

Technology Entrepreneurship: Overview, Definition, and Distinctive Aspects

Tony Bailetti

“Don't let the noise of other's opinions drown out your own inner voice. And most importantly, have the courage to follow your heart and intuition. They somehow already know what you truly want to become. Everything else is secondary.”

Steve Jobs (1955–2011)
Co-founder of Apple and Pixar

Technology entrepreneurship lies at the heart of many important debates, including those around launching and growing firms, regional economic development, selecting the appropriate stakeholders to take ideas to markets, and educating managers, engineers, and scientists. Unless a generally accepted definition of technology entrepreneurship is established, however, these debates lose their focus.

The purpose of this article is to identify the themes that dominate the technology entrepreneurship literature, provide a definition of technology entrepreneurship, and identify its distinguishing aspects relative to economics, entrepreneurship, and management.

The author argues that technology entrepreneurship is an investment in a project that assembles and deploys specialized individuals and heterogeneous assets to create and capture value for the firm. What distinguishes technology entrepreneurship from other entrepreneurship types (e.g., social entrepreneurship, small business management, and self-employment) is the collaborative experimentation and production of new products, assets, and their attributes, which are intricately related to advances in scientific and technological knowledge and the firm's asset ownership rights.

Introduction

Technology entrepreneurship is a vehicle that facilitates prosperity in individuals, firms, regions, and nations. The study of technology entrepreneurship therefore, serves an important function beyond satisfying intellectual curiosity.

Previous definitions from the literature do not explore and identify: the ultimate outcome of technology entrepreneurship; the target of the ultimate outcomes; the mechanism used to deliver the ultimate outcomes; or the nature of the interdependence between technology

entrepreneurship and scientific and technological advances. Moreover, a new definition should explicitly link technology entrepreneurship to the theory of the firm, entrepreneurship theory, and management theory.

In this article, the journal articles on technology entrepreneurship published since 1970 are classified into eight themes, the journals where these articles were published are examined, and the various definitions of technology entrepreneurship found in the literature are identified. A revised definition of technology entrepreneurship is proposed and its distinguishing aspects discussed. The last section provides the conclusions.

Accountants and Quantum Leap: How Far We Can Survive in Industrial Revolution 4.0? Akhmad Solikin, Yuniarto Hadiwibowo, Benny Setiawan, Amrie Firmansyah, Hendrati Dwi Mulyaningsih, 2020-08-07 The Industrial Revolution 4.0 will not only cause job losses but will also create new workspaces that may not exist today. It also needs to be considered by accountants in government because the processes of budget planning, budget execution, and financial reporting have used a large number of information systems. In the era of the Industrial Revolution 4.0, the changes will be faster, marked by the emergence of such systems as supercomputers, smart robots, cloud computing, big data systems, genetic engineering, and the development of neurotechnology that allows humans to optimize brain function further. Industrial Revolution 4.0 will disrupt the accounting profession. This proceedings provides selected papers, research on government accounting, accountability, and integrity, public sector accounting, financial accounting, accounting information system, auditing, and assurance, corporate sustainability, forensic, and management accounting, public and corporate finance, taxation, and customs, open innovation in public sector accounting. The proceedings provide details beyond what is possible to be included in an oral presentation and constitute a concise but timely medium for the dissemination of recent research results. It will be invaluable to professionals and academics in the field of accounting, finance, and the public sector to get an understanding of recent research. **Social**

Entrepreneurship and Social Enterprise Phenomenon: Antecedents, Processes, Impact across Cultures and Contexts Marzena Starnawska, Agnieszka Brzozowska, 2018 Social entrepreneurship³ as a field of research has gained enormous interest of academics in management and entrepreneurship literature for almost 30 years now. Also scholars in other intellectual domains like economics, finance, marketing, political science, sociology, and few others have found it fascinating. As a term, it is common in public discourses and has found interest among policy makers, corporations, media, different groups of practitioners, and professionals. As a phenomenon, it is not new, although the SE term has been only recently coined. Banks 1972, Drucker 1979. For far more than two centuries, great individuals and groups have tried to tackle the societal challenges using economic means, such as the Rochdale Pioneers who inspired cooperative ideals, and Florence Nightingale, an English nurse and social activist who changed the patient care landscape. Nicholls 2006. Many of the ventures and actions of social initiatives can be traced to the earlier medieval or even ancient times. Today, social initiatives and social enterprise have emerged in particular countries and regions as a result of their historical institutional trajectories and social enterprise landscape. ZOO Young, Mair, Starnawska 2016a. Most research is descriptive and not contextualized in theory. Dacin, Dacin, Tracey, Sharir, Weerawardena, Leadbeater 1997. Also, organizational level studies lead to confusion. As mentioned earlier, there are various SE operation models specific for particular countries and regions determined by historical and institutional trajectories. Defourny, Ciepielewska, Kowalik, Pieli, ski, Starnawska, Dacin et al 2011. Short Moss, Starnawska 2017. The focus on the concept of a social entrepreneur as an institutional agent is in line with the structure agency debate and provides opportunities for discussion on the transformative change, the potential of SE. The institutional and social capital approaches

