Coming to Terms Elizabeth Weed,2012-10-11 For over a decade feminist studies have occupied an extraordinary position in the United States On the one hand they have contributed to the development of a strong identity politics on the other they have been part of the post structuralist critique of the unified subject its experience truth and presence and of the massive challenge to Western metaphysics and humanism Along with race and ethnic studies feminist enquiry has moved beyond the fiction of a unitary feminism to address the differences within the study of difference The essays in this volume all address feminism s relationships to theory and politics at the level of the criticism and production of knowledge Readers and students of politics history literature philosophy sociology and the sciences anyone with a stake in theory and politics will benefit from this powerful book *Routledge Library Editions: Feminist Theory* Various,2021-08-07 Routledge Library Editions Feminist Theory brings together as one set or individual volumes a series of previously out of print classics from a variety of academic imprints With titles ranging from *The Liberation of Women* to *Feminists and State Welfare* from *Married to the Job* to *Julia Kristeva* this set provides in one place a wealth of important reference sources from the diverse field of gender studies

The Self Wired Lisa Yaszek,2013-12-16 First Published in 2002 Advanced technologies challenge conventional understandings of the human subject by transforming the body into a conduit between external forces and the internal psyche This title discusses the intense controversy about how to best understand and represent human subjectivity in a technology intensive era Yaszek provides an overview by linking specific modes of identity and agency to engagement with specific manifestations of technology itself

The Postmodern Turn Steven Seidman,1994-11-25 The Postmodern Turn gathers together in one volume some of the most important statements of the postmodern approach to human studies In addressing postmodern social theory and emphasising the social role of knowledge this book abandons the disciplinary boundaries separating the sciences and the humanities The first collection of its kind it provides the classic essays of authors such as Lyotard Haraway Foucault and Rorty Contributors include well known theorists in the fields of sociology anthropology women s and gay studies philosophy and history

Critical Communication Theory Sue Curry Jansen,2002-11-19 Critical theorist feminist and

censorship expert Sue Curry Jansen brings a fresh perspective to contemporary communication inquiry Jansen engages two key questions at the heart of a critical politics of communication What do we know And how do we know it The questions are not unique to our era she notes but our responses to them are our own Looking at issues of globalization science politics gender social inequality and other social formations that shape our world this insightful book advocates a new agenda not only for communication research but also for the writing_and language_that comes out of it Handbook of Science and Technology Studies Sheila Jasanoff, Gerald E Markle, James C Peterson, Trevor Pinch, 2001-11-01 This volume represents the social constructivist turn of the field It is evident that social constructivism made a major impact on the field during the 1970s and 1980s The diverse papers included here highlight the role of ethnography in STS In addition we are exposed to new perspectives of the multicultural and gendered nature of knowledge production Science Technology and Society For the most current comprehensive resource in this rapidly evolving field look no further than the Revised Edition of the Handbook of Science and Technology Studies This masterful volume is the first resource in more than 15 years to define summarize and synthesize this complex multidisciplinary international field Tightly edited with contributions by an internationally recognized team of leading scholars this volume addresses the crucial contemporary issues both traditional and nonconventional social studies political studies and humanistic studies in this changing field Containing theoretical essays extensive literature reviews and detailed case studies this remarkable volume clearly sets the standard for the field It does nothing less than establish itself as the benchmark one that will carry the field well into the next century The long awaited Handbook of Science and Technology Studies sponsored by the Society for Social Studies of Science is a truly substantial work both in size and in the breadth of its many contributions It is a rich and valuable guide to much that is transpiring in the field of Science and Technology Studies In the editors words it is an unconventional but arresting atlas of the field at a particular moment in its history Science Technology Society This book is not only an important resource for practitioners but it also may help to spark the curiosity of those who are outside the field including scientists and engineers themselves and so pull the half seen world of science and technology studies even more fully into the light of day American Scientist The book as a whole is an impressive testimony to the vitality of a burgeoning field New Scientist It reflects the international and interdisciplinary nature of the society An excellent resource Choice **Technology and the African-American Experience** Bruce Sinclair, 2004 The intersection of race and technology blackcreativity and the economic and social functions of the myth of disingenuity Feminism Confronts Technology Judy Wajcman, 1991 In the first major study of its kind Judy Wajcman challenges the common assumption that technology is gender neutral and analyzes its influence on the lives of women Does technology liberate women and encourage equality or are the new technologies reinforcing sexual divisions in society Does the problem lie in men s monopoly of technology or is technology itself in some sense inherently patriarchal To answer these questions Judy Wajcman explores what the impact of technology is on the lives of women today Popular stereotypes depict

women as technologically incompetent or invisible in technical spheres Wajcman argues that the identification between men and machines is not immutable but is the result of ideological and cultural processes She surveys sociological and feminist literature on technology highlighting the male bias in the way technology is defined as well as developed Over the last two decades feminists have identified men's monopoly on technology as an important source of their power women's lack of technological skills as an important element in their dependence on men During this period women's efforts to control their fertility have extended from abortion and contraception to mobilizing around the new reproductive technologies At the same time there has been a proliferation of new technologies in the home and in the workplace The political struggles emerging around reproductive technology as well as the technologies affecting domestic work paid labor and the built environment are the focus of this book

Women Composers and Music Technology in the United States Elizabeth Hinkle-Turner, 2006 This book is the most definitive attempt to date to discuss the achievements of women as composers of experimental and avant garde music from the 1930s to the present day Using a wealth of primary material it also explores currently relevant issues in gender and technology Drawing out the relationships between composers and their working environments and between teachers and students Elizabeth Hinkle Turner discusses the contribution of women composers to electroacoustic music The book includes a bibliography and discography covering the work of ninety composers

The Uncanny Bruce Grenville, 2001 Documenting the image of the cyborg in all its imaginative guises THE UNCANNY includes essays and excerpts by Allan Antliff Bruno Bettelheim Randy Lee Cutler Freud William Gibson Bruce Grenville Makiko Hara Donna Haraway Masanori Oda Jeanne Randolph and Toshiya Ueno One of the most persistent and intriguing cultural images of the last century the cyborg exists at the intersection of science technology and culture and is understood here as an uncanny image that reflects our shared fascination and dread of the machine and its presence in our daily lives

Cyber-Marx Nick Dyer-Witheford, 1999 In this highly readable and thought provoking work Nick Dyer Witheford assesses the relevance of Marxism in our time and demonstrates how the information age far from transcending the historic conflict between capital and its laboring subjects constitutes the latest battleground in their encounter Dyer Witheford maps the dynamics of modern capitalism showing how capital depends for its operations not just on exploitation in the immediate workplace but on the continuous integration of a whole series of social sites and activities from public health and maternity to natural resource allocation and the geographical reorganization of labor power He also shows how these sites and activities may become focal points of subversion and insurgency as new means of communication vital for the smooth flow of capital also permit otherwise isolated and dispersed points of resistance to connect and combine with one another Cutting through the smokescreen of high tech propaganda Dyer Witheford predicts the advent of a reinvented autonomist Marxism that will rediscover the possibility of a collective communist transformation of society Refuting the utopian promises of the information revolution he discloses the real potentialities for a new social order in the form of a twenty first century

communism based on the common sharing of wealth *Science and Technology in a Multicultural World* David J. Hess,1995
This new approach to the study of multiculturalism focuses on its applications to science and technology It explores new studies that describe the role of culture and power in the making of theories facts and machines The Haraway Reader
