Black Teenage Mothers Constance Willard Williams, 1991-01-01 In this ground breaking book Constance Williams reveals why contrary to the adverse outcomes previously attributed to their lot many black teenage mothers consider their lives enriched by childbearing Here is a poignant exploration of the meaning of pregnancy and motherhood to young women who although impoverished express hope as freely tell their stories and reveal new truths about their attitudes Williams discovers that it is more often socialization not ignorance that leads black teens into motherhood at such a young age She also reveals why early childbearing for these teens may well be an adaptive and

even reasonable response to their social and cultural realities

The Culture of Teenage Mothers Joanna

Gregson, 2010-07-02 Society stigmatizes teen pregnancy but most teenage mothers keep their babies and many regard their pregnancies as the best thing that ever happened to them In this book Joanna Gregson explores teen mothers shared culture how they perceive their situations and how they experience stigma Drawing from four years of participant observation research in a school based program for parenting teens Gregson presents the stories and voices of a group of mostly but not exclusively white teen mothers a group often overlooked in the literature She reveals a world in which teenage mothers compete with each other to show competency as parents and proclaim the virtues of teen parenting over that of women in their twenties thirties and forties Gregson discusses the teen mothers conceptions of fatherhood and how they judge their own children s fathers including the issue of older boyfriends impregnating teenage girls The young women s thoughts on the stigma they experience and the transformations in their lives and relationships are illuminating and important to all who care about teenage girls as well as about teenage mothers and their children

American Baby Gabrielle Glaser, 2022-01-25 A New York Times Notable Book The shocking truth about postwar adoption in America told through the bittersweet story of one teenager the son she was forced to relinquish and their search to find each other This book about the past might foreshadow a coming shift in the future I don't think any legislators in those states who are anti abortion are actually thinking Oh great these single women are gonna raise more children No their hope is that those children will be placed for adoption But is that the reality I doubt it says Glaser Mother Jones During the Baby Boom in 1960s America women were encouraged to stay home and raise large families but sex and childbirth were taboo subjects Premarital sex was common but birth control was hard to get and abortion was illegal In 1961 sixteen year old Margaret Erle fell in love and became pregnant Her enraged family sent her to a maternity home where social workers threatened her with jail until she signed away her parental rights Her son vanished his whereabouts and new identity known only to an adoption agency that would never share the slightest detail about his fate The adoption business was founded on secrecy and lies American Baby lays out how a lucrative and exploitative industry removed children from their birth mothers and placed them with hopeful families fabricating stories about infants origins and destinations then closing the door firmly between the parties forever Adoption agencies and other organizations that purported to help pregnant women struck unethical deals with doctors and researchers for pseudoscientific assessments and shamed millions of women into surrendering their children The identities of many who were adopted or who surrendered a child in the postwar decades are still locked in sealed files Gabrielle Glaser dramatically illustrates in Margaret and David's tale one they share with millions of Americans a story of loss love and the search for identity

Decision-Making Process around Teenage Motherhood Miriam Müller, 2019-11-27 The objective of this study is to understand the perceptions beliefs and influencing factors that may lead to different fertility outcomes among young women in Nicaragua a country with one of the highest adolescent fertility rates in Latin America The results are based on qualitative data collected in urban areas Miriam Müller reveals that two structural constraints affect women's choices and their capacity to actively participate in defining their life paths poverty and traditional gender norms This book contributes to the discussion of intergenerational transmission of

poverty by disentangling the mechanisms behind decision making around teenage motherhood and by describing the consequences of these decisions *Teen Pregnancy* Jennifer MacKay, 2011-04-22 The C D C reports that a total of 249 078 babies were born to women between the ages of 15 to 19 in 2014 According to The National Campaign the teen pregnancy rate has decreased 64 percent between 1991 and 2015 but the rate of teenage pregnancy in United States continues to rank consistently higher than those of other western countries This informative volume contextualizes and explores issues surrounding teen pregnancy Chapters discuss its causes social factors that contribute to teen pregnancy if it is a public health problem and the various options for pregnant teens The Future of Motherhood in Western Societies Gijs Beets, Joop Schippers, Egbert R. te Velde, 2010-12-06 Most people value to have children still highly But what is the optimal moment to have the first The decision on having children or not and if yes on the timing of the first is one of the most difficult ones to make also because it more or less coincides with various other heavy decisions on shaping the life course like on union formation labour market career housing accommodation etc People realise that having children will fundamentally change their life and in order to fit this unknown and irreversible adventure perfectly into their life course postponement of the first birth is an easy way out as long as doubts continue and partners try to make up their mind Modern methods of birth control are of course a very effective help in that period What is the best moment to have the first child And to what moment is postponement justified There are no easy answers to these questions Best solutions vary per person as they depend on personal circumstances and considerations the partner may have conflicting ideas housing accommodation job income free time activities Existing parental leave and child care arrangements are weighted as well Unfortunately the biological clock ticks further And also unfortunately assisted reproductive technology IVF etc is unable to guarantee a successful outcome Several couples end up without children involuntarily and that may lead to sorrow and grief This interdisciplinary book overviews the process of postponement and its backgrounds in modern Western societies holistically both at the personal and the societal level Contributions come from reproductive evolutionary biological and neurological sciences as well as from demography economy sociology and psychology It holds not only at women but also at men becoming first time fathers The discussion boils down to a new policy approach for motherhood and emancipation on how to shape work and family life It is argued that a public window where one can compose a cafeteria like set of supportive arrangements according to personal preferences could lead to a break in the rising age at first motherhood **Sociocultural Studies in Education** Richard A Quantz, 2016-01-08 Sociocultural Studies in Education Critical Thinking for Democracy fills a void in the education of educators and citizens in a democracy It explores some of the fundamentals around which disagreements in education arise It presents a process with which those new to these debates can understand often confusing and entwined sets of facts and logics This book leads the reader through some general concepts and intellectual skills that provide the basis for making sense out of the debates around public education in a democracy This book can be seen as a primer on how to read texts

about education It acknowledges that good teachers must be not only trained to teach but also educated about education It presents the various themes and currents found within the arguments and narratives that people use to represent public education It assumes that the more those interested in education know about how to see through the rhetoric the better they will be at discerning whose interests are served by which texts
