BY
MARK STEWART

A close-up photograph of Terrell Davis, a former NFL player, smiling broadly. He is wearing a dark blue Denver Broncos jersey with orange and white stripes on the sleeves. The word "BRONCOS" is visible on the front of the jersey. He is also wearing a dark blue baseball cap with an orange stripe. The background is blurred, showing stadium lights and other players in similar uniforms.

recognition of pain relief as a basic human right However as Susan Honeyman argues in this new take on child pain and invisible disability such a belief has historically been driven by adult ideological needs whereas the needs of children in pain have traditionally been marginalised or overlooked in comparison Examining migraines in children and the socially disabling effects that chronic pain can have this book uses medical political and cultural discourse to convey a sense of invisible disability in children with migraine and its subsequent oppression within educational and medical policy The book is supported by authentic migraineurs experiences and first hand interviews as well as testimonials from a range of historical literary and medical sources never combined in a child centred context before Representations of child pain and lifespan migraine within literature art and popular culture are also pulled together in order to provide an interdisciplinary guide to those wanting to understand migraine in children and the identity politics of disability more fully Child Pain Migraine and Invisible Disability will appeal to scholars in childhood studies children s rights literary and visual culture disability studies and medical humanities It will also be of interest to anyone who has suffered from migraines or has cared for children affected by chronic pain
