Erosion and Its Control in Oklahoma Territory Angus Henry McDonald, 1938 Handbook of the Territory of Papua Miles Staniforth Carter Smith, 1927 The Routledge Handbook of Indigenous Development Katharina Ruckstuhl, Irma A. Velásquez Nimatuj, John-Andrew McNeish, Nancy Postero, 2022-11-30 This Handbook inverts the lens on development asking what Indigenous communities across the globe hope and build for themselves In contrast to earlier writing on development this volume focuses on Indigenous peoples as inspiring theorists and potent political actors who resist the ongoing destruction of their livelihoods To foster their own visions of development they look from the present back to Indigenous pasts and forward to Indigenous futures Key questions How do Indigenous theories of justice sovereignty and relations

between humans and non humans inform their understandings of development How have Indigenous people used Rights of Nature legal pluralism and global governance systems to push for their visions How do Indigenous relations with the Earth inform their struggles against natural resource extraction How have native peoples negotiated the dangers and benefits of capitalism to foster their own life projects How do Indigenous peoples in diaspora and in cities around the world contribute to Indigenous futures How can Indigenous intellectuals artists and scientists control their intellectual property and knowledge systems and bring into being meaningful collective life projects The book is intended for Indigenous and non Indigenous activists communities scholars and students It provides a guide to current thinking across the disciplines that converge in the study of development including geography anthropology environmental studies development studies political science and Indigenous studies *North-west Territory* Henry Youle Hind, Canada. Global Energy Interconnection Zhenya Liu, 2015-08-28 Global energy network is an important platform to guarantee effective exploitation of global clean energy and ensure reliable energy supply for everybody Global Energy Interconnection analyzes the current situation and challenges of global energy development provides the strategic thinking overall objective basic pattern construction method and development mode for the development of global energy network Based on the prediction of global energy and electricity supply and demand in the future with the development of UHV AC DC and smart grid technologies this book offers new solutions to drive the safe clean highly efficient and sustainable development of global energy The concept and development ideas concerning global energy interconnection in this book are based on the author's thinking of strategic issues about China's and the world's energy and electricity development for many years especially combined with successful practices of China's UHV development This book is particularly suitable for researchers and graduated students engaged in energy sector as well as energy economics researchers economists consultants and government energy policy makers in relevant fields Based on the author's many years experience in developing Smart Grid solutions within national and international projects Combines both solid background information and cutting edge technology progress coupled with a useful and impressive list of references The key energy problems which are challenging us nowadays are well stated and explained in this book which facilitates a better understanding of the development of global energy interconnection with UHV AC DC and smart grid technologies *Physical Land Survey*, 1942 *Power Struggles* Jaume Franquesa Bartolome, 2018-04-23 Wind energy is often portrayed as a panacea for the environmental and political ills brought on by an overreliance on fossil fuels but this characterization may ignore the impact wind farms have on the regions that host them *Power Struggles* investigates the uneven allocation of risks and benefits in the relationship between the regions that produce this energy and those that consume it Jaume Franquesa considers Spain a country where wind now constitutes the main source of energy production In particular he looks at the Southern Catalonia region which has traditionally been a source of energy production through nuclear reactors dams oil refineries and gas and electrical lines

Despite providing energy that runs the country the region is still forced to the political and economic periphery as the power they produce is controlled by centralized international Spanish corporations Local resistance to wind farm installation in Southern Catalonia relies on the notion of dignity the ability to live within one's means and according to one's own decisions Power Struggles shows how without careful attention renewable energy production can reinforce patterns of exploitation even as it promises a fair and hopeful future **Identity, Territories, and Sustainability** Salvatore Monaco, 2024-07-12 Addressing the urgent need to tackle the global challenges of poverty inequality and environmental degradation this is highly valuable reading for those interested in implementing sustainable development strategies across a variety of contexts
