Information and Communications Technology Diana Pérez Marín, 2014-01-01 Are you a student who wants to become an effective teacher in the 21st century Maybe you are a teacher already Would you like to learn how to take advantage of educational technologies in order to achieve your pedagogic goals Nowadays technology is all around us but how do we as teachers make the best use of it Technology has entered the classroom and most teachers are not trained in using it to achieve pedagogic goals This book aims to remedy this situation To do that it provides the reader with many step by step guides and solved exercises all written in clear language in a friendly positive style The book demystifies the whole process of understanding how new software or hardware works and introduces techniques to make the reader comfortable with classroom technologies I hope that you enjoy it and find it useful Dr Diana P rez Mar n received a Ph D degree in Computer Science and Engineering from the Universidad Autonoma de Madrid in 2007 She has published more than 50 papers in journals such as the Journal of Educational Technology and Society and has authored the book ICT in education in Spanish

Tomorrow's People Susan Greenfield, 2003 Susan Greenfield explores how the human nature of future generations could be on course for a dramatic alteration arguing that the current revolution in biomedical science and information technologies will have a huge impact on our brains and central nervous system She believes that the society in which future generations will live and the way they view themselves will be like nothing our species has yet experienced in the tens of thousands of years to date makeover far more cataclysmic than anything that has happened before As we appreciate the dynamism and sensitivity of our brain circuitry so the prospect of directly tampering with the essence of our individuality becomes a possibility

Culture, Identity, and Information Technology in the 21st Century Pauline Kusiak, U. S. Army War College, Strategic Studies Institute, 2013-05-25 This monograph describes strategic trends in cultural change and identity formation in the 21st century While it is impossible to predict credibly the values and beliefs of future generations the first part of the monograph provides a modest forecast by tracing global trends in the use of language and media as well as in the use of information and communication technologies The second part then draws out potential implications of these culture and identity trends for the strength of the U S signal in the global info communication sphere The analysis by Dr Pauline Kusiak suggests that in the next several decades the world is likely to be more ideologically fragmented than at any time during the 20th century and that the ability of the United States to push back against other centers of influence may be comparatively reduced
