Technological Change And Rural Development In Poor Countries Neglected Issues:

Technological Change and Rural Development in Poor Countries Kartik Chandra Roy, Cal Clark, 1994 Rural development is a subject that appears to be plagued by a central paradox development is necessary to alleviate rural poverty but while new technology has raised agricultural output it has also increased the suffering of millions of poor landless families in many Third World countries The rural poor especially women have been marginalized urban migrants have become desperate unemployed squatters not well paid industrial workers and environmental degradation has proved severe The authors argue that many development programmes go awry because the authorities neglect essential development issues Development must be defined in terms of the provision of basic human needs which include life expectancy infant mortality and literacy indicators which reflect the quality of life of the bulk of the population not just a narrow elite What they suggest is that the issues neglected by the conventional approach must be addressed if true development is to occur *Essays on Development Issues* Rabindra Nath Ghosh, Rony Gabbay, M. A. B. Siddique, 2003 India Australia And South Africa Are The Three Major Regional Powers In The Indian Ocean Region While Australia Is A Developed Country With A Very High Level Of Economic Affluence The South African Society S Problems Are Mainly Drawn Along Racial Lines Blacks In South Africa Have An Overwhelming Majority In Numbers And Yet Most Of The Black People In South Africa Face Serious Problems Of Unemployment And Poverty The Whites In South Africa Have On The Other Hand Always Enjoyed Comfortable Standards Of Living India Provides The Classic Example Of A Developing Country That Is Burdened With Overpopulation Communal Divisions Gender Inequalities Rural Poverty Illiteracy And Yet It Is A Country That Has The Potential To Emerge As A Great Global Power In The Course Of The 21st Century The Essays Included In This Volume Examine The Case Of India From Various Perspectives To Demonstrate How The Process Of Economic Change In India Might Have A Bearing On The Indian Ocean Region As A Whole **Institutions and Gender Empowerment in the Global Economy** Kartik Chandra Roy, Hans-Christer Blomqvist, Cal Clark, 2008 Since women account for almost 50 percent of the world s population the sustainability of development of the global economy can be greatly impaired if the state authorities in individual countries pay less attention to the improvement in the socio economic status of women relative to men Improvement in socio economic status which facilitates empowerment of individuals is greatly dependent on conducive informal institutions and state institutions This book is the first of its kind to critically examine the role of these institutions in women s empowerment in five continents in the world The analysis of the role of institutions in individual countries is underpinned by a robust theoretical background presented in the first three chapters The chapters on individual countries also include a section dealing with recommendations for changes in state policies affecting women s empowerment Economic Development and Women in the World Community Hans C. Blomqvist, Kartik Roy, Clement A. Tisdell, 1996-02-16 After reviewing theories about how women are likely to fare as a result of economic development the editors and their contributors focus on the

socioeconomic status of women and changes in it as a result of processes of economic development in individual countries in five continents Economic development is supposed to remove impediments to the improvement in women's status In some developing countries researchers have found that instead of lessening the forces of restrictions economic development may in fact have strengthened them The editors call for a greater involvement of women as active participants in the process of dismantling social legal and institutional barriers to women's development

Human Resources and Gender Issues in Poverty Eradication R. N. Ghosh, Rony Gabbay, Abu Siddique, 2001 There Are Complex Linkages Between Human Resources Development And Gender Issues On The One Hand And The Problem Of Poverty Eradication On The Other This Volume Contains 17 Chapters Which Aim At Disentangling These Complex Issues Of Development A Main Theme Underlying The Volume Is That Economic Growth In Itself Is Not To Be Confused With The Broader Question Of Economic Development That Should Lead To Improvement In The Standard Of Living Simultaneously With Empowerment Of Women Inter Generational And Inter Class Equity And Efficient Management Of The Environment Many Of The Papers In The Volume Are Focused On The Countries Of The Indian Ocean Region

Gender Inequality: Socioeconomic Analysis And Developing Country Case Studies Clement A Tisdell, 2019-05-03 This unique book provides an easily comprehended overview

of facts about gender inequality and contains a valuable introduction to economic theories of this inequality the applicability of which is assessed in the light of empirical evidence A special feature of this book is its adoption of a multidisciplinary approach to the study of gender inequality Both economic and sociological influences on gender inequality are taken into account in an innovative fashion The scholarly coverage of this book is broad and focuses mainly on female disadvantage both that suffered by female children and by women Subjects covered include economic theories of gender inequality and critiques of these sex selection preferences for boys and the value of females measures of gender inequality and their application the occurrence of poverty and its relationship with the deprivation of women and children implications for the status of females of their access to different forms of capital taking into account modern concepts of capital the need to take into account little explored relationships between gender inequality and the achievement of sustainable development ecofeminism and the abuse of women by men The discussion is reinforced by case studies and examples drawn primarily from South Asian and Northeast Asian countries Some attention is given in the case studies to the diverse practices of tribal people and minorities This is done in order to better assess existing theories about gender inequality The value of adopting a multidisciplinary approach to the study of gender inequality is well demonstrated Consequently this book provides a more holistic and balanced view of gender inequality than other available books Journal of Rural Reconstruction ,1997

Selling Solar Damian Miller,2012-05-04 To solve the climate crisis the world must make a wholesale shift to renewable energy technologies With surging growth in emerging markets this transformation takes on even greater urgency The challenges and opportunities are immense Selling Solar considers how such a shift might happen Focusing on the case of solar photovoltaics it shows how at the start of the 21st century this promising technology began to diffuse rapidly in select emerging markets after years of struggling to take off What were the initial barriers to diffusion How were they overcome Who did it And how can this success be replicated Drawing on literature on innovation diffusion and entrepreneurship the author answers these questions showing how entrepreneurs affected profound technological change not just through the solar systems they sold but through the example they set to both new market entrants and policymakers In analysing how this happened this book offers important lessons for the diffusion of a range of renewable energy technologies in emerging markets and for the advancement of the sector as a whole Selling Solar is essential reading for anyone who believes in a renewable energy future and wants it sooner rather than later

Indigenous Land Management in West Africa Kathleen M. Baker,2000 The success of rural development schemes in Africa particularly those involving land is heavily dependent on understanding the local ecology Any farmer knows this yet rarely has development project design catered adequately for the vicissitudes of the African environment Although environmental unpredictability was recognized in the temperate zone by the mid nineteenth century the ecological theory which was subsequently developed and most widely accepted was based on concepts of norms and equilibria History has shown that the application of such ecological

assumptions to African environments is wholly inappropriate This book argues that many methods used by West African smallholder farmers and pastoralists are properly adapted to the region's unpredictable physical environment Field examples from the semi arid and humid zones demonstrate the nature of environmental variability and the skill of indigenous farmers and pastoralists in exploiting this It is thus argued that development planners should where possible model development schemes on the more successful ecologically sound methods of indigenous land management **Asian Bibliography** ,1996
