Technology And The Tyranny Of Export Controls:

Technology and the Tyranny of Export Controls Stuart MacDonald, 2015-12-30 This is a study of export controls high technology and information and US controls It looks at the impact of export controls on the United States on the Allies and on the Soviet bloc

Technology and the Tyranny of Export Controls Stuart Macdonald, 1990 **States, Firms, and Power** George E. Shambaugh, 1999-08-12 Analyses the effectiveness of economic sanctions as instruments of statecraft

Whither Ukraine? Scott A. Jones, 2018-05-08 This title was first published in 2002 Examining the development of and rationale behind the Ukrainian export control system this text uses an original theoretically informed case study methodology to explain how and why Ukraine has continued to emphasize the importance of not only maintaining but augmenting its export control system Furthermore it assesses the utility of four international relations approaches in explaining non proliferation export control development This ground breaking study on Ukrainian politics and economics is ideally suited to audiences of European Ukrainian and US policy makers academics and specialists in security and political economy

A Critical Mind Christine Godt, Matthias Lamping, 2023-06-22 This book traces the academic footprint of Hanns Ullrich Thirty contributions revolve around five central topics of his oeuvre the European legal order competition law intellectual property the regulation of new technologies and the global market order Acknowledging him as a trailblazer the book aims to capture how deeply Hanns Ullrich has influenced contemporaries and subsequent generations of scholars The contributors re iterate the path breaking patterns of his teachings such as his contemplation of intellectual property as embedded in competition the necessity of balancing private and public interests in intellectual property law the policies of market integration and the peculiar relationship of technological advancement and protectionism

Information Technology Policy Richard Coopey, 2004-08-26 Information Technology has become a key factor in industry and society in the post war world and continues to evolve re shaping the local and global economy and reorienting comparative and competitive advantages This book brings together a series of country based studies that chart the growth and effectiveness of information technology policy

Knowledge Regulation and National Security in Postwar America Mario Daniels, John Krige, 2022-04-25 The first historical study of export control regulations as a tool for the sharing and withholding of knowledge In this groundbreaking book Mario Daniels and John Krige set out to show the enormous political relevance that export control regulations have had for American debates about national security foreign policy and trade policy since 1945 Indeed they argue that from the 1940s to today the issue of how to control the transnational movement of information has been central to the thinking and actions of the guardians of the American national security state The expansion of control over knowledge and know how is apparent from the increasingly systematic inclusion of universities and research institutions into a system that in the 1950s and 1960s mainly targeted business activities As this book vividly reveals classification was not the only and not even the most important regulatory instrument that came into being in the postwar era

Export Controls in Transition Gary K.

Bertsch, Steven Elliott-Gower, 1992 Like many cold war artifacts the West's export control policies and institutions are being reevaluated after the tumult in the communist world at the end of the 1980s Policymakers and scholars are being forced to reexamine the premises of export control policy and the very concept of export controls as a tool of national security and foreign policy This volume brings together expert scholars and government officials who provide contrasting perspectives and address the prospects for export controls The contributors discuss the role and function of export control policies from a variety of perspectives security commerce diplomacy the European region and that of the newly industrialized countries Among the topics covered are the problems the United States and the Western export regime will face in the 1990s in light of changing international political alliances and dependencies in defining strategic exports in enforcing export controls and the role of the Coordinating Committee for Multilateral Export Controls Contributors Sumner Benson Beverly Crawford Richard t Cupitt Dorinda G Dallmeyer Paul Freedenberg Martin J Hillenbrand Hanns Dieter Jacobsen Bruce W Jentleson Kevin J Lasher William J Long Janne Haaland Matlary Jere W Morehead Henry R Nau Han S Park Kevin F F Quigley Alen B Sherr Christine Westbrook Conversion Anke Brunn, Lutz Baehr, Hans-Jürgen Karpe, 2012-12-06 CONVERSION in the meantime the term for the process of converting arms industry into industrial production of non military goods is becoming a key subject in the building of the eastern economies These Proceedings contain all important presentations of an international Conference in Dortmund in 1992 Speakers were well known experts from economy politics science and military thus this book gives an up to date excellent overview *Strategic Export Controls* Stuart Macdonald, 1990 Strategies of Arms Control Stuart Croft, 1996 In this groundbreaking analysis Stuart Croft brings the subject of arms control into the era of complex multi polar international relations He moves beyond the narrow definitions of the phenomenon associated with the Cold War to show how it not only has a long past but also a clear future The author begins by tracing the history of agreements between polities over weapons back to ancient times An understanding of this history allows him to put forward a typology of arms control It occurs at the end of major conflicts stabilises balances between states develops norms of behaviour manages weapons proliferation and acts as a tool of international organisations Stuart Croft examines the evolution of these five qualitatively different strategies and applies the typology to arms control agreements in the post Cold War world This definitive new study will be of interest to students in international relations and security studies as well as specialists in these disciplines Change of State Sandra Braman, 2009-08-28 How control over information creation processing flows and use has become the most effective form of power theoretical foundations and empirical examples of information policy in the U S an innovator informational state As the informational state replaces the bureaucratic welfare state control over information creation processing flows and use has become the most effective form of power In *Change of State* Sandra Braman examines the theoretical and practical ramifications of this change of state She looks at the ways in which governments are deliberate explicit and consistent in their use of information policy to exercise power exploring not only such familiar topics as

