High-Stakes Language Testing Daniel Xerri, Patricia Vella Briffa, 2018-04-27 This book advocates that teachers should play an active role in high stakes language testing and that more weight should be given to teacher judgement This is likely to increase the formative potential of high stakes tests and provide teachers with a sense of ownership The implication is that the knowledge and skills they develop by being involved in these tests will feed into their own classroom practices The book also considers the arguments against teacher involvement e g the contention that teacher involvement might entrench the practice of teaching to the test or that teachers should not be actively involved in high stakes language testing because their judgement is insufficiently reliable Using contributions from a wide range of international educational contexts the book proposes that a lack of reliability in teacher judgement is best addressed by means of training and not by barring educators from participating in high stakes language testing It also argues that their involvement in testing helps teachers to bolster confidence in their own judgement and develop their assessment literacy Moreover teacher involvement empowers them to play a role in reforming high stakes language testing so that it is more equitable and more likely to enhance classroom practices High stakes language tests that adopt such an inclusive approach facilitate more effective learning on the part of teachers which ultimately benefits all their students Understanding and Using the Naglieri General Ability Tests Dina Brulles, Kim Lansdowne, Jack Naglieri, 2022-10-25 An accessible guide to identifying gifted students and creating equity and inclusion within gifted programs The Naglieri tests the NNAT series have long been a standard in the field of ability testing Amid the calls for equity and inclusion within gifted education the new Naglieri General Ability Tests aim to meet that need

**Transforming Teacher Education** Valerie Hill-Jackson, Chance W. Lewis, 2023-07-03 Extracts from the text Why are fifteen million children and youth in poverty not achieving when we know that low income students excel in the classrooms of star teachers who comprise approximately 8 percent of the teaching force Whose needs or interests are being met in education reform today In my own institution there has not been a systematic assessment of the effectiveness of the basic teacher education program since the institution was founded over a century ago as a teachers college Imagine not one ever Teachers who empathize with students and the life challenges they face soon realize that the dysfunctional bureaucracies will not permit them to meet the needs of their students Half of the starry eyed beginners are gone in five years or less Why does teacher education focus on the managerial instrumental or delivery system aspects of the profession The expert advice dispensed by schools of education regarding what future teachers should do is not connected to any theory of learning or to any reality of life in school classrooms Why has the recruitment process resulted in a cohort of teachers who are unable to connect with their students Does a qualified teacher equate to a quality teacher The best hope of getting more effective teachers from university teacher preparation programs is to base their budgets on the number of their graduates who serve in challenging schools and their effectiveness with children and youth At the district level the salaries of hiring officials should be based on how well these officials identify and retain quality teachers In this book 12 distinguished scholars provide a hard hitting thoroughly researched historical and theoretical critique of our schools of education and offer clear recommendations on what must be done to ensure all children can achieve their potential and contribute to a vibrant democratic society
