Impact Behaviour of Fibre-reinforced Composite Materials and Structures S.R. Reid, G. Zhou, 2000-10-31 Much of the early pioneering work on the properties of composites under impact is still conceptually relevant yet the results of many such analyses are outdated The accuracy of these results depend specifically on the materials used fibre resin interface and method of fabrication Development of new materials cost effective design and analysis and prediction of structural behaviour have all established a need for timely wide ranging research on impact

behaviour Impact Behaviour of Fibre Reinforced Composite Materials and Structures brings together for the first time state of the art research from the most recent works of leading international experts An important new study this book extensively investigates impact response damage tolerance and failure of fibre reinforced composite materials and structure from a number of expert viewpoints This book explores the nature of modern polymer composites based on glass carbon aramid ceramic and polymer fibres in a polymer matrix and details various ways of analysing the impact process Impact Behaviour of Fibre Reinforced Composite Materials and Structures will prove itself a valuable tool for research and development engineers structural engineers materials scientists designers and students and researchers of related disciplines

Laminar Composites George Staab, 1999-07-08 This text provides students with the theoretical knowledge and practical skills necessary to identify model and solve structural analysis problems The material is illustrated throughout with numerous diagrammatic examples as well as example problems similar in nature to those found in lower level strength of materials texts The difficulty of these and the homework problems varies from simple to complex A solutions manual is provided for lecturers who adopt the book for classroom teaching This book mirrors the teaching method used in strength of materials courses taught in the first years of an undergraduate degree and relate this higher level treatment back to that The author is involved in the development of the latest teaching methods with McGraw Hill and his style is straightforward There is web mounted software to back up the book's content plus a solutions manual for instructors There are approximately 20-30 homework problems per chapter making a substantial body of material for teaching use Mirrors the teaching method used in strength of materials courses Straightforward and user friendly writing style Web mounted software and solutions manual for instructors
