Teutonic Knights A Military History:

The Teutonic Knights William L. Urban, 2005 Feared by their enemies but respected by medieval Christendom the Teutonic Knights and their Order maintained a firm hold over the Baltic and northern Germany and established a formidable regime which flourished across Central Europe for 300 years This book surveys the Knights and their Order Originally published 2003 The Germans and the East Charles W. Ingrao, Franz A. J. Szabo, 2008 The editors present a collection of 23 historical papers exploring relationships between the Germans necessarily adopting different senses of the term for different periods or different topics and their immediate neighbors to the East The eras discussed range from the Middle Ages to European integration Examples of specific topics addressed include the Teutonic order in the development of the political culture of Northeastern Europe during the Middle ages Teutonic Balt relations in the chronicles of the Baltic Crusades the emergence of Polenliteratur in 18th century Germany German colonization in the Banat and Transylvania in the 18th century changing meanings of German in Habsburg Central Europe German military occupation and culture on the Eastern Front in Word War I interwar Poland and the problem of Polish speaking Germans the implementation of Nazi racial policy in occupied Poland Austro Czechoslovak relations and the post war expulsion of the Germans and narratives of the lost German East in Cold War West Germany A Cumulative Bibliography of Medieval Military History and Technology Kelly DeVries, 2008 This is the second update of A Cumulative Bibliography of Medieval Military History and Technology which appeared in 2002 It is meant to do two things to present references to works on medieval military history and technology not included in the first two volumes and to present references to all books and articles published on medieval military history and technology from 2003 to 2006 These references are divided into the same categories as in the first two volumes and cover a chronological period of the same length from late antiquity to 1648 again in order to present a more complete picture of influences on and from the Middle Ages It also continues to cover the same geographical area as the first and second volume in essence Europe and the Middle East or again influences on and from this area The languages of these bibliographical references reflect this geography *Journal of Medieval Military History: Volume XXI* Kelly DeVries, Clifford J. Rogers, John France, 2023-06-06 The leading academic vehicle for scholarly publication in the field of medieval warfare Medieval Warfare The twenty first volume of the Journal of Medieval Military History begins with three studies examining aspects of warfare in the Latin East an archaeological report on the defenses of Jerusalem by Shimon Gibson and Rafael Y Lewis a study of how military victories and defeats viewed through the lens of carefully shaped reporting affected the reputation and the flow of funds and recruits to the Military Orders by Nicolas Morton and an exploration of how the Kingdom of Jerusalem quickly recovered its military strength after the disaster of Hattin by Stephen Donnachie Turning to the other side of the Mediterranean Donald J Kagay analyzes how Jaime I of Aragon worked to control violence within his realms by limiting both castle construction and the use of mechanical artillery Guilhem P pin also addresses the limitation of

violence using new documents to show that the Black Prince's sack of Limoges in 1370 was not the unrestrained bloodbath described by Froissart. The remaining three contributions deal with aspects of open battle. Michael John Harbinson offers a large scale study of when and why late medieval men at arms chose to dismount and fight on foot instead of acting tactically as cavalry. Laurence W. Marvin reconsiders the Battle of Bouvines concluding that it was far from being a ritualized mass duel. Finally Michael Livingston elucidates some principles for understanding medieval battles in general and the battle of Agincourt in particular.

Journal of Medieval Military History John France, Kelly DeVries, Clifford J. Rogers, 2019-05-17
This volume focuses on two of the most vibrant areas of research in the field: Crusader studies and the warfare of the Late Middle Ages embracing a diversity of approaches. Chapters look at the battle of Tell Bashir 1108 in the context of Saljuq politics; the defenses of Altit castle, one of the Templars' strongest fortifications from an archaeological perspective; the involvement of the Military Orders in secular conflicts particularly in Europe and how royal women affected and were affected by the wars of Castile and the Crown of Aragon in the fourteenth century; Fencing competitions are used to explore masculinity and status in Strasbourg from the late Middle Ages into the early modern period; and key aspects of the actual conduct of warfare in the fifteenth century come under detailed scrutiny: the role of cavalry in turning the Hundred Years War in favour of the French and the logistical and procurement difficulties and methods involved in fielding a Florentine army in 1498. The volume is completed with a translation and discussion of Guillaume Guiart's rich description of a French royal army on the march and in camp at the start of the fourteenth century.

A Cumulative Bibliography of Medieval Military History and Technology, Update 2004 Kelly DeVries, 2004-12-01
This is the first update of *A Cumulative Bibliography of Medieval Military History and Technology* which appeared in 2002. It is meant to do two things: to present references to works on medieval military history and technology not included in the first volume and to present references to all books and articles published on medieval military history and technology from 2000 to 2002. These references are divided into the same categories as in the first volume and cover a chronological period of the same length from late antiquity to 1648 again in order to present a more complete picture of influences on and from the Middle Ages. It also continues to cover the same geographical area as the first volume: in essence Europe and the Middle East or again influences on and from this area. The languages of these bibliographical references reflect this geography.
