Technological Perspectives On Behavioral Change:

Technological Perspectives on Behavioral Change Michael Brian Schiffer, 2022-08-30 Human societies have always been characterized by a dependence on artifacts from prehistoric stone tools to modern electronic devices Technology responds to and affects virtually all human behavior yet the interdependence of behavior and artifacts has never been studied intensively Archaeologist Schiffer now draws on his discipline's familiarity with artifacts and the processes of change they reveal to offer new insight into the study of behavioral change Drawing on case studies that deal with changes in architecture ceramics and electronic technology he emphasizes the central idea that the explanations of change must focus on the nexus of behavior and artifacts in the context of activities

Anthropological Perspectives on Technology Michael B. Schiffer, 2001 These fourteen original essays accept a dual premise technology pervades and is embedded in all human activities By taking that approach studies of technology address two questions central in anthropological and archaeological research today accounting for variability and change These diverse yet interrelated chapters show that to understand human lives researchers must deal with the material world that all peoples create and inhabit Therefore an anthropology of technology is not a separate discrete inquiry instead it is a way to connect how people make and use things to any activity studied ranging from religion to enculturation to communication to art Each contributor discusses theories and methods and also offers a substantial case study These detailed inquiries span human societies from the Paleolithic to the computer age By moving beyond the usual approach of examining ancient technologies particularly chipped stone and low fired ceramics this volume probes for the construction of meaning in the material world across millennia The authors of these essays find technology to be an inclusive and flexible topic that merges with studies of everything else in human activity A provocative and powerful discussion of the role of technology in human cultures At a time when archaeology has become less focused on theory and archaeology and social anthropology seem to fracture farther and farther apart the book is a breath of fresh air Professor John Douglas University of Montana

technology with respect to the design of programs and apps aimed at facilitating behavior change and the role of social media Provides case studies of key theoretical models of behavior change Evaluates the success of key theories Details cost benefit analyses of each particular approach Includes techniques such as implementation intentions self affirmation feedback and social support Offers practical consideration of the impact of technology and design Delves into sustainability issues such as recycling and energy reduction Highlights future directions for research

The Persistence of Sail in the Age of Steam Donna J. Souza, 2013-06-29 In Archaeology Under Water 1966 19 pioneer nautical archaeologist George Bass pointed out how much easier it is to train someone who is already an archaeologist to become a diver than to take trained divers and teach them to do archaeology While this is generally true there have also been occasions when well trained and enthusiastic sport divers have been willing to accept the training and discipline necessary to conduct good archaeological science becoming first rate scholars in the process Dr Donna Souza s book is the product of just such a transition It shows how a sport diver and volunteer fieldworker can proceed through a rigorous graduate program to achieve research results that are convincing in their own right and point toward new directions in the discipline as a whole What is new in this book for maritime archaeology Perhaps the most obvious and important feature of Dr Souza s archaeological and historical analysis of the wreck at Pulaski Reef and its contemporaries in the Dry Tortugas National Park Florida is the way it serves as a means to a larger end namely an understanding of the social history of the transition from sail to steam in late nineteenth century maritime commerce in America The relationship between changes in technology and culture is a classic theme in anthropology and this study extends the theme into the domain of underwater archaeology

Behavioral Archaeology Michael B. Schiffer, 2016-04-08 Behavioral archaeology offers a way of examining the past by highlighting human engagement with the material culture of the time Behavioral Archaeology Principles and Practice offers a broad overview of the methods and theories used in this approach to archaeology Opening with an overview of the history and key concepts the book goes on to systematically cover both principles and practice the philosophy of science and the scientific method artifacts and human behavior archaeological inference formation processes of the archaeological record technological change behavioral change and ritual and religion Detailed case studies show the relevance of behavioral method and theory to the wider field of archaeological studies The book will be invaluable to students of archaeology and

Technology, Anthropology, and Dimensions of Responsibility Birgit Beck, Michael Kühler, 2020-02-19 With great power comes great responsibility In today's world with our growing technological power and the knowledge about its impact we are considered to be responsible for many instances that not long ago would have been deemed a matter of fate At the same time the looming options of e.g. genome editing or neuroprosthetics threaten traditional notions of responsibility if no longer the person but the technology involved is deemed to be responsible for a specific behaviour The growing ethical debate on the expansion of human responsibility e.g. when it comes to human machine interaction ambient intelligence or reproductive technologies thus intertwines with the challenge to formulate an appropriate understanding of the concept of personal responsibility and our respective anthropological self understanding in today's technological world The volume brings together both perspectives and aims at illuminating crucial dimensions of responsibility in light of technological innovation and our self understanding as responsible beings
