Moral Conflict W. Barnett Pearce, Stephen W. Littlejohn, 1997-03-20 Moral Conflict the subject of this book is passionate and difficult to resolve Responses that are normally effective such as explaining persuading and compromising can make matters worse and drive people further apart in such conflicts Moral conflicts occur when incommensurate social realities come to clash Disputes about abortion religion in politics and education legal rights for homosexuals and environmental politics are issues in which well intentioned parties have created polarized and diverse patterns of communication The most virtuous actions of each side not only fail but widen the schism Such conflicts require us to find forms of communication that go beyond our normal ways of dealing with disagreement In an original synthesis of communication theory and their own research W Barnett Pearce and Stephen W Littlejohn describe a dialectical tension between the expression and suppression of conflict that can be transcended in ways that lead to personal growth and productive patterns of social action In Moral Conflict several projects are described as practical examples of these new ways of working through difficult struggles

Risk, Uncertainty and Policy Patrick Brown, Anna Olofsson, 2017-10-02 Policy making has always involved uncertainty however the presence of unknowns has become far more conspicuous and problematic in recent times One important way in which policy makers have increasingly sought to deal with such uncertainty is through approaches rooted in understandings of risk This book comprises a rather diverse collection of six chapters alongside one more explicitly theoretical introduction each taking up a distinct perspective in scrutinising the relationship between policy risk and uncertainty Important concerns addressed within these different studies include how risk governance policies are shaped by risk awareness or a lack thereof and the mediating role of trust the framing of policy through an emphasis on particular risks and the corresponding impact on

societal beliefs discourses and institutional power the organisational processes which lead to some risks being tackled while others are neglected and processes of de politicising uncertainty at the interface between scientists and policy makers Contributors explore trans national institutions national bodies and local government within diverse geographical contexts including China Brazil the Baltic Sea Australia the UK and Europe This book was originally published as a special issue of the Journal of Risk Research
