Types and Corpora Andreas Fischer, Gunnel Tottie, Hans Martin Lehmann, 2002 **Dimensions of Register Variation**

Douglas Biber, 1995-08-31 Douglas Biber's new book extends and refines the research and methodology reported in his ground breaking *Variation Across Speech and Writing* CUP 1988 In *Dimensions of Register Variation* he gives a linguistic analysis of register in four widely differing languages English Nukulaelae Tuvaluan Korean and Somali Using the multi dimensional analytical framework employed in his earlier work Biber carries out a principled comparison of both synchronic and diachronic patterns of variation across the four languages Striking similarities as well as differences emerge allowing Biber to predict for the first time cross linguistic universals of register variation This major new work will provide the foundation for the further investigation of cross linguistic universals governing the pattern of discourse variation across registers and will be of wide interest to any scholar interested in style register and literacy **Corpus Linguistics. Volume 2** Anke Lüdeling, Merja Kytö, 2009-03-26 This handbook provides an up to date survey of the field of corpus linguistics a field whose methodology has revolutionized much of the empirical work done in most fields of linguistic study over the past decade Corpus linguistics investigates human language by starting out from large collections of texts spoken written or recorded These language corpora which are now regularly available in electronic form are the basis for quantitative and qualitative research on almost any question of linguistic interest Many techniques that are in use in corpus linguistics today are rooted in the tradition of the late 18th and 19th century when linguistics began to make use of mathematical and empirical methods Modern corpus linguistics has used and developed these methods in close connection with computer science and computational linguistics The handbook sketches the history of corpus linguistics shows its potential discusses its problems and describes various methods of collecting annotating and searching corpora as well as processing corpus data It also reports case studies that illustrate the wide range of linguistic research questions addressed in corpus linguistics The over 60 articles included in the handbook are divided into five sections 1 the origins and history of corpus linguistics and

surveys of its relationship to central fields of linguistics 2 corpus compilation 3 corpus types 4 preprocessing of corpora 5 the use and exploitation of corpora The final section gives an overview of the results of corpus studies obtained in phonetics phonology morphology syntax semantics sociolinguistics historical linguistics stylometry dialectology and discourse analysis It also reports on recent advances made in human and machine translation contrastive studies computer assisted language learning and automatic summarization The contributors to the volume are internationally known experts in their respective fields The handbook is intended for a wide audience ranging from teachers university students and scholars to anyone interested in the use of computers in linguistic analyses and applications *Targeting Writing Across the Curriculum*

Merryn Whitfield, 2001 *Targeting across the curriculum* book 3 upper primary **English Historical Linguistics 2008: Words, texts and genres** Ursula Lenker, Hans Sauer, Judith Huber, Gaby Waxenberger, Robert Mailhammer, 2010 The fifteen papers selected for Volume II of *English Historical Linguistics 2008* have a different emphasis than those in Volume I CILT 314 Lenker et al 2010 Nine concentrate on the development of the English vocabulary and six on historical text linguistics including the development of text types and of politeness strategies Of those in the former group three have their emphasis on etymology three on semantic fields and three on word formation although some cover more than one of these areas The topics include the treatment of etymological problems in the OED deverbal derivations formed from native verbs and from loan verbs the role of metaphor and metonymy in the evolution of word fields The field of historical text linguistics is introduced by a general survey which is followed by more specific studies focussing on 15th century legal and administrative texts from Scotland on early 15th century women's mystical writings on medical recipes from the 16th to the 18th centuries and on pauper letters from 18th century Essex The book should appeal to scholars interested in English etymology the history of semantic fields and of word formation as well as in historical text linguistics politeness strategies and standardization It provides not only theoretical considerations but also a wealth of case studies **Rendering Chinese**

Types of Variation Terttu Nevalainen,Juhani Klemola,Mikko Laitinen,2006-06-01 This volume interfaces three fields of linguistics rarely discussed in the same context Its underlying theme is linguistic variation and the ways in which historical linguists and dialectologists may learn from insights offered by typology and vice versa The aim of the contributions is to raise the awareness of these linguistic subdisciplines of each other and to encourage their cross fertilization to their mutual benefit If linguistic typology is to unify the study of all types of linguistic variation this variation both diatopic and diachronic will enrich typological research itself With the aim of capturing

the relevant dimensions of variation the studies in this volume make use of new methodologies including electronic corpora and databases which enable cross and intralinguistic comparisons dialectally and across time Based on original research and unified by an innovative theme the volume will be of interest to both students and teachers of linguistics and Germanic languages
