Thomas, Robert Murray Thomas, 2008 This book has a dual purpose to identify problems faced by people who teach in correctional institutions and to propose solutions for those problems The intent of this book is to help both new instructors as well as current ones perform their jobs effectively The book is divided into three parts The first part introduces the reader to the field of correctional education describing correctional efforts in America the kinds of facilities the inmate populations and the controversies including advocates and critics over providing educational opportunities A description is provided on the kinds of educational and rehabilitation programs including the varieties and sources of teachers and administrators Part two explores the teaching process and how students are analyzed on their abilities learning disorders gender ethnicity gang membership length of imprisonment and reasons for enrolling in

educational programs Each chapter is divided into two major sections the first section studies the perspective and the second section concerns problems and solutions Each problem is posed as a brief case study that includes the nature of a particular problem factors affecting decisions about what a teacher might do and one or more proposed solutions Part three summarizes key concepts from the previous chapters and speculates about the state of correctional education in the years ahead It will be of interest to those who contemplate a career in correctional education those who are already in correctional education or those who simply want to learn what teaching in a prison jail or juvenile facility is all about **Social**

Inequality Kathryn Neckerman,2004-06-18 Inequality in income earnings and wealth has risen dramatically in the United States over the past three decades Most research into this issue has focused on the causes global trade new technology and economic policy rather than the consequences of inequality In *Social Inequality* a group of the nation's leading social scientists opens a wide ranging inquiry into the social implications of rising economic inequality Beginning with a critical evaluation of the existing research they assess whether the recent run up in economic inequality has been accompanied by rising inequality in social domains such as the quality of family and neighborhood life equal access to education and health care job satisfaction and political participation Marcia Meyers and colleagues find that many low income mothers cannot afford market based child care which contributes to inequality both at the present time by reducing maternal employment and family income and through the long term consequences of informal or low quality care on children's educational achievement At the other end of the educational spectrum Thomas Kane links the growing inequality in college attendance to rising tuition and cuts in financial aid Neil Fligstein and Taek Jin Shin show how both job security and job satisfaction have decreased for low wage workers compared with their higher paid counterparts Those who fall behind economically may also suffer diminished access to essential social resources like health care John Mullahy Stephanie Robert and Barbara Wolfe discuss why higher inequality may lead to poorer health wider inequality might mean increased stress related ailments for the poor and it might also be associated with public health care policies that favor the privileged On the political front Richard Freeman concludes that political participation has become more stratified as incomes have become more unequal Workers at the bottom of the income scale may simply be too hard pressed or too demoralized to care about political participation *Social Inequality* concludes with a comprehensive section on the methodological problems involved in disentangling the effects of inequality from other economic factors which will be of great benefit to future investigators While today's widening inequality may be a temporary episode the danger is that the current economic divisions may set in motion a self perpetuating cycle of social disadvantage The most comprehensive review of this quandary to date *Social Inequality* maps out a new agenda for research on inequality in America with important implications for public policy **Essentials of Research Methods for Educators** Anastasia Kitsantas,Timothy J. Generation Dan Zuberi,2015-01-01 Public schools are among the most important institutions in North American communities especially in disadvantaged urban neighbourhoods At their best they enable students to overcome challenges like poverty by providing vital literacy and numeracy skills At their worst they condemn students to failure both economically and in terms of preparing them to be active participants in a democratic society In *Schooling the Next Generation* Dan Zuberi documents the challenges facing ten East Vancouver elementary schools in diverse lower income communities as well as the ways their principals teachers and parents are overcoming these challenges Going beyond the facade of standardized test scores Zuberi identifies the kinds of school and community programs that are making a difference and could be replicated in other schools At the same time he calls into question the assumptions behind a test score driven search for successful schools Focusing on

early literacy and numeracy skills mastery Schooling the Next Generation presents a slate of policy recommendations to help students in urban elementary schools achieve their full potential
