts and scientists Zimmerman has superbly captured the exciting story of space travel in the last half of the twentieth century Leaving Earth tells that story and is required reading for space and history enthusiasts alike who wish to understand the context of the space exploration renaissance taking place now in the twenty first century

European Security Bjørn Møller, 2016-04-22 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in

Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it *Law, Power, and the Sovereign State* Michael Ross Fowler, Julie Marie Bunck, 2010-11-01 In the wake of the collapse of the Soviet bloc it is timely to ask what continuing role if any the concept of sovereignty can and should play in the emerging new world order The aim of *Law Power and the Sovereign State* is both to counter the argument that the end of the sovereign state is close at hand and to bring scholarship on sovereignty into the post Cold War era The study assesses sovereignty as status and as power and examines the issue of what precisely constitutes a sovereign state In determining how a political entity gains sovereignty the authors introduce the requirements of de facto independence and de jure independence and explore the ambiguities inherent in each They also examine the political process by which the international community formally confers sovereign status Fowler and Bunck trace the continuing tension of the chunk and basket theories of sovereignty through the history of international sovereignty disputes and conclude by considering the usefulness of sovereignty as a concept in the future study and conduct of international affairs They find that despite frequent predictions of its imminent demise the concept of sovereignty is alive and well as the twentieth century draws to a close *Sovereignty in China* Maria Adele Carrai, 2019-08 This book provides a comprehensive history of the emergence and the formation of the concept of sovereignty in China from the year 1840 to the present It contributes to broadening the history of modern China by looking at the way the notion of sovereignty was gradually articulated by key Chinese intellectuals diplomats and political figures in the unfolding of the history of international law in China rehabilitates Chinese agency and shows how China challenged Western Eurocentric assumptions about the progress of international law It puts the history of international law in a global perspective interrogating the widely held belief of international law as universal order and exploring the ways in which its history is closely anchored to a European experience that fails to take into account how the encounter with other non European realities has influenced its formation *The Routledge History Handbook of Central and Eastern Europe in the Twentieth Century* Jochen Böhrer, Włodzimierz Borodziej, Joachim von Puttkamer, 2022-02-15 Violence analyzes both the

violence exerted on the societies of Central and Eastern Europe during the twentieth century by belligerent powers and authoritarian and or totalitarian regimes and armed conflicts between ethnic social and national groups as well as the interaction between these two phenomena Throughout the twentieth century Central and Eastern Europe was hit particularly hard by war violence and repression with armed conflicts in the Balkans at the start and end of the period and two world wars in between In the shadow of these full scale wars ethnic social and national conflicts were intensified found new forms and were violently played out The interwar period witnessed the emergence of authoritarian states who enforced their claim to power through continued violence against political opponents stigmatized ethnic national and social groups and were themselves fought with subversive or terrorist techniques This volume focuses specifically on physical violence war and civil war ethnic cleansing systematic starvation policies deportations and expulsions forced labour and prison camps persecution by state security such as intensive surveillance which had an enormous impact on the lives of those it affected and other forms of government oppression and militant resistance Geographically it considers the western regions of Belarus and Ukraine as sites of extreme violence that had a noticeable impact on neighbouring Central and Eastern European countries as well The concluding volume in a four volume set on Central and Eastern Europe in the twentieth century it is the go to resource for those interested in violence in this complex region
