Theatre in the Expanded Field Alan Read, 2013-12-05 Theatre in the Expanded Field is a fiercely original bold and daring exploration of the fields of theatre and performance studies and the received narratives and histories that underpin them Rich with interdisciplinary reference international eclectic and broad ranging in its examples it offers readers a compelling and provocative reassessment of the disciplines one that spans pre history to the present day Sixty years ago in 1962 Richard Southern wrote a remarkable book called The Seven Ages of the Theatre It was unusual in its time for taking a trans disciplinary new historical and avowedly internationalist approach to its subject nothing less than a totalizing view of its field Theatre in the Expanded Field does not attempt to mimic Southern's work but rather takes his spirit of adventure and ambition as its frame for the contemporary moment of performance and its diverse pasts Identifying seven ways of exploring the performance field from pre history to postdramatic theatre the book presents studies of both contemporary and historical works not as a chronological succession but in keeping with their coeval qualities as movements or generations of connection and interaction dissensus and interruption It does this with the same purpose as Richard Southern's original work to provide for the planning of responsive performance spaces now Illustrated throughout with line drawings Theatre in the Expanded Field is as richly rewarding as it is ambitious and expansive in its vision

Social Work with the Aged and Their Families

Roberta R. Greene, 2017-07-12 In recent years theoreticians researchers and practitioners have become increasingly interested in older adults and the aging process This volume draws on related disciplines to better understand the biological psychological and social aspects of aging Social Work with the Aged and Their Families covers areas of central interest to those coping with the needs of an aging population Among the topics addressed are assessment of the aging taking into account biological age psychological age and socio cultural and spiritual age Greene also considers the importance of the family system family roles and development functional age individual and family intervention and group and community interventions The scientific and systematic study of aging is known as gerontology Geriatric social workers are those who have applied established social work theories in an attempt to find suitable techniques for working with their elderly clients The need for specialized services has given birth to various services and programs For example meals on wheels and home health care services have been designed to meet specific physical needs of older adults However mental health services have lagged far behind as practitioners struggled to adapt such specialties as family therapy to families of later years A major contribution of this book now in its third edition is the functional age model of intergenerational treatment FAM which is an outgrowth of that demand The functional age model of intergenerational treatment is an integrative theoretical framework for social workers interested in clinical social work practice with older adults and their families Since its initial construction in 1986 the model has been augmented by more recent concepts related to successful aging spirituality and resiliency These additions together with the original assessment and intervention strategies present the major converging conceptual trends
