Texts Marina Bondi, Mike Scott, 2010-01-01 This is corpus linguistics with a text linguistic focus The volume concerns lexical inequality the fact that some words and phrases share the quality of being key and thereby reflect or promote important themes in some textual contexts while others do not The patterning of words which differ in their centrality to text meaning is of increasing interest to corpus linguistics At the same time software resources are yielding increasingly more detailed ways of identifying and studying the linkages between key words and phrases in text databases This volume brings together work from some of the leading researchers in this field It presents thirteen studies organized in three sections the first containing a series of studies exploring the nature of keyness itself then a set of five studies looking at keyness in specific discourse contexts and then three studies with an educational focus Edited by two central figures in the development of keyword analysis and with contributions from leading specialists in the field this unique collection brings together a wide range of insights into how keyword analysis can contribute both to linguistic and cultural analysis and to language education It deserves a place on the bookshelves of anyone with an interest in these areas Christopher Tribble King's College London This is a fascinating volume addressing both methodological and theoretical questions in the study of keywords It pushes forward the exploration of the nature of keyness and the interpretation of keywords in their textual contexts An inspiring contribution to a central area of corpus linguistics Michaela Mahlberg University of Nottingham Corpus-based Analyses

of the Problem-Solution Pattern Lynne Flowerdew, 2008-02-06 This book reports research on the Problem Solution rhetorical pattern which has to date received very little attention in corpus based studies Insights from genre analysis and systemic functional grammar are also applied to the analysis of the Problem Solution pattern thus moving towards a more multifaceted analysis of corpus data The pattern is investigated in two specialized corpora of technically oriented report writing a professional corpus and a student corpus using a key word and key key word analysis Phraseological analyses of key words in both corpora are presented Data show that students writing lacks a range of lexico grammatical patternings for expressing the Problem and Solution elements of the pattern The book concludes with some pedagogic implications and applications of the findings Suggested concordancing activities are discussed within the context of key issues in the field of data driven learning *Text, Discourse and Corpora* Michael Hoey, 2007-11-28 Presenting theoretical positions in corpus linguistics *Text Discourse and Corpora* provides an essential overview for advanced undergraduate postgraduate and academic readers

book *Effects and Implications of Pragmatic Competence for Enhancing EFL University Students Written Performance* highlights the effects and implications of the Kurd EFL students lack of pragmatic competence on their written performance. It includes with the written performance of the students at the recognition level and the production level and relies on the results achieved from its instruments the students test the students questionnaire and the lecturers questionnaire. Depending on the results obtained from the tools the study tries to identify and find out the sources of errors in the written performance of the Kurd EFL university students. The book hypothesizes that the inadequacy of the students written performance could be attributed to the curricula and or the students dependence on the grammatical aspects of the foreign language neglecting the pragmatic and the socio cultural dimensions. This gives turn to state that the students written performance is better at the recognition level than the production due to the negative interference of their mother tongue. The book concludes that Kurd EFL learners at the university level face serious difficulties when writing in English. The inappropriateness of their written performance can be attributed to the negative effects of their first language lack of contact with English native speakers and culture as well as the limited opportunities to have been in English speaking communities. Therefore for enhancing EFL university students written performance it is recommended that they should be introduced to the English culture through adding pragmatics and English Culture as two separate subject matters to the curricula and to arrange summer courses for the students in English speaking countries UK and US in particular.
