technology and its use as a weapon in world system politics and critically examine the appropriate technology movement The essays are presented to honor Professor Eugene A Wilkening for his many pioneering and lasting contributions to the study of technology and rural social change The book includes an intellectual biography of Professor Wilkening written by his long time colleague and friend William H Sewell      **Industrialization as an Agent of Social Change** Herbert

Blumer,2018-01-16 Herbert Blumer wrote continuously and voluminously and consequently left a vast array of unpublished work at the time of his death in 1987 This posthumously published volume testifies further to his perceptive analysis of large scale social organizations and elegant application of symbolic interactionist principles Blumer s focus on the processual nature of social life and on the significance of the communicative interpretation of social contexts is manifest in his theory of industrialization and social change His theory entails three major points industrialization must be seen in processual terms and the industrialization process is different for different historical periods the consequences of industrialization are a function of the interpretive nature of human action and resembles a neutral framework within which groups interpret the meaning of industrial relations and the industrial sector must be viewed in terms of power relations industrial societies contain inherently conflicting interests The editors introductory essay outlines Blumer s metatheoretical stance symbolic interactionism and its emphasis on the adjustive character of social life It places Blumer s theory in the context of contemporary macro theory including world systems theory resource dependence theory and modernization theory

Thompson,2008-09-19 The Ethics of Agricultural Intensification An Interdisciplinary and International Conversation Paul B Thompson and John Otieno Ouko Global agriculture faces a number of challenges as the world approaches the second decade of the third millennium Predictions unilaterally indicate dramatic increases in world population between 2010 and 2030 and a trend in developing countries toward greater consumption of animal products could multiply the need for production of basic grains even further Although global food production in 2000 was estimated to be adequate for the existing population hunger and malnutrition are persistent problems that have led decision makers to recognize that increasing food production in specific regions may be the most effective way to address food security for impoverished peoples At the same time there will need to be policy adjustments that improve poor people's access to current food supplies without simultaneously undercutting the ability of local producers to obtain needed cash income What is more the uncertain effects of global climate change on agricultural ecosystems complicate planning for this process while poorly understood processes of globalization create additional unknowns from the side of social systems In short despite surpluses in many parts of the developed world finding ways to increase food production on both selected regional and a total global basis remains a priority for many farmers policy makers and agricultural researchers Toward a Hayekian Theory of Social Change Peter J. Boettke,Erwin Dekker,Chad Van Schoelandt,2023-12-06 This volume explores the political economy and social philosophy of F A Hayek as they relate to social change Arguably one limitation of Hayek's social philosophy is that he as some of his contemporaries quipped does not know the words for

example This means that much of his work on social philosophy is relatively abstract and hard to approach This might also explain why it has taken so long for scholars to fully appreciate the breadth and depth of his social philosophy Toward a Hayekian Theory of Social Change remedies the lack of more practical studies of Hayek s theory of social change by bringing together several scholars from different social science disciplines who relate Hayek s theory of social change to empirical phenomena and methodological debates within their respective disciplines *Social Change and Educational Problems in Japan, Singapore and Hong Kong* W.