intellectual property rights and privacy but also areas in which policy is highly effective but little understood. Such lesser known issues include hybrid citizenship, the use of functionally equivalent borders internally to allow exceptions to U.S. law, research funding, census methods, and network interconnection. Trends in information policy argues Braman both manifest and trigger change in the nature of governance itself. After laying the theoretical, conceptual, and historical foundations for understanding the informational state, Braman examines 20 information policy principles found in the U.S. Constitution. She then explores the effects of U.S. information policy on the identity, structure, borders, and change processes of the state itself, and on the individuals, communities, and organizations that make up the state. Looking across the breadth of the legal system, she presents current law as well as trends in and consequences of several information policy issues in each category affected. Change of State introduces information policy on two levels: coupling discussions of specific contemporary problems with more abstract analysis drawing on social theory and empirical research as well as law. Most important, the book provides a way of understanding how information policy brings about the fundamental social changes that come with the transformation to the informational state.

Global Intellectual Property Rights P. Drahos, R. Mayne, 2002-10-31 Intellectual property rights such as patents can reduce access to knowledge in genetics, health, agriculture, education, and information technology, particularly for people in developing countries. *Global Intellectual Property Rights* shows how the new global rules of intellectual property have been the product of the strategic behaviour of multinationals rather than democratic dialogue. The final section of the book suggests strategies aimed at developing more flexible standards for poor countries and for keeping knowledge in the intellectual commons.

Global Business Regulation John Braithwaite, Peter Drahos, 2000-02-13 Across an amazing sweep of the critical areas of business regulation from contract, intellectual property, and corporations law to trade, telecommunications, labour, standards, drugs, food, transport, and environment, this book confronts the question of how the regulation of business has shifted from national to global institutions. Based on interviews with 500 international leaders in business and government, this book examines the role played by global institutions such as the WTO, the OECD, IMF, Moody's, and the World Bank, as well as various NGOs and significant individuals. The authors argue that effective and decent global regulation depends on the determination of individuals to engage with powerful agendas and decision-making bodies that would otherwise be dominated by concentrated economic interests. This book will become a standard reference for readers in business law, politics, and international relations.

Information for Innovation Stuart Macdonald, 1998-04-09 Information is not taken seriously. Much is said about the information age, the information economy, the information society, and particularly about information technology, but little about information itself. If these are important, then so is information. But information is not as other goods; it has some peculiar characteristics. It cannot be displayed for sale without giving it away in the process. Sold, it goes to the buyer but still remains with the seller. Buying entails expressing demand in ignorance for buyers who do not know just what it is that they do not know. Such characteristics have long been recognised by economists.

