The Facts Of The Matter:

The Facts of the Matter David Parish, 2018-08-31 Too Green to Be True Does all the positive press about hybrid cars alternative fuels and the next green must have product sound too good to be true Well maybe it is In The Facts of the Matter Alaskan author David Parish provides a clear explanation of the environmental technology energy and resources issues we face and shows how readers can move politicians regulators environmental groups media and businesses to truly take the action society needs to prosper Parish helps readers cut through the noise and focus on an optimistic approach to green issues He argues that the best way to conserve the planet and ourselves is the natural convergence of smart natural resource development with improving the lives of the growing population The Facts of the Matter is the basis for a conversation based on solutions rather than rhetoric and will cause a rethinking of our biases to the benefit of the greater good The Matter of Facts Gareth Leng, Rhodri Ivor Leng, 2020-04-14 How biases the desire for a good narrative reliance on citation metrics and other problems undermine confidence in modern science Modern science is built on experimental evidence yet scientists are often very selective in deciding what evidence to use and tend to disagree about how to interpret it In The Matter of Facts Gareth and Rhodri Leng explore how scientists produce and use evidence They do so to contextualize an array of problems confronting modern science that have raised concerns about its reliability the widespread use of inappropriate statistical tests a shortage of replication studies and a bias in both publishing and citing positive results Before these problems can be addressed meaningfully the authors argue we must understand what makes science work and what leads it astray The myth of science is that scientists constantly challenge their own thinking But in reality all scientists are in the business of persuading other scientists of the importance of their own ideas and they do so by combining reason with rhetoric Often they look for evidence that will support their ideas not for evidence that might contradict them often they present evidence in a way that makes it appear to be supportive and often they ignore inconvenient evidence In a series of essays focusing on controversies disputes and discoveries the authors vividly portray science as a human activity driven by passion as well as by reason By analyzing the fluidity of scientific concepts and the dynamic and unpredictable development of scientific fields the authors paint a picture of modern science and the pressures it faces **The Lawyers Reports Annotated**, 1915 **Do Facts Matter?** Jennifer L. Hochschild, Katherine Levine Einstein, 2015-01-20 A democracy falters when most of its citizens are uninformed or misinformed when misinformation affects political decisions and actions or when political actors foment misinformation the state of affairs the United States faces today as this timely book makes painfully clear In Do Facts Matter Jennifer L Hochschild and Katherine Levine Einstein start with Thomas Jefferson s ideal citizen who knows and uses correct information to make policy or political choices What then the authors ask are the consequences if citizens are informed but do not act on their knowledge More serious what if they do act but on incorrect information Analyzing the use nonuse and misuse of facts in various cases such as the call to impeach Bill Clinton the response to global warming Clarence Thomas s

appointment to the Supreme Court the case for invading Iraq beliefs about Barack Obama's birthplace and religion and the Affordable Care Act Hochschild and Einstein argue persuasively that errors of commission that is acting on falsehoods are even more troublesome than errors of omission While citizens inability or unwillingness to use the facts they know in their political decision making may be frustrating their acquisition and use of incorrect knowledge pose a far greater threat to a democratic political system Do Facts Matter looks beyond individual citizens to the role that political elites play in informing misinforming and encouraging or discouraging the use of accurate or mistaken information or beliefs Hochschild and Einstein show that if a well informed electorate remains a crucial component of a successful democracy the deliberate concealment of political facts poses its greatest threat *Proceedings of the ...
