Testing Qcd Through Spin Observables In Nuclear Targets Unviersity Of Virginia 1820 April :

Testing QCD Through Spin Observables in Nuclear Targets Don G. Crabb, Donal B. Day, 2003 This volume contains the invited talks and contributed papers presented at the workshop on Testing QCD Through Spin Observables in Nuclear Targets held at the University of Virginia in April 2002 The workshop was proposed in the context of the large number of experiments that have used polarized deuterons or polarized ^3He to extract information about the spin parameters of the neutron The motivation for this workshop was to study the effects of the nuclear medium on the spin properties of the bound nucleon and to explore issues in QCD that might be resolved through spin observables in nuclear targets What is the effect of the nuclear medium on the measured asymmetries How have the latest results on the spin structure of the nucleon and the nucleon form factors changed our thinking What advances are anticipated in the development of polarized targets

Testing Quantum Chromodynamics with Antiprotons S. Brodsky, 2004 The antiproton storage ring HESR to be constructed at GSI will open up a new range of perturbative and nonperturbative tests of QCD in exclusive and inclusive reactions I discuss 21 tests of QCD using antiproton beams which can illuminate novel features of QCD The proposed experiments include the formation of exotic hadrons measurements of timelike generalized parton distributions the production of charm at threshold transversity measurements in Drell Yan reactions and searches for single spin asymmetries The interactions of antiprotons in nuclear targets will allow tests of exotic nuclear phenomena such as color transparency hidden color reduced nuclear amplitudes and the non universality of nuclear antishadowing The central tool used in these lectures are light front Fock state wavefunctions which encode the bound state properties of hadrons in terms of their quark and gluon degrees of freedom at the amplitude level The freedom to choose the light like quantization four vector provides an explicitly covariant formulation of light front quantization and can be used to determine the analytic structure of light front wave functions QCD becomes scale free and conformally symmetric in the analytic limit of zero quark mass and zero beta function This conformal correspondence principle determines the form of the expansion polynomials for distribution amplitudes and the behavior of non perturbative wavefunctions which control hard exclusive processes at leading twist The conformal template also can be used to derive commensurate scale relations which connect observables in QCD without scale or scheme ambiguity The AdS CFT correspondence of large N sub C supergravity theory in higher dimensional anti de Sitter space with supersymmetric QCD in 4 dimensional space time has important implications for hadron phenomenology in the conformal limit including the nonperturbative derivation of counting rules for exclusive processes and the behavior of structure functions at large x sub b_j String gauge duality also predicts the QCD power law fall off of light front Fock state hadronic wavefunctions with arbitrary orbital angular momentum at high momentum transfer I also review recent work which shows that the diffractive component of deep inelastic scattering single spin asymmetries as well as nuclear shadowing and antishadowing cannot be computed from the LFWFs of hadrons in isolation

Unveiling the Power of Verbal Beauty: An Emotional Sojourn through **Testing Qcd Through Spin Observables In Nuclear Targets Unviersity Of Virginia 1820 April**

In some sort of inundated with monitors and the cacophony of quick communication, the profound power and psychological resonance of verbal artistry usually fade into obscurity, eclipsed by the continuous onslaught of sound and distractions. However, situated within the musical pages of **Testing Qcd Through Spin Observables In Nuclear Targets Unviersity Of Virginia 1820 April**, a captivating perform of fictional beauty that pulses with organic thoughts, lies an wonderful journey waiting to be embarked upon.
