Catalog of Books* ,1996 *Routledge Handbook of New Media in Asia* Larissa Hjorth,Olivia Khoo,2015-11-06 While a decade ago much of the discussion of new media in Asia was couched in Occidental notions of Asia as a default setting for technology in the future today we are seeing a much more complex picture of contesting new media practices and production As new media becomes increasingly an everyday reality for young and old across Asia through smartphones and associated devices boundaries between art new media and the everyday are transformed This Handbook addresses the historical social cultural political philosophical artistic and economic dimensions of the region s new media Through an interdisciplinary revision of both new media and Asia the contributors provide new insights into the complex and contesting terrains of both notions The Routledge Handbook of New Media in Asia will be the definitive publication for readers interested in comprehending all the various aspects of new media in Asia It provides an authoritative up to date intellectually broad conceptually cutting edge guide to the important aspects of new media in the region as the first point of consultation for researchers advanced level undergraduate and postgraduate students in fields of new media and Asian studies Book Wars John B. Thompson,2021-03-04 This book tells the story of the turbulent decades when the book publishing industry collided with the great technological revolution of our time From the surge of ebooks to the self publishing explosion and the growing popularity of audiobooks Book Wars provides a comprehensive and fine grained account of technological disruption in one of our most important and successful creative industries Like other sectors publishing has been thrown into disarray by the digital revolution The foundation on which this industry had been based for 500 years the packaging and sale of words and images in the form of printed books was called into question by a technological revolution that enabled symbolic content to be stored manipulated and transmitted quickly and cheaply Publishers and retailers found themselves facing a proliferation of new players who were offering new products and services and challenging some of their most deeply held principles and beliefs The old industry was suddenly thrust into the limelight as bitter conflicts erupted between publishers and new entrants including powerful new tech giants who saw the world in

very different ways The book wars had begun While ebooks were at the heart of many of these conflicts Thompson argues that the most fundamental consequences lie elsewhere The print on paper book has proven to be a remarkably resilient cultural form but the digital revolution has transformed the industry in other ways spawning new players which now wield unprecedented power and giving rise to an array of new publishing forms Most important of all it has transformed the broader information and communication environment creating new challenges and new opportunities for publishers as they seek to redefine their role in the digital age This unrivalled account of the book publishing industry as it faces its greatest challenge since Gutenberg will be essential reading for anyone interested in books and their future *Timetables of History for Students of Methodism* Rex Dale Matthews, 2007 The definitive guide to the major events of Methodist history displayed in sequence and placed in political social and cultural context *Unreal Objects* Kate O'Riordan, 2017-07-20 Science and technology are playing increasingly important roles in our lives New projects in development today will fundamentally shape the world around us and manipulate our lived experience But how and why are such important scientific and technological projects chosen and what are the consequences of this process In this book Kate O Riordan answers these crucial question She discovers that many objects such as genomes and genomic projects smart grids de extinction projects and biosensors cannot be granted scientific legitimacy and developed without extraordinary amounts of media public relations celebrity endorsements and private investment As a result of these filters only certain projects take centre stage when it comes to funding and political attention O Riordan calls these unreal objects scientific projects and technologies where utopian visions for the future are combined with investment and materialisation in the here and now This attention to these unreal objects hides many current social issues especially injustices and inequalities At the same time they conjure utopian visions for how life might be improved Forthcoming Books Rose Arny, 1993
