include testimony the nature and credibility of science rhetoric and dialectical argumentation The Second Edition further develops and refines these innovations combining in depth discussion of fake news and conspiracy theories with exercises and projects designed to teach broadly applicable source assessment skills There is also a more nuanced positive account of science that emphasizes its continuity with commonsense causal reasoning For instructors there are additional online resources notably banks of exam questions with solutions and various class projects Key Features Uses contemporary psychological explanations and remedies for pervasive errors in belief formation No other critical thinking text generally applies this psychological approach Rigorously addresses the evaluation of premises based on testimony in particular the testimony of internet sources Carefully explains the concept of validity paying particular attention to distinguishing logical possibility from other species of possibility Uses frequency trees as a simple and reliable alternative to more complicated Bayesian methods Uses arguments maps which improve students reasoning and argument evaluation Key Updates to the Second Edition Expanded discussion of the psychology of reasoning and belief including treatment of motivated reasoning Uses a conventional truth table based approach to propositional logic while incorporating a more intuitive psychologically informed approach to the logic of conditionals New Summary Boxes Enhanced treatment of testimony with an expanded discussion of fake news conspiracy theories and the application of general epistemic principles to navigate the extremes of gullibility and unmotivated skepticism New exercises that emphasize practical hands on source assessment skills An improved discussion of the nature of science emphasizing the central role of causal inference and the multi generational cumulative character of scientific knowledge A new Index of Arguments summarizing the most common argument forms and associated defeaters for the inductive forms New online content including exams and additional questions plus solutions suitable for upload to course management software e g Blackboard etc For online resources for students and instructors use the Instructor Student Resources and Support Material links below
