Technology Institutions And Government Policies:

Technology, Institutions and Government Policies Jeffrey James, Susumu Watanabe, 1985-09-12 **Technology, Institutions and Government Policies** Jeffrey James, 1985 **Government Policy and Program Impacts on Technology Development, Transfer, and Commercialization** Kimball Marshall, William Piper, 2013-02-01

In recent decades government funded technologies have produced radar microwave ovens modern cell phone systems the Internet new materials for aircraft and motor vehicles and new medical instrumentation This first of its kind book examines how access to technology is affected by government policies and government sponsored programs Government Policy and Program Impacts on Technology Development Transfer and Commercialization International Perspectives provides an easy to read overview of the field and several studies serving as examples to guide government policymakers and private sector decision makers This forward looking book also forecasts the potential impacts of government regulation upon the field and presents provocative discussions of the ethical implications of the cross cultural and cross national challenges facing technologically developed nations in the global economy This book reviews this broad field by first providing an overview of the goals of government technology policies and programs as well as of generic types of government technology programs Next it presents carefully selected studies that illustrate the potential impacts of government decisions upon marketing constraints industry acceptance of regulatory requirements economic development gross domestic product and the choices firms make when it comes to location competitiveness product development and other factors The final chapters explore ethical considerations from a global perspective These chapters also explore the implications of these considerations in relation to the success of governmental and private sector technology transfer and commercialization programs The macromarketing perspective taken by the contributors serves to ground the impacts of government technology policies and programs in practical implications for economic development business productivity and quality of life The contributors to this unique collection share their expertise on government sponsorship of technology research the impact of government regulation upon technology marketing and economic development the effects of government policies on business practices intellectual property rights and much more Government Policy and Program Impacts on Technology Development Transfer and Commercialization shows how evolving technology and government policy changes have affected the commercialization of music new media piracy problems consumer choices and costs and changes in the radio and concert promotion industries the adoption of new household technology licensure requirements for telemedicine with an essential overview of telemedicine plus examinations of relevant governmental regulations and potential applications patents copyrights trademarks licensing and proprietary information scrap tire disposal new alternatives for a chronic waste disposal problem food product development state owned enterprises with a case study illustrating how a stagnant state owned company quickly evolved into China's leading firm in the textile machinery field Technological Innovation and Federal Government Policy National

Science Foundation (U.S.). Office of National R&D Assessment,1976 Science and Technology Policy F. Tisdell,2012-12-06

I was asked recently to prepare an independent background report on the subject of priority assessment in science and technology policy for the Australian Science and Technology Council The Council while not necessarily endorsing this book suggested that a wider audience could be interested in the type of material contained in my report and kindly gave me permission to publish the material in my own right The present book contains this and other material some of which was presented at a seminar on National Science Policy Implications for Government Departments arranged by the Department of Science and the Environment Additional ideas were developed in response to comments on the manuscript by referees as a result of discussions with Professor John Metcalfe and Dr Peter Stubbs of Manchester University a conversation with Dr Keith Hartley of the University of York and in the wake of a communication from Dr Ken Tucker Assistant Director Bureau of Industry Economics Australia Science and technology policy affects and concerns everyone of us if for no other reason than we cannot escape in this interdependent world from the economic social and environmental over pills generated by science and technology We must face the problems and promises inherent in new and existing science and technology whether we like it or not Not surprisingly this book finds that all industrialized countries seem to be facing similar economic and social problems **New Technology Policy and Social Innovations in the Firm** Jorge Niosi,2014-02-04 In the light of increased discussion of technology policy by all major industrial countries this volume presents the state of the debates and institutional change in the United States the United Kingdom the European Union and Canada It goes on to present studies of the major changes taking place in these countries with regards to the adoption of new technology and the reorganization of institutions to suit these changes Panel on Science and Technology Eighth Meeting (government, Science, and International Policy), Proceedings...90-1, January 24, 25, 26, 1967 United States. Congress. House. Science and Astronautics,1967 **Publications of the National Institute of Standards and Technology ... Catalog** National Institute of Standards and Technology (U.S.),1981 **Information Technology Policy** Richard Coopey,2004-08-26

Information Technology has become symbolic of modernity and progress almost since its inception The nature and boundaries of IT have also meant that it has shaped or become embedded within a wide range of other scientific technological and economic developments Governments from the outset saw the computer as a strategic technology a keystone of economic development and an area where technology policy should be targeted This was true for those economies interested in maintaining their technological and economic leadership but also figured strongly in the developmental programmes of those seeking to modernise or catch up So strong was the notion that IT policy should be the centre of economic strategy that predominant political economic ideologies have frequently been subverted or distorted to allow for special efforts to promote either the production or use of IT This book brings together a series of country based studies to examine in depth the nature and extent of IT policies as they have evolved from a complex historical interaction of

politics technology institutions and social and cultural factors In doing so many key questions are critically examined Where can we find successful examples of IT policy Who has shaped policy Who did governments turn to for advice in framing policy Several chapters outline the impact of military influence on IT What is the precise nature of this influence on IT development How closely were industry leaders linked to government programs and to what extent were these programs particularly those aimed at the generation of national champions misconceived through undue special pleading How effective were government personnel and politicians in assessing the merits of programs predicated on technological trajectories extrapolated from increasingly complex and specialised information This book will be of interest to academics and graduate students of Management Studies History Economics and Technology Studies and Government and Corporate policy makers engaged with IT and Technology policy

Government, Innovation and Technology Policy Sunil Mani, 2002 This volume offers a comprehensive analysis of the changing role of government with respect to domestic technology development in eight countries in both the developed and the developing world The author distinguishes between those countries which can be classed as creators of new technologies Japan Korea and Israel and those which possess the potential to create new technologies Singapore Malaysia India South Africa and Brazil

