The Entrepreneurship Workbook John Alver Dobson, 2019-05-21 This book comes from my desire to help you become a more successful entrepreneur I have designed this book to help you learn how to develop your ideas into opportunities This book is different from other textbooks in that it will not teach you about entrepreneurship but instead you will learn to become an entrepreneur Therefore the book is designed as a workbook with concrete activities to help build your entrepreneurial ability The book is comprised of 14 challenges Spend 5 hours on each activity and you will develop your entrepreneurial knowledge skills and abilities My approach for this book is based on the growing academic research that demonstrates the effectiveness of using problem based learning to help students construct knowledge In other words you learn by doing as you attempt to solve real problems This book is designed to help you and other budding entrepreneurs develop your ideas into opportunities The focus of this book is the entrepreneurship startup phase Research indicates that by practicing entrepreneurship you can learn to become a more effective entrepreneur What distinguishes this book from other textbooks is that students actually practice being entrepreneurs rather than learn about entrepreneurship This book will not teach you about entrepreneurship it will teach you to be an entrepreneur As such the book is designed as a workbook with activities to learn entrepreneurship a journal so that you can write and reflect on your entrepreneurial journey and a textbook to help you determine the concepts of entrepreneurship The book has 14 challenges After you complete these challenges you will have gained the entrepreneurial confidence and ability to make you a more effective entrepreneur And yes you can start a business with 1 00 I have facilitated the learning of hundreds of students in this 1 00 journey and it works I have been using a problem based approach for teaching and learning about entrepreneurship for almost 10 years I have noticed and quantified that students are more entrepreneurial after completing the activities in this book I looked around for a textbook that actually teaches students how to be entrepreneurs I could not find one so I wrote this workbook to you on your entrepreneurial journey About Me As a college student I started my own business called South of the Border Imports The front cover is a polaroid of my first craft fair At 20 I hopped in my car drove from Canada to Mexico and bought handicrafts and drove back to Canada On the way down I slept in my car and on the way back I slept on top of my car The photo of the cover is my first craft fair Reflecting on my experiences I did not know what I did not know on

successfully starting and running a business I learned by doing I successfully ran my business for 21 years prior to selling it My business was successful and well known in the community and nationally As a result I was invited to give guest lectures and eventually to teach a course on new venture development I enjoyed teaching so after I sold my business I decided to pursue teaching entrepreneurship as a second career I wanted to be an effective professor so I returned to continue my studies at the London School of Economics and a doctorate from the University of Manchester in the UK I continue to focus on improving my ability as a professor to teach nascent entrepreneurs This book is the result of my professional academic and teaching experiences on how to most effectively teach entrepreneurship My goal for this book is that you learn to become a successful entrepreneur Essentially develop the ability to transform your often vague ideas into entrepreneurial opportunities I designed the DYME model Develop Your Model of Entrepreneurship based on my personal experiences as an entrepreneur research how to develop entrepreneurial abilities in students and my experiences **The Small Business**

Building a Successful Business Jay Goldberg,2012-02-07 Second edition December 2014 In its first year about half of all businesses fail Five years down the line depending upon which study you look at only 1 in 10 to 1 in 3 businesses are left standing The main reasons businesses fail are no business plan and poor management That is why this book covers both topics However this book goes beyond other books on these topics The book not only provides a road map for writing a business plan but also provides a strategy for writing a business plan A business plan is both a strategic document and a sales document It also provides the reader with a look into the skills knowledge and personality of the business owner Therefore a good business plan is written to satisfy all of these uses In addition this book provides information on how to research and organize the information needed for a business plan and has worksheets the entrepreneur can use to help make the process easier Likewise management topics such as strategic planning SWOT analysis plus advertising branding project management customer service management cash flow management sales skills business writing and more are explained and a method is provided for each management skill that can be implemented and used in the business There are worksheets for many of the management topics as well While many business book writers know and cover business writing it s amazing how few actually apply that knowledge to their business books I do The information in this book is presented in bullet points assuring the reader that he or she does not have to wade through four paragraphs of writing to get a couple of key points Even the size of the book is practical for the end user An over sized book might attract attention in the book store but would make it difficult to copy and use the worksheets in the book An under sized book might demonstrate value by the sheer volume of pages same amount of information but more

pages but would mean compressing the worksheets into smaller sizes rendering them less useful In addition to entrepreneurs this book was written so that venues teaching entrepreneurship can use it as a text book In fact I have been teaching entrepreneurship courses since 1997 This book was written to be a stand alone book to support my business plan mentoring service I review the worksheets for clients and to be a text book for my course How to Start Grow and Manage a Business The book received a very good review from the Midwest Book Review Too many businesses are started without the experience needed to keep it alive and going Building a Successful Business is Jay Goldberg s advice manual for those embarking on the entrepreneurial path with tips on how to avoid the common pitfalls that strike many first time business owners With advice on strategically planning your business cautious advertising business writing managing the funds and more Building a Successful Business is a strongly recommended pick for any first time business person Author s personal note While the review concentrated on new business owners the book was written for both first time business owners and established business owners Many people assume that established business owners are utilizing management tools to help ensure success However many do not and that is one reason for the high failure rate of existing businesses My book provides management tools with associated worksheets that existing businesses can use to help them achieve or maintain success as well as tools and worksheets for new business owners