provide arguments for more engagement of the academic community to employ more interpretivist lenses through social constructionist approaches which requires more in depth and more longitudinal data collection and analysis with more qualitative approaches to study the complex and contextual phenomenon of SE Starnawska 2016b 2018 Research streams in social entrepreneurship and social enterprise There are two streams of thought in the current SE research field which are not explicitly distinguished by the academic community There is a growing pressure to make it a distinct and legitimate field of inquiry Nicholls 2010 finds SE as at a pre paradigmatic stage and therefore the SE field of research and practice is undergoing a process of maturation Nicolopoulou 2014 Other researchers seem not to follow this way of thinking and do not regard the SE field as a domain of its own right with its own theories Dacin Dacin Defourny Nicolopoulou 2014 and reflect entrepreneurship approaches dominant in the mainstream literature A lot of this discussion is generated thanks to the Ashoka Foundation promoting its fellows and similar other foundations promoting the discourse on individual change makers Bornstein 2004 In this area there is intense academic work referring to SE social entrepreneurship The second school on earned income emphasizes the capability of social enterprise to achieve social aims through earned income This approach also has roots in America where in the late 80 s there was a need for non profit organizations to generate revenues to realize their own social mission and to survive in the market at the same time Dees Nicolopoulou 2014 There is no agreement on the domain field of research boundaries and definitions Short Moss Dacin Dacin Peredo as different institutional and entrepreneurial solutions to social needs The findings show how Misericordia employs these strategies The contribution of this paper is a conceptual framework on the bricolage approach in addressing emerging social needs The paper deepens our understanding of possible applications of the bricolage concept in SE studies It broadens the literature on entrepreneurship and in particular SE working with the application of a bricolage approach The second paper by Tanja Collavo 2018 Unpacking social entrepreneurship Exploring the definition chaos and its consequences in England focuses on the organizational level factors determining definitional confusion in SE and social enterprise Also the paper aims to explore what the consequences of this state of the art are for social entrepreneurs social investors social enterprises and policy makers The study setting is England where the SE sector has had a long tradition and has been subject to influences from different actors and organizations in the USA and the EU The author makes efforts to empirically find out what the long term effects of this definitional diversity are on multiple stakeholders The paper uses an exploratory case study approach where England is treated as a case For this purpose the author analyses historical secondary data taken from the period 1995 2016 including archival data such as newspapers magazines academic papers reports produced by government and national think tanks to trace the development of the sector in England and factors leading to the current definitional debate This historical approach is further employed in a complementary analysis of archives and content from 69 archived interviews held with different stakeholders from the sector such as employees of sector intermediaries representatives of charities social