Science and Technology Policy in the United States Sylvia Kraemer, 2006-06-20 During the latter half of the twentieth century federal funding in the United States for scientific research and development increased dramatically Yet despite the infusion of public funds into research centers the relationship between public policy and research and development remains poorly understood How does the federal government attempt to harness scientific knowledge and resources for the nation's economic welfare and competitiveness in the global marketplace Who makes decisions about controversial scientific experiments such as genetic engineering and space exploration Who is held accountable when things go wrong In this lucidly written introduction to the topic Sylvia Kraemer draws upon her extensive experience in government to develop a useful and powerful framework for thinking about the American approach to shaping and managing scientific innovation Kraemer suggests that the history of science technology and politics is best understood as a negotiation of ongoing tensions between open and closed systems Open systems depend on universal access to information that is complete verifiable and appropriately used Closed systems in contrast are composed of unique and often proprietary features which are designed to control usage From the Constitution's patent clause to current debates over intellectual property stem cells and internet regulation Kraemer shows the promise as well as the limits of open systems in advancing scientific progress as well as the nation's economic vitality

Government Patent Policy United States. Congress. House. Committee on Science and Technology. Subcommittee on Science, Research, and Technology, 1980

Science, Technology and Innovation Policies for Inclusive Growth in Africa Reuben A. Alabi, Achim Gutowski, Nazar Mohamed Hassan, Tobias Knedlik, Samia Satti Osman Mohamed Nour, Karl Wohlmuth, 2018 The volume analyses how to make Science Technology and Innovation STI Policies relevant for inclusive growth strategies in

Africa The base for a transformative STI policy is to link the STI policies to Africa's economic transformation policies In a first part the general issues of introducing effective STI policies are presented In a second part country case studies highlight the new approach Cases such as Sudan and Nigeria are analysed as these two countries have a long history of STI development because of different history size and structure they need to move in different directions towards a coherent STI policy for inclusive growth

Technology Administration/National Institute of Standards and Technology Fiscal Year 1997 Authorization United States. Congress. House. Committee on Science. Subcommittee on Technology,1996 *Putting science and engineering at the heart of government policy* Great Britain: Parliament: House of Commons: Innovation, Universities, Science and Skills Committee,2009-07-23 A report that considers the broad issue of why science and engineering are important and why they should be at the heart of Government policy It also considers three more specific issues the debate on strategic priorities the principles that inform science funding decisions and the scrutiny of science and engineering across Government

Technology Policy and Practice in Africa International Development Research Centre (Canada),1995 *Technology Policy and Practice in Africa* E-Government and Information Technology Management Marc Holzer,Aroon Manoharan,James Melitski,2019-01-01 E Government and Information Technology Management is an essential textbook for graduate and undergraduate programs across the world that are taking steps to incorporate courses on e government IT as they prepare their students to join the public sector workforce The book also serves as a comprehensive guide for the growing body of researchers and practitioners in e government The text is comprised of 12 chapters from e government experts all written in a clear writing style that balances theory and practice Each chapter provides background information critical resources and emerging trends Along with questions for class discussion each chapter includes cases to demonstrate the importance of these areas to practitioners researchers and students of technology management and public affairs administration

Science, Technology Policy and the Diffusion of Knowledge Tim Turpin,V. V. Krishna,2007-01-01 The Asia Pacific has emerged as one of the most dynamic regions in the world presenting a variety of social and economic experiences and responses to global pressures In this book twelve country case studies explore the ways in which national science technology and innovation policies are evolving in response to globalization The editors argue that the national innovation system NIS perspective is driving policy regimes toward new approaches in policy intervention Underlying the new policy agenda is a concern with reframing the role for science technology and innovation institutions including higher education and integrating local community national and global technology objectives Presenting a broad analysis the book will be of great interest to policy analysts and practitioners concerned with science technology and innovation policy It will also appeal to academic and postgraduate students concerned with innovation and industrial development as well as scholars and practitioners engaged in regional development and international business in the Asia pacific region

The Government Role in Civilian Technology Institute of Medicine,National Academy of

Engineering, National Academy of Sciences, Committee on Science, Engineering, and Public Policy, Panel on the Government Role in Civilian Technology, 1992-02-01 As U S industry faces worldwide challenges policymakers are asking questions about the role of the federal government not only in promoting basic research but also in ushering new innovations to the marketplace This book offers an expert consensus on how government and industry together can respond to the new realities of a global marketplace The volume offers firm conclusions about policy and organizational changes with the greatest potential to improve our technological competitiveness and presents three alternative approaches for a new federal role The volume examines How federal involvement in technology development affects the nation s economic well being What we can learn from past federal efforts to stimulate civilian technology development in the United States and among our major industrial competitors How trends in productivity R D and other key areas have affected U S performance and how we compare to the world s rising industrial economies Offering guidance on one of the 1990s most important issues this volume will be indispensable to federal policymakers executives in industry and technology and researchers

Science and Technology Policy - Volume I Rigas Arvanitis, 2009-07-20 Science and Technology Policy theme is a component of Encyclopedia of Technology Information and Systems Management Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Science and technology policy covers all the public sector measures designed for the creation funding support and mobilization of scientific and technological resources The content of the Theme on Science and technology policy provides the essential aspects and a myriad of issues of great relevance to our world such as Science and Technology Policy International Dimensions of Science and Technology Policy The Innovation System The Policy Making Process in Science and Technology Regional Perspectives A New Scenario for Science and Technology Policies in the Developed and Developing World These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs
