*Beyond Language Learning Instruction: Transformative Supports for Emergent Bilinguals and Educators* Slapac, Alina, Coppersmith, Sarah A., 2019-11-22 Educators all over the world are being challenged to provide effective instruction for culturally and linguistically diverse learners and immigrant communities while valuing and celebrating students' cultural backgrounds. This task requires training professional development cultural sensitivity and responsibility to promote positive outcomes. *Beyond Language Learning Instruction: Transformative Supports for Emergent Bilinguals and Educators* is a critical research publication that bridges linguistics theory and practice and comprehensively addresses all fundamentals of linguistics through the English language learning lens. Featuring topics such as curriculum design, immigrant students, and professional development, this book is essential for educators, academicians, administrators, curriculum designers, instructional designers, researchers, policymakers, and students.

*The Routledge Handbook of Second Language Research in Classroom Learning* Ronald P. Leow, 2019-02-11 The Routledge Handbook of Second Language Research in Classroom Learning is a comprehensive psycholinguistic approach to the issue of instructed language learning that is uniquely theoretical, methodological, empirical, pedagogical, and curricular. Bringing together empirical studies with theoretical underpinnings, this handbook focuses on conceptual replications, extensions of, and new research on classroom learning or Instructed SLA (ISLA). In chapters from leading experts, the Handbook reports on the tenets of several models that have postulated the roles of cognitive processes in the L2 learning process and also covers two major methodological data elicitation procedures to be employed in addressing learner cognitive processes: think aloud protocols and eye tracking. With a dedicated interest in the role of this research in pedagogical ramifications, this handbook strives for deeper understanding of how L2 learners process L2 data in instructional settings.

*Computational Thinking for the Modern Problem Solver* David D. Riley, Kenny A. Hunt, 2014-03-27 Through examples and analogies, *Computational Thinking for the Modern Problem Solver* introduces computational thinking as part of an introductory computing course and shows how computer science concepts are applicable to other fields. It keeps the material accessible and relevant to noncomputer science majors. With numerous color figures, this classroom-tested book focuses on both foundational computer science concepts and engineering topics. It covers abstraction, algorithms, logic, graph theory, social issues of software, and numeric modeling, as well as execution control, problem solving strategies, testing, and data encoding and organizing. The text also discusses fundamental concepts of programming, including variables and assignment, sequential execution, selection, repetition, control, abstraction, data organization, and concurrency. The authors present the algorithms using language-independent notation.
