Wing, 2012-12-06 Bernard R Gifford and Linda C Wing Standardized testing has become a ubiquitous feature of American life As a major source of information for reducing uncertainty in the allocation of merit based educational training and employment opportunities testing affects the life chances of individuals Moreover testing influences the way in which our society judges itself and provides for our collective future Test scores may determine a child's admission to kindergarten and promotion to the first grade Most states award the high school diploma only if a student has passed a minimum competency test Major institutions of higher education typically require applicants to supplement their records of academic achievement with scores on college admissions tests In the labor market as a condition of employment or assignment to training programs more and more employers are requiring workers to sit for personnel selection tests Additionally it has become commonplace to use test scores to calibrate our national sociopolitical condition and our capacity to compete with other countries in the global economy In short with increasing frequency and intensity scores on examinations that purport to be objective and precise measures of individual knowledge abilities and potential are playing a critical role in the opportunity marketplace Similarly test scores are exercising growing influence in assessments of our social and economic institutions and in policy decisions about the relative investments that should be made in each In all these instantiations test scores are at the center of high stakes decision making about the future of individuals and of the nation itself

Test Policy and the Politics of Opportunity Allocation: The Workplace and the Law Bernard R. Gifford, 2012-12-06 Bernard R Gifford In the United States

the standardized test has become one of the major sources of information for reducing uncertainty in the determination of individual merit and in the allocation of merit based educational training and employment opportunities. Most major institutions of higher education require applicants to supplement their records of academic achievements with scores on standardized tests. Similarly in the workplace as a condition of employment or assignment to training programs more and more employers are requiring prospective employees to sit for standardized tests. In short with increasing frequency and intensity individual members of the political economy are required to transmit to the opportunity marketplace scores on standardized examinations that purport to be objective measures of their and potential. In many instances these test scores are the abilities talents only signals about their skills that job applicants are permitted to send to prospective employers. THE NATIONAL COMMISSION ON TESTING AND PUBLIC POLICY In view of the importance of these issues to our current national agenda it was proposed that the Human Rights and Governance and the Education and Culture Programs of the Ford Foundation support the establishment of a blue ribbon National Commission on Testing and Public Policy to investigate some of the major problems as well as the untapped opportunities created by recent trends in the use of standardized tests particularly in the workplace and in schools *English Language Proficiency Testing in Asia* Lily I-Wen Su, Cyril J.

Handbook of College Reading and Study Strategy Research , *The Fractured Marketplace for Standardized Testing* Walter M. Haney, George F. Madaus, Robert Lyons, 2012-12-06 Standardized testing in the United States has been increasing at a rapid pace in the last twenty five years

The market for tests has not only been expanding rapidly but has also been changing sharply in structure into a fractured marketplace. Indeed one of the main features of this book is that the market for standardized testing is highly fractured with segments of the market facing monopoly conditions others facing oligopoly conditions and still others where near free market conditions exist. One of the main premises of the book is that the structures of markets have strong implications for how those markets perform. While this notion is widely accepted among economists it is not widely appreciated in educational research. A second motivation for the book is that very little scholarly attention has been focused on the standardized testing industry. This topic the structure of the testing industry and implications for the quality of tests and test use affects how we evaluate the learning of students the effectiveness of teaching the quality of schools and the educational health of the nation. Of particular concern to the authors is one vital aspect of test quality test validity. This book is the most current and authoritative review and analysis of the market for standardized testing.

Assessment, Equity, and Opportunity to Learn Pamela A. Moss, Diana C. Pullin, James Paul Gee, Edward H. Haertel, Lauren Jones Young, 2008-04-07 Providing all students with a fair opportunity to learn OTL is perhaps the most pressing issue facing U S education. Drawing on socio cultural sociological psychometric and legal perspectives this book provides historical critique theory and principles and concrete examples of practice through which learning teaching and assessment can be re envisioned to support fair OTL for all students. It offers educators researchers and policy analysts new to socio cultural perspectives an engaging introduction to fresh ideas for conceptualizing enhancing and assessing OTL encourages those who already draw on socio cultural resources to focus attention on OTL and assessment and nurtures collaboration among members of discourse communities who have rarely engaged one another's work.