but it is not generally economists who have most to say about the importance of information This privilege is exercised by senior managers who speak passionately about knowledge based learning organizations by politicians and public servants anxious to compensate with policy and programme for the information failure of organization and market and by specialists in telecommunications and information technology bent on adding value to what they treat as just a commodity All are particularly enthusiastic about the innovation which springs from information Information usually requires new information Finding acquiring and mixing this new information with that already in use presents problems not least because complex information transactions are required rather than simple information transfer Solutions can be devised but only by accommodating the characteristics of information This book contrasts the way innovation is normally regarded in a variety of areas from eighteenth century agriculture to high technology from technology transfer to industrial espionage from corporate strategy to patents and independent inventors with how it appears from what is termed an information perspective that is one that puts information first The results are intriguing suggesting that radically different approaches to innovation and organization should be considered *How Europe's Economies Learn* Edward Lorenz, Bengt-Åke Lundvall, 2006-12-07

When seeking to bench mark the performance of European economies commentators often look to compare them to the economies of Japan and the United States *How Europe's Economies Learn* shows how this is seriously misleading and how any such comparison needs to be complemented with an understanding of the fundamental differences between Europe's economies The contributors provide an up to date description and analysis of the way differences in state systems and institutional contexts such as labour markets education and training systems and financial systems shape learning processes and innovation performance across the member nations of the European Union In doing so it draws important conclusion for how policy strategies should be designed at the national and European levels in order to further promote the goals of the Lisbon process **Corporate Governance, Finance and the Technological Advantage of Nations** Andrew

Tylecote, Francesca Visintin, 2007-12-19 Exploring the technological advantage of nations their performance and pattern of specialization and the affect of their financial and governance systems this book discusses changes that need to be made so that they can cope with new challenges **International Cooperation on Export Controls** Michael Leslie Lipson, 1999

This dissertation provides an explanation for recent standardization and growth of international export control regimes I argue that neoinstitutionalist organization theory contributes to an explanation of these organizations which coordinate efforts to limit the spread of weapons related technologies The neoinstitutionalist approach claims that organizational structures are often not selected for maximal effectiveness at tasks such as controlling weapons related exports Rather they are selected for their fit with norms shared within communities of organizations that interact regularly or share common tasks The dissertation adapts and applies this literature to the subject of export control cooperation through process tracing case studies of export control regimes such as CoCom and the Wassenaar Arrangement I argue that a transnational

community of organizations or organizational field has developed in the issue area of nonproliferation export controls While extant theories of International Relations help explain the origins of international export control cooperation they do not explain the extent or form such efforts have taken today Shared norms in this issue area and copying of organizations perceived as successful explain the growth and standardization of multilateral nonproliferation regimes and international export control practices These factors are highlighted by the sociological theories I draw upon The case studies are constructed from archival data interviews with policy makers trade literature and secondary sources Business Practice in Socialist Hungary, Volume 2 Philip Scranton, 2023-05-09 This book aims to reconstruct the activities of enterprises and individuals over two decades in one developing country Hungary within and across four politico economic domains agriculture infrastructure construction commerce and manufacturing from the initial Stalinist obsession with heavy industry through later reforms paying greater attention to profitable farming and the provision of abundant consumer goods It provides hundreds of grounded granular stories for reflection as reported by actors and direct observers ranging from innovation and improvisation to obstruction failure and fraud Further it offers an otherwise unobtainable close encounter with another world familiar in some respects while amazingly peculiar in others The social history of enterprise and work in postwar Central European nations building socialism has long been underdeveloped Through extensive macro level research on planning and policy in Hungary Poland Czechoslovakia and other Bloc countries a grand narrative has been framed reconstruction and breakneck industrialization under Soviet tutelage then eventual mismanagement stagnation and crisis leading to collapse This book seeks to explore what socialism actually looked like to those sustaining or enduring it as they faced forward into an unknowable future to assess how and where it did or didn't work and to recount how ordinary people responded to its opportunities and constraints This study will appeal to readers interested in a understanding how businesses worked day to day in a planned economy how enterprise practices and technological strategies shifted during the first postwar generation how novice managers and technicians emerged during rapid industrialization how peasants learned to farm cooperatively how organizations improvised and adapted how political purity and practical expertise contended for control and how the controversies and convulsions of the postwar decades shaped a deeply flawed project to build socialism