entrepreneurs academics and representatives of businesses The findings help the author to outline three dominant schools of thought in practitioner s discourse one school on social enterprises as businesses another on social entrepreneurs as innovators and the last as a community related phenomenon These are in line with the 3 schools of thought suggested in the literature on social enterprise Defourny Teasdale 2012 In further findings the author resumes 3 categories of opinions on how the definitional debate impacts the sector For some this debate brings opportunities as it generates inclusiveness and interest in social enterprise For others it is a negative phenomenon as it generates disagreements in the sector hardens access to funding and creates confusion in making public policies The study shows that the definitional debate in England raises discussions in practice and shows that research and practice face similar challenges The next paper by Huei Ching Liu Ching Yin Ip and Chaoyun Liang 2018 A new runway for journalists On the intentions of journalists to start social enterprises focuses on the entrepreneurial intentions of present and former journalists towards starting a social enterprise The authors set their hypotheses in the context of the similarities between entrepreneurs and journalists and analyze how personal traits creativity and social capital determine the entrepreneurial intentions of journalists Their research is based on an on line survey run in social media groups for journalists and covers valid answers from a sample of 401 participants The findings show no significant influence of personality traits and the authors explain that this is due to the construction of the research hypotheses based on classic entrepreneurship literature Another important finding is that creativity and bridging social capital has a positive significant influence on social entrepreneurial intentions The latter is an essential message as creativity is vital in overcoming the institutional barriers Dacin et al 2010 that SE faces Also social capital is an important element in SE development which itself is more strongly emphasized in SE literature recognizing the role of stakeholders in social enterprise and a strong pronouncement of embeddedness of social enterprise in a social context The study throws light on social entrepreneurial intentions among journalists whom themselves constitute an interesting population Assigning the role of social entrepreneurs to journalists leads to advocacy functions for many societal challenges It can influence social impact thanks to potentially higher media coverage of social issues Although the main findings are in line with the mainstream literature on entrepreneurial intentions towards conventional entrepreneurship the subject and setting of the study in Taiwan is a very inspiring and interesting context when discussing who social entrepreneurs are The last paper by Katarzyna Bachnik and Justyna Szumniak Samolej 2018 Social initiatives in food consumption and distribution as part of sustainable consumption and sharing economy aims to describe and characterize social initiatives in food consumption and distribution in Poland They present their study on the purposive sample of social initiatives in food consumption and the distribution area In particular reference is made to goals operating models ways of acting and their linkages to sustainable consumption and sharing economy Four mini cases of social initiatives in this area established between 2013 2016 and located in two main cities in Poland Cracow and Warsaw are purposively chosen as the subject of the study These initiatives are chosen in

accordance with sustainability and sharing economy criteria presented in the paper. The authors use existing secondary data together with related social media and website content material for the case analysis. The described social ventures are grass roots initiatives resulting from the bottom up activity of individuals and groups. The key findings of this paper show a variety in their organizational and legal forms varying from an initiative undertaken by volunteers, a project undertaken by students to an informal group that set up a non profit organization. Also the evidence shows diverse linkages to sustainable consumption and sharing economy across the mini cases. These are involved in purchases of healthy food, promotion of responsible food consumption, being sensitive to food waste issues, motivations to care for the greater good and for nature and for others. The sharing economy dimension is visible not only through sharing food with others but also sharing on the level of building trust and community. The authors plan to undertake a study of organizational and individual behaviors in further quantitative research followed by in depth interviews with representatives of initiatives in sustainable consumption and sharing economy to provide more generalizable conclusions. Their mini case study of secondary data shows the urging need for more empirical wider scale studies. However it needs to be emphasized that many of these initiatives are novel ones and reflect new social movements and are not significant in numbers. Therefore it comes as no surprise why some research on social enterprise is still anecdotal and SE organizations and ventures are slowly occupying the SE landscape in Poland, i.e. moving towards a variety of sustainability and responsibility related initiatives beyond a pure welfare focus. When in western European countries social cooperative enterprise initiatives have become quite abundant representing new movements in food, environmental, cultural, educational spheres, in many central and eastern European countries the rebirth of civil society into social initiatives and social enterprise needs more time for development. Ravensburg Lang Poledrini, employing the analysis of historical data, the ongoing need of case and small scale studies of SE ventures and organizations in contexts where the SE phenomenon is not common, the potential of large scale studies on individuals and their social entrepreneurial intentions and the strong potential in the qualitative content analysis of practitioners' discourses as a methodological tool in studying the SE phenomenon. In their work Zollo, Rialti, Ciappei and Boccardi (2018) propose a theoretical framework encompassing the typology of social bricolage depending on social needs and the institutions entrepreneurs cope with and depending on entrepreneurial and institutional solutions to these social needs. This framework is studied in exploratory longitudinal case analysis. This study has relevance for SE researchers as it provides a systematic overview of social bricolage approaches to emerging social needs. The chosen exploratory retrospective approach is also a valuable example of how archival data can be employed in a complementary manner with current primary data while studying social enterprise with long traditions. For further research it is required to validate the proposed framework in other SE organizations and to study the assumption that bricolage is a significant opportunity for social entrepreneurs to address emergent social needs. This paper also works as an exemplary work of retrospective longitudinal studies on SE organizations. The arguments put forward

