Territories Of Difference:

Territories of Difference Arturo Escobar, 2008-11-26 Through analysis of the Colombian Pacific's geography, peoples and environment Escobar questions the place assigned to epistemology, politics and the economy in modernity, arguing that hierarchical privilege can be subverted via activists' entanglement.

Cracking the code UNESCO, 2017-09-04 This report aims to crack the code by deciphering the factors that hinder and facilitate girls and women's participation, achievement and continuation in science, technology, engineering and mathematics (STEM) education and, in particular, what the education sector can do to promote girls and women's interest in and engagement with STEM education and ultimately STEM careers.

Key Issues in Hunter-Gatherer Research Linda J. Ellanna, Ernest S. Burch, 2020-08-25 Hunter-gatherer research has experienced enormous expansion over the past three decades. In the late 1950s, less than a score of anthropologists were actively engaged in issue-oriented studies of foraging populations. Since then, the number of active researchers has grown into the hundreds. This book offers the most up-to-date anthology of papers on hunter-gatherer research and contains possibly the most comprehensive bibliography on hunter-gatherers ever published. It will be essential reading for all students of hunter-gatherer societies.

Life Imaginaries, Environmental Rationality, and Dialogue of Savoirs Enrique Leff, 2024-09-16 Shifting from the idea that our current environmental question arises from the history of metaphysics and its focus on Being over Life and the attendant explorations of the thought of Heidegger and Heraclitus, this book unfolds a philosophical and sociological proposal for transitioning toward the sustainability of life. With a focus on the imaginaries of life of indigenous peoples, it moves from political ecology to a political ontology centered on the territorial, cultural and existential rights of various peoples of the Earth. Arguing for an environmental rationality founded on three principles: the diversity of life, a politics of difference and an ethics of otherness, it calls for a dialogue of knowledge in a world of manifold worlds for an historical transition toward sustainability of life on our planet. It will therefore appeal to scholars of sociology, philosophy and political theory working on questions of social and environmental justice, sustainability and alternatives to capitalism.

New Approaches to Latin American Studies Juan Poblete, 2025-05-30 *New Approaches to Latin American Studies: Culture and Power Vol 2* provides an examination of the new and defining approaches that have emerged in the field of Latin American Studies in the last decade since 2014. Like its predecessor, this second volume of *New Approaches to Latin American Studies* is organized using the concept of a turn, as in linguistic or cultural turn, and aims to help both students and faculty in an eminently interdisciplinary space like Latin American Studies find new ways of conceptualizing objects and research. Original contributions from experts in their fields provide a discussion that is not meant to be fully comprehensive but concentrates instead on key authors and key texts. In each chapter, the keyword that defines the turn functions as a specific limit that contains the proliferation of references and connections, restricting them to the trajectory of such turn. This second volume includes 11 new chapters.

covering important transformations during the last decade on the issues perspectives and stakes of the field This book is an expert produced reliable and reader friendly orientation to the many new areas of research Latin American Studies now encompasses and evidence of the dynamism of this complex field
