**Text and Tagmeme** Kenneth Lee Pike, Evelyn G. Pike, 1983 Pillars in the History of Biblical Interpretation, Volume 3 Stanley E. Porter, Zachary K. Dawson, 2021-06-07 This third volume like its predecessors adds to the growing body of literature concerned with the history of biblical interpretation With eighteen essays on nineteen biblical interpreters volume 3 expands the scope of scholars both traditional and modern covered in this now multivolume series Each chapter provides a biographical sketch of its respective scholar s an overview of their major contributions to the field explanations of their theoretical and methodological approaches to interpretation and evaluations and applications of their methods By focusing on the contexts in which these scholars lived and worked these essays show what defining features qualify these scholars as pillars in the history of biblical interpretation While identifying a scholar as a pillar is somewhat subjective this volume defines a pillar as one who has made a distinctive contribution by using and exemplifying a clear method that has pushed the discipline forward at least within a given context and time period This volume is ideal for any class on the history of biblical interpretation and for those who want a greater understanding of how the field of biblical studies has developed and how certain interpreters have played a formative role in that development Modeling Biblical Language Stanley E. Porter, Gregory P. Fewster, Christopher D. Thematic Development of English Texts Mohsen Ghadessy,1995-01-01 This text discusses the concept of theme and its application as an analytical tool to a number of spoken and written registers of English To date studies of text organization have paid less attention to what is called the method of development of a text that is thematic organization The book shows that the study of this organization can reveal many different strategies employed by speakers and writers when texts are created

*A Textlinguistic Analysis of Selected Old Testament Texts in Matthew 1-4* Jeffery L. Capshaw,2004 While providing exciting research opportunities the New Testament s use of the Old Testament continues to create interpretive difficulties Although Matthew s use of the Old Testament generated much scholarly discussion throughout the historical critical period during the contemporary period specific interest in Matthew s Old Testament usage seemed to decrease Recently however many powerful analytical approaches have come to the fore in biblical studies including various text centered methods such as textlinguistics also known as discourse analysis This book applies one specific type of discourse grammar to several Old Testament citations in Matthew s Gospel This analysis is presented both to initiate discussion and to show how this and similar methods might be utilized to contribute important perspectives on the New Testament s use of the Old Testament

*Patterns of Text* Mike Scott,Geoff Thompson,2001-02-27 It is increasingly clear that in order to understand language as a phenomenon we must understand the phenomenon of text Our primary experience of language comes in the form of texts which embody the complete communicative events through which our language using lives are lived These events are shaped by communicative needs and this shaping is reflected in certain characteristic patterns in the texts However the nature of texts and text is still elusive we know which forms are typically found in text but we do not yet have a full grasp of how they constitute its textuality how they make a text tick The twelve contributions to this volume show how texts across a wide range of text types hold together by different patterns of chunking and linking The common purpose in all the contributions is to explore the nature of text patterning as the functional environment within which language operates

Current issues in the analysis of Semitic grammar and lexicon Lutz Edzard,     **Relevance and Linguistic Meaning** Diane Blakemore,2002-09-26 The importance of discourse markers words like so however and well lies in the theoretical questions they raise about the nature of discourse and the relationship between linguistic meaning and context They are regarded as being central to semantics because they raise problems for standard theories of meaning and to pragmatics because they seem to play a role in the way discourse is understood In this new and important study Diane Blakemore argues that attempts to analyse these expressions within standard semantic frameworks raise even more problems while their analysis as expressions that link segments of discourse has led to an unproductive and confusing

exercise in classification She concludes that the exercise in classification that has dominated discourse marker research should be replaced by the investigation of the way in which linguistic expressions contribute to the inferential processes involved in utterance understanding

**Discourse as Structure and Process** Teun A. van Dijk, 1997 What are the structures of discourse and what are the functions of these structures in the communicative context This volume explains how and why discourse is organized at various levels The multidisciplinary contributions illustrate that discourse analysis goes far beyond the linguistic answer of designing grammars and goes hand in hand with the study of their uses and functions in the social context Comprehensive and accessible the volume covers a huge variety of discourse genres including written and spoken and storytelling and argumentation The chapters also illustrate the necessity to examine the mental processes of the language users How do people go about producing understanding and remembering text or talk The book stresses that both discourse and its mental processing have a social basis and can only be fully understood in relation to social interaction

*Linguistics and Biblical Hebrew* Walter Ray Bodine, 1992 The essays in this volume arose out of the Society of Biblical Literature section on linguistics and Biblical Hebrew and have been selected to provide a summary and statement of the state of the question with regard to a number of areas of investigation The sixteen articles are organized into sections on phonology morphology syntax semantics discourse analysis historical comparative linguistics and graphemics

*Text-Linguistics and Biblical Hebrew* David Allan Dawson, 2015-01-29 Modern linguistics is a relative newcomer in the scientific world and text linguistics or discourse analysis is one of its youngest disciplines This fact has inclined many toward scepticism of its value for the Hebraist yet much benefit is thereby overlooked In this work the author examines recent contributions to Hebrew text linguistics by Niccacci Andersen Eskhult Khan and Longacre evaluating them against a twofold standard of theoretical and methodological integrity and clarity of communication An extensive introduction to one particularly promising model of text analysis from Longacre's tagmemic school is given and a step by step methodology is presented Analyses according to this model and methodology are given of seven extended text samples each building on the findings of the previous analyses Judg 2 Lev 14 1 32 Lev 6 1 7 37 parallel instructions and historical reports about the building of the Tabernacle from Exodus 25 40 Judg 10 6 12 7 and the book of Ruth in its entirety Considerable attention is given to the question of text linguistics and reported speech
