**Shakespeare as Literary Dramatist** Lukas Erne, 2003-03-13 In this 2003 study Lukas Erne argues that Shakespeare apart from being a playwright who wrote theatrical texts for the stage was also a literary dramatist who produced reading texts for the page The usual distinction that has been set up between Ben Jonson on the one hand carefully preparing his manuscripts for publication and Shakespeare the man of the theatre writing for his actors and audience indifferent to his plays as literature is questioned in this book Examining the evidence from early published playbooks Erne argues that Shakespeare wrote many of his plays with a readership in mind and that these literary texts would have been abridged for the stage because they were too long for performance The variant early texts of Romeo and Juliet Henry V and Hamlet are shown to reveal important insights into the different media for which Shakespeare designed his plays *The Shakespearean Archive* Alan Galey, 2014-10-23 Why is Shakespeare so often associated with information technologies and with the idea of archiving itself Alan Galey explores this question through the entwined histories of Shakespearean texts and archival technologies over the past four centuries In chapters dealing with the archive the book photography sound information and data Galey analyzes how Shakespeare became prototypical material for publishing experiments and new media projects as well as for theories of archiving and computing Analyzing examples of the Shakespearean archive from the seventeenth century to today he takes an original approach to Shakespeare and new media that will be of interest to scholars of the digital humanities Shakespeare studies archives and media history Rejecting the idea that current forms of computing are the result of technical forces beyond the scope of humanist inquiry this book instead offers a critical prehistory of digitization read through the afterlives of Shakespeare s texts Spanish Studies in Shakespeare and His Contemporaries

**Coleridge and Contemplation** Peter Cheyne, 2017-07-25 *Coleridge and Contemplation* is a multi-disciplinary volume on Samuel Taylor Coleridge, founding poet of British Romanticism, critic, and author of philosophical, political, and theological works. In his philosophical writings, Coleridge developed his thinking about the symbolizing imagination, a precursor to contemplation, into a theory of contemplation itself which for him occurs in its purest form as a manifestation of Reason. Coleridge is a particularly challenging figure because he was a thinker in process and something of an omnivore, a Renaissance man of the Romantic era. The dynamic quality of his thinking, the dark fluxion pursued but ultimately unfixable by thought, and his extensive range of interests make a philosophical yet also multi-disciplinary approach to Coleridge essential. This book is the first collection to feature philosophers and intellectual historians writing on Coleridge's philosophy. This volume opens up a neglected aspect of the work of Britain's greatest philosopher-poet, his analysis of contemplation which he considered the highest of human mental powers. Philosophers including Roger Scruton, David E. Cooper, Michael McGhee, Andy Hamilton, and Peter Cheyne contribute original essays on the philosophical, literary, and political implications of Coleridge's views. The volume is edited and introduced by Peter Cheyne, and Baroness Mary Warnock contributes a foreword. The chapters by philosophers are supported by new developments in philosophically minded criticism from leading Coleridge scholars in English departments including Jim Mays, Kathleen Wheeler, and James Engell. They approach Coleridge as an energetic yet contemplative thinker concerned with the intuition of ideas and the processes of cultivation in self and society. Other chapters from intellectual historians and theologians including Douglas Hedley clarify the historical background and religious musings of Coleridge's thought regarding contemplation.

**Fair Copies** Matthew Zarnowiecki, 2014-02-05 In the latter half of the sixteenth century, English poets and printers experimented widely with a new literary format: the printed collection of lyric poetry. They not only investigated the possibilities of working with a new medium but also wrote metaphors of human

reproduction directly into their works In *Fair Copies* Matthew Zarnowiecki argues that poetic production was re envisioned during this period which was rife with models of copying and imitation to include reproduction as one of its inherent attributes Tracing the development of the English lyric during this crucial period *Fair Copies* incorporates a diverse range of cultural productions and reproductions from key poetic texts by Shakespeare Sidney Spenser Gascoigne and Tottel to legal breviaries visual representations of song midwives manuals and commonplace books Also included are fifteen facsimile reproductions of poems in early printed books with explanations and discussions of their importance Calling upon these diverse sources and examining lyric poems in their earliest manuscript and printed contexts Zarnowiecki develops a new reproductively centred method of reading early modern English lyric poetry

Gender, Authorship, and Early Modern Women's Collaboration Patricia Pender, 2017-11-10 This book explores the collaborative practices both literary and material that women undertook in the production of early modern texts It confronts two ongoing methodological dilemmas How does conceiving women s texts as collaborations between authors readers annotators editors printers and patrons uphold or disrupt current understandings of authorship And how does reconceiving such texts as collaborative illuminate some of the unresolved discontinuities and competing agendas in early modern women s studies From one perspective viewing early modern women s writing as collaborative seems to threaten the hard won legitimacy of the authors we have already recovered from another developing our understanding of literary agency beyond capital A authorship opens the field to the surprising range of roles that women played in the history of early modern books Instead of trying to simply shift disaggregate or adjudicate between competing claims for male or female priority in the production of early modern texts Gender Authorship and Early Modern Women s Collaboration investigates the role that gender has played and might continue to play in understanding early modern collaboration and its consequences for women s literary history

*Thinking Through Poetry* Marjorie Levinson, 2018-07-11

Thinking through Poetry Field Reports on Romantic Lyric pursues two goals The title signals the contribution to debates about reading Do we think through by means of with poems sympathetically elaborating their surfaces Is this compatible with a second meaning thinking through poems to their end solving a problem getting to its root its deep truth Third can we square these surface and depth readings with a speculative philosophical criticism to which the poem carries us where through denotes a going beyond All three meanings of through are in play throughout The subtitle applies field first to Romantic studies since the 1980s a field that this project reflects upon from beginning to end Examples are drawn especially from Wordsworth but also from Coleridge and in assessing Romanticism's afterlife from Stevens Field also characterizes the shift from a unitary to a field concept of form during that time span a shift pursued through prolonged engagement with Spinoza Field thus underscores the synthesis of form and history the importance of analytic scale to that synthesis and the displacement of entity text by relation as the object of investigation While the book historically connects early nineteenth century intellectual trends to twentieth and twenty first century scientific revolutions its focuses on introducing new models to literary criticism Unlike accounts of the influence of science on literature or various literature X approaches literature and ecology literature and cognitive science it constructs its object of inquiry in a way cognate with work in non humanities disciplines thus highlighting a certain unity to human knowledge The claim is that specialists in literature should think the way distinguished scientists think and vice versa
