focuses on how those filmmakers also had keen ears that enabled them to perceive new possibilities for cinematic sound design. Offering detailed case studies of key films and filmmakers, Jay Beck explores how sound design was central to the era's experimentation with new modes of cinematic storytelling. He demonstrates how sound was key to many directors' signature aesthetics, from the overlapping dialogue that contributes to Robert Altman's naturalism to the wordless interludes at the heart of Terrence Malick's lyricism. Yet the book also examines sound design as a collaborative process, one where certain key directors ceded authority to sound technicians who offered significant creative input. *Designing Sound* provides readers with a fresh take on a much-studied era in American film, giving a new appreciation of how artistry emerged from a period of rapid industrial and technological change.
