Wooldridge,Manuela Veloso,2007-03-06 Artificial Intelligence is one of the most fascinating and unusual areas of academic study to have emerged this century For some AI is a true scientific discipline that has made important and fundamental contributions to the use of computation for our understanding of nature and phenomena of the human mind for others AI is the black art of computer science Artificial Intelligence Today provides a showcase for the field of AI as it stands today The editors invited contributions both from traditional subfields of AI such as theorem proving as well as from subfields that have emerged more recently such as agents AI and the Internet or synthetic actors The papers themselves are a mixture of more specialized research papers and authoritative survey papers The secondary purpose of this book is to celebrate Springer Verlag s Lecture Notes in Artificial Intelligence series Making Sense Of Children'S Drawings Anning, Angela, Ring, Kathy,2004-08-01 Making Sense of Children s Drawings is enlivened with the real drawings of seven young children collected over three years These drawings stimulated dialogues with the children parents and practitioners whose voices are reported in the book The book makes an argument for us to rethink radically the role of drawing in young children s construction of meaning communication and sense of identity It provides insights into the influence of media and consumerism as reflected in popular visual imagery and on gender identity formation in young children It also offers strong messages about the overemphasis on the three Rs in early childhood education Screen Time Lisa Guernsey,2012-03-20 As a mother Lisa Guernsey wondered about the influence of television on her two young daughters As a reporter she resolved to find out What she first encountered was tired advice sensationalized research claims and a rather draconian mandate from the American Academy of Pediatrics no TV at all before the age of two But like many parents she wanted straight answers and realistic advice so she kept digging she visited infant perception labs and child development centers around the country

She interviewed scores of parents psychologists cognitive scientists and media researchers as well as programming executives at Noggin Disney Nickelodeon Sesame Workshop and PBS Much of what she found flies in the face of conventional wisdom and led her to conclude that new parents will be best served by focusing on about educational media She examines how play and language development are affected by background and foreground television and how to choose videos that are age appropriate She explains how to avoid the hype of brain stimulation and focus instead on social relationships and the building blocks of language and literacy Along the way Guernsey highlights independent research on shows ranging from Dora the Explorer to Dragon Tales and distills some surprising new findings in the field of child development

surprising results They see these traveling musics in Hawai i Asia and the Pacific as making waves that is not only riding flows of globalism but instigating ripples of change What is the nature of those ripples What constitutes some of the infrastructure for the wave itself What are some of the effects of music landing on transported to or appropriated from distant shores How does the Hawai i Asia Pacific context itself shape and get shaped by these musical waves The two poetic and evocative metaphors allow the individual contributors great leeway in charting their own course while simultaneously referring back to the influence of their mentor and colleague Ricardo D Trimillos whom they identify as the wave maker The volume attempts to position music as at once ritual and entertainment esoteric and exoteric tradition and creativity within the cultural geographies of Hawai i Asia and the Pacific In doing so they situate music at the very core of global human endeavors
