Sharif,2023-10-12 Oil and Development in the Arab Gulf States 1985 brings together in one volume the manifold sources of information on the Arab Gulf region especially the impact of oil revenues on its economic political and social development It provides a balanced core of primary and secondary sources on various aspects of the economics of Arab oil between 1973 and 1983 **Chronology of Twentieth-Century History: Business and Commerce** Frank N. Magill,2014-04-23 First Published in 2004 Volume II provides the hard facts and the history behind the headlines significant

20th century events in the evolution of all aspects of business and commerce are described in chronologically arranged articles. The text of each article is divided into two sections: Summary of the Event describes the event itself and the circumstances leading up to it; and Impact of the Event analyzes the influence of the event on the evolution of business practice or on a major industry in both the short and long terms. Each article concludes with a fully annotated Bibliography.

Oil, Debt and Development Paul Hallwood, Stuart Sinclair, 2016-03-02. This book originally published in 1981 discusses the various welfare effects including oil debt, trade and labour flows of the rise in oil prices and revenues which took place in the 1970s. These complex effects and the negotiating stances of the developing countries are all examined and investigated drawing upon a wide range of sources and material for the more quantitative parts. Throughout however the treatment is non-mathematical and is written in clear English accessible not only to bankers and politicians but also students of economics, international relations and area studies.

An Analysis of OPEC's Strategic Actions, US Shale Growth and the 2014 Oil Price Crash Mr. Alberto Behar, Robert A Ritz, 2016-09-07. In November 2014 OPEC announced a new strategy geared towards improving its market share. Oil market analysts interpreted this as an attempt to squeeze higher cost producers including US shale oil out of the market. Over the next year crude oil prices crashed with large repercussions for the global economy. We present a simple equilibrium model that explains the fundamental market factors that can rationalize such a regime switch by OPEC. These include i) the growth of US shale oil production ii) the slowdown of global oil demand iii) reduced cohesiveness of the OPEC cartel iv) production ramp ups in other non OPEC countries. We show that these qualitative predictions are broadly consistent with oil market developments during 2014-15. The model is calibrated to oil market data; it predicts accommodation up to 2014 and a market share strategy thereafter and explains large oil price swings as well as realistically high levels of OPEC output.
