Technology And Mans Future:

Technology Vs. Humanity Gerd Leonhard, 2016-09-06 Futurist Gerd Leonhard breaks new ground again by bringing together mankind's urge to upgrade and automate everything down to human biology itself with our timeless quest for freedom and happiness. Before it's too late we must stop and ask the big questions: How do we embrace technology without becoming it? When it happens gradually then suddenly the machine era will create the greatest watershed in human life on Earth. Technology vs. Humanity is one of the last moral maps we'll get as humanity enters the Jurassic Park of Big Tech. Artificial intelligence, Cognitive computing, The Singularity, Digital obesity, Printed food, The Internet of Things, The death of privacy, The end of work as we know it, and radical longevity. The imminent clash between technology and humanity is already rushing towards us. What moral values are you prepared to stand up for before being human alters its meaning forever? Gerd Leonhard is a new kind of futurist, schooled in the humanities as much as in technology. In his most provocative book to date he explores the exponential changes swamping our societies, providing rich insights and deep wisdom for business leaders, professionals, and anyone with decisions to make in this new era. If you take being human for granted, press Reset now with this passionately argued call to create a genuinely braver new world. **Technology and Man's Future** Hasan

Ozbekhan, 1966. A great part of contemporary humanity shares a world view dominated by technological values. The report examines the dangers and the promises which inhere to this world view and to determine where the human being stands in relation to the technological milieu he has created. **Technology and Man's Future** Albert H. In the last decade of the twentieth century A.D. a discovery was made of a body of knowledge which it is believed has important implications for the future of man. In 1996 it was discovered that many cultural artifacts produced by man since about 30 000 B.C. possess an unusual symbolism. This symbolism, as we shall see, has a mathematical component associated with it that finds expression in the form of alignments and points of alignments. Because of this the interpretation of this

symbolism is not entirely subjective but has an objective aspect to it as well In The Creation Its Infinite Features and Finite Realms artifacts of man that possess this unusual symbolism are referred to as inspired sources They are called inspired because the symbolism present in these artifacts is believed to be inspired by the Creator and they are called sources because the increments of knowledge transmitted by the symbolism of these artifacts are sources of knowledge
