Soviet Education James Bowen,1962 *Soviet Education. Anton Makarenko and the Years of Experiment* James Bowen,1962 **Russian and Soviet Education 1731-1989** John T. Zepper,William W. Brickman,2014-02-04 Volume 9 in the series of Reference Books in International Education This bibliography is intended to provide a reference aid to mature Russian Soviet scholars to those beginning a life long study of this field and to students in Russian Soviet Studies and allied fields This title provides a resource to scholars students and professionals seeking to understand the role played by education in various societies or regions of the world *Yiddish and the Creation of Soviet Jewish Culture* David Shneer,2004-02-13

Yiddish and the Creation of Soviet Jewish Culture gives voice to the activists empowered by the state to create a Soviet Jewish national culture These activists were striving for a national revolution to create a new culture for Jews to identify as Jews on new secular Soviet terms This book explores the ways in which Jews were part of not apart from both the Soviet system and Jewish history Soviet Jewish culture worked within contemporary Jewish national and cultural trends and simultaneously participated in the larger project of propagating the Soviet state and ideology Soviet Jewish activists were not nationalists or Soviets but both at once David Shneer addresses some of the painful truths about Jews own implication and imbrication in the Soviet system and inserts their role in twentieth century Jewish culture into the narrative of Jewish history

A History of Western Education (Volumes 1, 2 and 3) James Bowen,2020-05-25 This set reprints volumes 1 2 and 3 of James Bowen s *A History of Western Education* originally published by Methuen in the 1970s Volume One The Ancient World Orient and Mediterranean 2000B C A D 1054The volume traces the development of education in the ancient world from the first scribal cultures of Mesopotamia and Egypt to learning in the early Christian church A detailed account is given of the acheivements of Greece in literacy learning philosophy and training for public life achievements which were further developed in the Hellenistic Orient and incorporated by the Romans into their own highly organized educational system This leads to the emergence of a specifically Christian ideal of education the decline of secular learning in the West and the preservation of learning both in Byzantium and in Western monasticism Volume Two Civilization of Europe Sixth to Sixteenth Century Volume Two follows the growth and process of learning in Europe from its foundations in the Carolingian era through its evolution in medieval Europe especially italy France Germany and England to its expansion and refinement in the sixteenth century Particular attention is paid to The role of medieval institutions of the cathedral and grammer schools and the university The contribution of notable scholars of the age such as Abelard Thomas Aquinas Erasmus and Luther Volume Three The Modern West Europe and the New World The final volume covers the period of educational dissent which became conspicuous in the early seventeenth century and reached crisis proportions in the late twentieth when the dominant ideologies of progress and equality generated at the beginning of the nineteenth century were questioned for the first time on a widespread popular scale **Soviet State and Society Between Revolutions, 1918-1929** Lewis H.

Siegelbaum,1992-08-20 The evolution of the ruling Communist Party and its New Economic Policy is explored in the first book to analyze the relationship between the Soviet state and society from 1917 through the early 1930s through the changing fortunes of its peoples Soviet Education Nellie Mary Apanasewicz,1964 *The Art and Science of Making the New Man in Early 20th-Century Russia* Yvonne Howell,Nikolai Krementsov,2021-12-02 The idea that morally mentally and physically superior new men might replace the currently existing mankind has periodically seized the imagination of intellectuals leaders and reformers throughout history This volume offers a multidisciplinary investigation into how the new man was made in Russia and the early Soviet Union in the first third of the 20th century The traditional narrative of the Soviet new man as a creature forged by propaganda is challenged by the strikingly new and varied case studies presented here The book focuses on the interplay between the rapidly developing experimental life sciences such as biology medicine and psychology and countless cultural products ranging from film and fiction dolls and museum exhibits to pedagogical projects sculptures and exemplary agricultural fairs With contributions from scholars based in the United States Canada the UK Germany and Russia the picture that emerges is emphatically more complex contradictory and suggestive of strong parallels with other new man visions in Europe and elsewhere In contrast to previous interpretations that focused largely on the apparent disconnect between utopian new man rhetoric and the harsh realities of everyday life in the Soviet Union this volume brings to light the surprising historical trajectories of new man visions their often obscure origins acclaimed and forgotten champions unexpected and complicated results and mutual interrelations In short the volume is a timely examination of a recurring theme in modern history when dramatic advancements in science and technology conjoin with anxieties about the future to fuel dreams of a new and improved mankind *Education in the USSR* Joseph I. Zajda,2014-05-20 Education in the USSR examines the current and official Soviet educational philosophy with emphasis on social moral and political aspects of Soviet education Organized into five chapters this book begins with a discussion on the origins of Soviet educational philosophy Then the Soviet school as an organization is explained Subsequent chapters elucidate the moral education and political socialization of Soviet schoolchildren and the education for labor patriotism and defense The education of Soviet teachers is also addressed **Education in the Soviet Union** Mervyn Matthews,2012 This book provides a comprehensive survey of the successes and failures of education and training in the Khrushchev and Brezhnev years The author gives an objective assessment of the accessibility of the main types of institution of the contents of courses and of Soviet attempts to marry the functioning of their education system to their perceived economic and social needs In addition the book has many useful and original features For ease of analysis it summarises in diagram form complex statistics which are not usually brought together for so long a time period It provides a systematic account of educational legislation Matthews comparison of series of official decrees will allow subtle shifts in government policy to be accurately charted Particular attention is also paid to a number of issues that are often neglected the employment problems of school

and college graduates the role and professional status of teachers political control and militarisation in schools the close detail of higher education curricula and the rate of student failure Of special value is the chapter on those educational institutions which are often omitted from Western studies and which are hardly recognised as such in most official Soviet sources

Marx and Education in Russia and China R. F. Price, 2011-12-08 To many education students Russian and or Chinese education is at the same time their introduction to Marxism and many students go no further This book sets the record straight by giving a thorough introduction to the writings of Marx himself as they relate to education It shows what Marxism implies for education as aim method and content It then proceeds to compare educational developments in the former USSR and China in the light of this analysis attempting to answer the question as to how Marxist this has been in the schools and outside them

Social Decay and Transformation Samuel Farber, 2000-01-01 In Social Decay and Transformation social and political critic Samuel Farber presents an analysis of social decline that has been missing from the

contemporary scene a view from the Left one which draws from the ideas and traditions of the Enlightenment's left wing Using a comparative approach to situate his theoretical conclusions in historical circumstances Farber looks at the working class and temperance movements civil rights rebellions and the Black Panthers and the cultural revolutions of 1920s Russia and the Bolsheviks Providing carefully reasoned interrogations of contemporary thinkers such as James C Scott and Robin D G Kelley Farber clarifies the discussions on social decay currently taking place adding an important voice of the Left to the current debate Marx and Education in Russia and China (RLE Edu L) R Price, 2012-05-04 To many education students Russian and or Chinese education is at the same time their introduction to Marxism and many students go no further This book sets the record straight by giving a thorough introduction to the writings of Marx himself as they relate to education It shows what Marxism implies for education as aim method and content It then proceeds to compare educational developments in the former USSR and China in the light of this analysis attempting to answer the question as to how Marxist this has been in the schools and outside them **Competitive Comrades** Susan L. Shirk, 2023-04-28 **Competitive Comrades** Career Incentives and Student Strategies in China provides a nuanced analysis of the complexities within China's educational institutions and examines the evolution of student behavior in response to political pressures and career incentives Focusing on the period between 1960 and 1966 the book delves into the high stakes world of Chinese high schools where the distribution of opportunities especially under Mao's virtocratic policies produced a unique blend of ambition and moral posturing The book argues that Maoist policies which sought to fuse political virtue with academic performance created an intense atmosphere of competition that encouraged students to balance their academic and political ambitions with social strategies that would ensure their success Unlike meritocracies or traditional hierarchies this virtocratic system intensified the stakes of student relationships and loyalty while paradoxically fostering political cynicism and alienation from the state a contradiction at the heart of the Maoist vision of revolutionary successors Through detailed interviews with former students **Competitive Comrades** reveals how students navigated these pressures showing that rather than fostering cooperation and ideological alignment Mao's policies often drove students toward strategic adaptations aimed at self preservation and advancement This exploration of the social and behavioral implications of virtocracy provides critical insights into post revolutionary Chinese society and presents a comparative framework relevant to other regimes governed by similar principles of moral based selection Ideal for scholars of Chinese history political sociology and education studies **Competitive Comrades** sheds light on the unintended consequences of revolutionary moral ambitions on youth culture and social cohesion in Communist China This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1982 The Russian Revolution and Civil War 1917-1921 Jonathan

Smele,2006-04-15 The Russian Revolution and Civil War in the years 1917 to 1921 is one of the most widely studied periods in history It is also somewhat inevitably one that has generated a huge flow of literature in the decades that have passed since the events themselves However until now historians of the revolution have had no dedicated bibliography of the period and little claim to bibliographical control over the literature The Russian Revolution and Civil War 1917 1921 offers for the first time a comprehensive bibliographical guide to this crucial and fascinating period of history The Bibliography focuses on the key years of 1917 to 1921 starting with the February Revolution of 1917 and concluding with the 10th Party Congress of March 1921 and covers all the key events of the intervening years As such it identifies these crucial years as something more than simply the creation of a communist state **Preparing For Power** Peter W Cookson Jr,Caroline Hodges

Persell,2008-08-04 Why do private boarding schools produce such a disproportionate number of leaders in business government and the arts In the most comprehensive study of its kind to date two sociologists describe the complex ways in which elite schools prepare students for success and power and they also provide a lively behind the scenes look at prep school life and underlife *Ministries of Compassion among Russian Evangelicals, 1905-1929* Mary Raber,2016-05-13 The present study fills a gap in the study of the evangelical movement in Russia by presenting a comprehensive picture of their compassionate ministry during their longest stretch of relative freedom before the 1980s Better known for their energetic preaching and literature work Russian evangelicals also gave attention to compassionate ministry although it was never extensive because of their marginal status They established assistance funds organized charitable institutions practiced urban rescue ministry participated in the Russian temperance movement and established economic communities Each area is distinct yet all were supported by the same set of theological convictions The Russian evangelicals were convinced that their witness should consist of good works as well as words and that the gospel had the power to undo human suffering While intentionally cultivating an attitude of concern for the needs of others they taught that compassion was the concern of all members of the community regardless of economic status or age In their publications evangelicals devoted a good deal of teaching to the proper Christian attitude toward money and giving They drew on Western models but also their indigenous sectarian roots The Collective and the Individual in Russia Oleg Kharkhordin,2023-04-28 Oleg Kharkhordin has constructed a compelling subtle and complex genealogy of the Soviet individual that is as much about Michel Foucault as it is about Russia Examining the period from the Russian Revolution to the fall of Gorbachev Kharkhordin demonstrates that Party rituals which forced each Communist to reflect intensely and repeatedly on his or her self an entirely novel experience for many of them had their antecedents in the Orthodox Christian practices of doing penance in the public gaze Individualization in Soviet Russia occurred through the intensification of these public penitential practices rather than the private confessional practices that are characteristic of Western Christianity He also finds that objectification of the individual in Russia relied on practices of mutual surveillance among peers rather than on the hierarchical surveillance of

subordinates by superiors that characterized the West The implications of this book expand well beyond its brilliant analysis of the connection between Bolshevism and Eastern Orthodoxy to shed light on many questions about the nature of Russian society and culture Oleg Kharkhordin has constructed a compelling subtle and complex genealogy of the Soviet individual that is as much about Michel Foucault as it is about Russia Examining the period from the Russian Revolution to the fall of Gorbachev Kharkhordin demon

Occupying Schools, Occupying Land Rebecca Tarlau, 2019 In *Occupying Schools* *Occupying Land* Rebecca Tarlau looks at the Brazilian Landless Workers Movement over the past thirty five years to illustrate how social movements can use state services such as schools to support their social change goals Through a detailed ethnographic and long term examination of the MST's educational struggle Tarlau shows how educational institutions can in turn help movements build capacity and social influence This book provides an analysis of how activists convinced government officials to implement these educational practices and how these initiatives strengthened the movement