by Hockerts and W stenhagen 2010 regarding the need for such studies may refer to work on historical and current data as well Covallo 2018 shows how qualitative analysis of existing secondary data can contribute to the understanding of the complexity of SE This methodological approach is rather uncommon and it shows that analyses of current texts of narratives discourses and rhetoric can provide a deeper understanding of the SE phenomenon as socially constructed This can also show the power and interplays between a variety of institutional actors Nicholls 2010 A new stream of literature is emerging and this work is an exemplary example of how narrations of social enterprise can shape SE culture For tracing the nature of the SE phenomenon narratives from different actors could be heard to understand the complexity of the studied subject In this sense the recognition of practitioners voices broadens the spectrum of studied populations It is of particular importance as social enterprise has not been legally framed in many institutional country contexts For many countries social enterprise models have been recognized Defourny Nyssens 2013 but Covallo 2018 takes a parallel step to analyze practitioners and other stakeholders discourses on what social enterprise is Additionally T Covallo s work serves as an exciting example of how qualitative content data analysis can be employed in future studies in the light of the scarcity of widely available data on SE and interesting and valuable findings can be generated thanks to the existing discourses and narratives The research of Liu Ip and Liang 2018 confirms existing mainstream literature on conventional entrepreneurship Their evidence from the journalist community in Taiwan shows that personal traits have no significant impact upon social entrepreneurial intentions However creativity and bridging social capital are recognized as significant variables The research is of particular interest as it does not refer to entrepreneurial intentions among students or graduates or general populations but is limited to the population of active and former journalists Further research could potentially explain social entrepreneurial intentions in other professions and be next stage research leading to comparative analyses The results of this research show the importance of bridging social capital which has practical implications at policy and practitioner level To extend the SE community other professional groups can become more and more involved in the societal challenges which in the end can lead to higher start up rates of social enterprises but also strengthen many of them with professional expertise The findings also confirm the need to employ more network related theories for SE future studies Bachnik and Szumniak Sulej 2018 provide insights into Polish social initiatives in food consumption and distribution against the background of the understudied nature of the phenomenon The authors select a purposive sample of diverse cases of such initiatives and provide a descriptive overview of their goals organization and links with sustainable consumption and sharing economy The paper works as exemplary evidence that the majority of social venture studies are based on small samples of anecdotal evidence as highlighted at the beginning of the paper Therefore having based their research on secondary data the authors call for further research including primary data collection and more longitudinal observation As these initiatives are still novel and grass roots ventures further qualitative and exploratory approaches would be required As the authors claim the responsible

consumption and sharing economy have become very popular in digital community and consumer attitudes have a significant impact upon the sustainability of such initiatives The work presented in this issue confirms the need for more insightful qualitative studies set in varied institutional contexts and at the same time for more large scale studies on populations of nascent or existing social entrepreneurs or social enterprises In the case of the former more constructivist and network related approaches can be of further value Starnawska 2016a 2018 In the case of the latter researchers from different institutional contexts could make attempts at setting the foundations of comparative studies across countries e g Ravensburg et al 2017 but on large social enterprise populations Also with the growing legitimacy of SE in an educational setting Starnawska 2018 there lies great potential in evaluating social entrepreneurial attitudes among students and graduates and other populations such as different professions In parallel the work presented in this issue shows excellent opportunities in analyzing historical data since SE is not a novel phenomenon

Entrepreneurship Norris F. Krueger, 2002 This new collection provides a much needed retrospective view of the key academic work published in this area The papers here highlight the importance of studying entrepreneurship from a wide range of perspectives including research that derives from economics history sociology psychology and from different business disciplinary bases such as marketing finance and strategy The overall focus in this set is on entrepreneurial activity rather than specifically small or family owned business and favours research articles over those that deal purely with practice

Technology Entrepreneurship in Theory and Practice J. Mark Munoz, Orestis Terzidis, 2025-02-11 Technology entrepreneurship refers to business activities that are based on new scientific insights and new technical developments It

describes the process by which enterprising teams and individuals convert new technical knowledge into products and services. It encompasses entrepreneurial pursuits in all fields of engineering and science where progress opens novel ways of creating value. Often these activities are based on intellectual property although it may also make sense to consciously pursue an open technology strategy. Entrepreneurial activities in these domains lead to ventures with specific characteristics. Technology Entrepreneurship in Theory and Practice compiles the essential research knowledge about principles and practices in technology entrepreneurship. Systematically presenting theory and practice for entrepreneurs coming from an engineering or scientific background, the authors assemble a comprehensive overview of the subject and enhance it with their expert viewpoints. The book compiles and summarizes available knowledge and approaches to enable engineers and scientists to develop entrepreneurial initiatives. Technology Entrepreneurship in Theory and Practice will find an audience among technology entrepreneurs, engineers and scientists, entrepreneurship educators, executives, consultants, and policymakers worldwide. Entrepreneurship: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2017-03-15.
