revealing introduction to a relatively neglected aspect of ancient life **The Eye of the Beholder** Lance Sieveking,1957

a spiritual solution to a human condition Every problem and every solution stem from a mental and personal definition A
definition is what we create to interpret every situation in life Then we use those interpretations to create new definitions
The catch is learning how to change those definitions at a subconscious level to help us achieve the things that we value If
first you don't succeed then redefine success This book simplifies many complexities of quantum physics and psychology
Once this information is processed and understood it is then used to show its connection and similarities between a myriad of
universal spiritual practices and principles This connection is done in a way that has never been done before Similar to a
documentary on paper it proposes easy to understand explanations of how the many things that we call reality are just
fragments of the mind Things that we intuitively know but are never taught gain more validation with each chapter by the
breakdown and application of different things in our everyday lives My love and hunger for this subject matter have led me to
research 1000s of hours in this truth seeking journey I am a certified hypnotherapist and very experienced in the arts of
meditation I am a member of the Greens political party and the practising manager of a stem cell and cancer clinic I am a
Master Mason thus my esoteric understandings of the world stem from my freemason affiliation and they have given me a
view most people have not properly investigated I have also experienced the extreme lows of drug addiction the criminal
world and domestic abuse only to come out of the tunnel with a better understanding of the dark before appreciating the
light My experiences and open mind have led me to help science and spirituality communicate in the way that it was always
intended but frowned upon Reality is not easy to navigate through but it is impossible if you don't even know who you are

with its questioning of the whole enlightenment project New features include a concise introduction to the major debates of
the twentieth century information on thinkers of the nineteenth and early twentieth century whose relevance to modern
social thought is only now being recognised e.g. Nietzsche Saussure Simmel key debates placed in historical and
philosophical context connections drawn between post structuralist thinkers like Foucault and Derrida and the founding
figures of sociology Marx Weber and Durkheim easy to read format four wholly new chapters tracing developments in social
