Assistive Technology Helps Students Compensate for Reading Difficulties

Amy G. Dell*The College of New Jersey***Deborah Newton***University of Southern Connecticut*

Assistive technology can help students with reading disabilities access information. This *Technology in Action* directs you to tools and resources designed for this purpose.

The ability to read and understand written and electronic text is critical for academic success. On a daily basis, students are required to read and comprehend a variety of written and electronic materials such as textbooks, workbooks, literary works, newspaper and journal articles, Internet information, and reference materials. Problems can occur when the reading level of these materials is beyond student skill (Boyle, Washburn, Rosenberg, Connelly, Brinckerhoff, & Banerjee, 2002). Students who struggle with reading comprehension have difficulty completing their assignments and often fall behind in their work. This can be frustrating and stressful, and it can hinder learning (Stahl, 2004).

Some high school students compensate for their reading disabilities by having their reading materials read to them

(Dell, Newton, & Petroff, 2008). Some students confide that they rarely complete their reading assignments and “get by” by paying attention to class lectures. These same students often are unable to complete their reading assignments on their own when they attend college or hold a job.

Assistive technology (AT) can help students compensate for reading difficulties. Compensation differs from remediation—a topic in another *Technology in Action* (Newton & Dell, 2009)—in which tools are used to help students learn to read. With compensation, students are provided with tools that allow them to access information. This *Technology in Action* explores AT that compensates for reading disabilities. Topics include the following:

- **Scan/read systems.** A sampling of available systems is provided.
